RESOLUTION
OF THE
CITY COUNCIL

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. Next, it is essential to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing resources.

3. Once the information is gathered, the next step is to analyze it. This involves identifying patterns, trends, and relationships that can help in understanding the problem more deeply.

4. After analysis, the next step is to develop a plan or strategy. This involves deciding on the best approach to solve the problem, taking into account the available resources and potential challenges.

5. The final step is to implement the plan and evaluate the results. This involves putting the strategy into action and monitoring the progress to ensure that the problem is being solved effectively.
