"The Providence Weekly Gazette."

WHEN we first conceived the idea of starting the present WEEKLY GAZETTE, we based it upon our experience in publishing the WEEKLY TIMES, which we printed up to the very day we left in the Tenth Rhode Island Regiment of Volunteers, for the defense of our Capitol, the City of Washington. The TIMES had paid us well. The GAZETTE, thus far, has netted us a better profit than ever the TIMES did, and we have enlarged it to the size of the Daily Journal.

Three thousand copies are printed weekly; two thousand of which are circulated in the wards of this city, which supplies one-quarter of the families in all the different wards, weekly, every week supplying new families in those wards, thereby taking four weeks to supply the entire city. The balance, one thousand goes into country villages through the State; never two weeks in succession in the same village. We think this is the whole secret of success. The GAZETTE has now been published for over three years, and is now in so prosperous a condition that its permanency has become a "fixed fact." We desire to give the readers of our paper a full reading page, but as yet have been unable to do so, but will as soon as our narrow limits will admit.

Thankful for the very liberal patronage already received, we invite the citizens of the State generally, to call and see the

In the night, No. 9 Engine House, Pallas street; Central Baptist Church; Gardner T. Swarts' Tower, on Dorrance street, and No. 8 Engine House on Harrison street.

The signal boxes where alarm may be communicated, may be found in all the engine houses; at the residence of the Chief Engineer, No. 228 Friendship street, and Assistant Engineer, No. 22 Benefit street, and at the several stores of M. Upon the discovery of fire in any locality within or near the city, let the fact be made known to those having charge of the nearest signal box, and the alarm will be immediately telegraphed through the line.

ARTICLE 1. The operators are the Police, the Firemen, and those having charge of the boxes in the several stores.

ART. 2. The operator who first gets possession of a signal box, shall commence operations by making from five to ten rapid movements of the knob, as preliminary signals. He shall then strike the ward and district the fire is in, two minutes or more

ART. 3. To avoid striking the wrong district the bell ringer shall not leave his station to ring his bell until he has received two or more distinct signals through his box.

ART. 4. Upon receiving the correct alarm, he shall proceed immediately to the bell assigned him, and after ringing smartly thirty seconds, shall toll distinctly the ward and district where the fire is, five times in succession at slight intervals, and repeat the same at least five times.

ART. 5. It shall be the duty of all persons authorized to make signals for fire alarms, to note whether the armature is against the magnet or lying upon the pin; if in the latter position, then the telegraph is not in working order, and the bell ringers shall then proceed to ring an alarm, and the firemen will use due diligence in finding the place of the fire if any there be.

ART. 6. The Foreman of the several companies will report immediately to the Chief Engineer, when the alarm shall have been given from their station, and the name of the person giving the alarm.

ART. 7. Those having charge of the signal box at Station No. 1, on Exchange place, will every evening at 9 o'clock, strike the number of the hour. If the response is not made at the other stations throughout the city, it is required of the several operators to report the same at the office of the Chief, No. 1 City Building.

Office of *A. & W. Sprague Mfg. Co.*

Providence, R. I., Dec. 22nd, 1869.

CHAS. F. TAYLOR, Treas. Prov., R. I.—Dear Sir,—For some three years we have been using the cop tubes of the Burgess Cop Tube Co., and have found them in every way satisfactory.

We cheerfully recommend them to cotton manufacturers as the best cop tubes we have ever used.

Respectfully yours,

A. & W. SPRAGUE MFG. CO.,

Amasa Sprague, Treas.

Lawrence, 12th, January, 1870.

CHAS. F. TAYLOR, Esq., Treas. Burgess Cop Tube Co., Prov., R. I.—Dear Sir,—I cheerfully give my testimony in favor of the paper cup tubes you have furnished us. The ordinary article made of paper was so unsatisfactory, that we continued the use of the tin tubes until we heard of yours, but have adopted the use of your manufacture exclusively, and are well satisfied with them.

I am truly yours,

Allens' Spray Nozzle, has been adopted by a number of Fire Departments and Manufacturing Co.'s, and has given universal satisfaction, as our testimonials will show. In case of smoky fires, it enables the firemen to clear a track through the dense smoke to the seat of fire immediately, as it keeps a cool breeze in the firemans face while advancing, thereby saving much delay, when delays are most dangerous to the destruction of property.

The Hook and Ladder Strap, is an invaluable invention, which can be quickly adjusted to the Hose and Ladder.

Volney W. Mason & Co.,

MANUFACTURERS OF MASON'S

Patent Friction Clutches!

FOR

STARTING MACHINERY,

WITHOUT SUDDEN SHOCK OR JAR.

Reference can be given to many of our best Manufacturers who have them in use, among others, the

Corlis Steam Engine Co., Providence; S. H. Greene & Sons, Riverpoint; Atlantic Print Works E. Greenwich; Oriental Print Works, Apponaug, R. I.; James Sanders, Centreville, R. I.; W. F. & F. C. Sayles' Bleachery, Pawtucket, R. I., and many others, in Providence, and vicinity.

RIVERPOINT, R. I., MAY 19, 1869.

VOLNEY W. MASON & Co.—Dear Sirs: Our experience with your Friction Pulleys and Clutches extends over a period of at least eight years. We first applied them to Mangles, two of them requiring great power to operate them,—so great as to cause excessive breakage of gears in starting, when other kinds of Clutches were used. Since the application of MASON'S FRICTION CLUTCH, no gears have been broken through their means. Besides five Mangles, there are here, twenty other machines driven by Mason's Friction Clutches and Pulleys, varying in size from 14 in. diameter, 2½ in. face, to 30 in. diameter, 10 in. face. Among these are a Singeing Machine, Washing Machines, Madder Dye Becks, Second Dyeing Machines, Hot Watering Machines, &c., &c. Their application to machinery in the Madder Dye House, is especially satisfactory and useful, for the reason the belts running in a moist atmosphere, stretch badly and unevenly on the edges, and the butts and laps are separated where they come in contact with the shipper; while in case your Pulleys are used, no such injury is inflicted. With ordinary care, your Pulleys and Clutches will last many years, though subjected to continual use, as is the case of those in our establishment. Yours truly,

Clyde Bleachery and Print Works.

I shall continue to build Jewelers' Tools of all kinds. My Screw Presses are
of different construction from other builders', having the thread cut in the solid
iron which forms the nut, (thereby dispensing with the bronze or Babbitt nuts,
which give out under a heavy pressure, causing loss of time and money to
those using them,) rendering my Presses so perfect that I can warrant them in
ever respect.

Being a practical mechanic, well acquainted with the law and practice of the Patent Office, I am enabled to offer the best facilities for giving a clear understanding of the merits of any Invention to the Commissioners of Patents and Examiners.

This may certify, that Mr. BENJAMIN ARNOLD, of East Greenwich, R. I., has within the last ten years made for me FORTY SIX applications for patents to the U. S. Patent Office; FORTY-FOUR of which have been granted. He has also been engaged for me as Patent Agent and Attorney in re-issues, and extension cases, and has met with success in every case most gratifying to me. Such unusual success indicates great ability and zeal. Mr. Arnold is also a scientific and Practical Mechanic, and I can confidently recommend him to inventors as one most likely to succeed in securing their patents for them, and all business may be submitted and entrusted to him with the greatest confidence.
