

RESOLUTION OF THE CITY COUNCIL

No. 450

Approved November 20, 1972

WHEREAS, the Port of Providence is now the leading revenue producing agency of the City of Providence, and

WHEREAS, its potential attraction and prospective expansion, as a leading facility for waterborne commerce along the Eastern seaboard, is evident by the fact that the revenue it produces has more than tripled within the last five years, and

WHEREAS, in order to attract additional users and carriers to this facility, maintain a high level of efficiency, and to expand the said Port of Providence, it is necessary to augment the present Port facilities,

NOW, THEREFORE, BE IT RESOLVED, that His Honor the Mayor is authorized to engage such professional engineering services, that he may deem necessary, for the purpose of conducting an engineering and cost survey to determine the extent and cost of repairs to the dock facilities and the dredging requirements and cost needed for the present berths, to accommodate the more modern and larger carriers to conform to the recently deepened forty-foot channel.
