January 27, 1960

Mayor Walter H. Reynolds
Executive Chambers
City Hall

Dear Mayor:

During the fiscal year 1958-59 the Office of the Recorder of Deeds received for record 19,586 documents including 62 military discharges and 370 Minimum Housing violation notices for which no fee was charged. 19,154 documents received for record during this period brought a total revenue of \$60, 816.45.

Total expenses of this Office during this fiscal year was \$68,789.05. The net cost to the City of Providence to operate this department during the fiscal year 1958-59 was \$7,972.60.

During this period much progress has been made in the restoration of our oldest plat books, 38 in number, and in the rebinding of hundreds of Real Estate mortgages and Deed Books. The present fiscal year should see the end of the major rebinding of our record books, which has been a continuing project of this office for a period of several years.

One of the major accomplishments of our office during the past year has been the consolidation of 15 years of annual indexes into three (3) five year indexes, completing our real estate five year index consolidation up to January 1959. This work involved the preparation and photo-copying of 6,192 pages of indexes, but it is work sorely needed to be done, and greatly appreciated by those who search the records.

On the other side of the ledger we still have unsolved problems. Probably the most annoying of these is the unsolved problem of lack of space.

In the Office of the Recorder of Deeds are housed about 3,000 record books of all kinds, and this total is being increased at the annual rate of about 50 books per year.

CITY OF PROVIDENCE - RHODE ISLAND - Walter H. Reynolds, Mayor

RECORDER OF DEEDS

CITY HALL

Walter A. Lough
Deputy Recorder

Edward M. Flanagan
Recorder

-2-

All available space is presently being used to house these records -- Racks, work tables and cabinets of all kinds are filled to capacity. It is a problem of increasing urgency, not only from our point of view, but also because of the weight of these volumes. More than 30 tons of records are at present housed here and this weight is being increased at the rate of one-half ton a year.

Another vexing problem is that of photo-copying. Our present Photostat Machine was purchased in 1944 and is at present 16 years old. During all of these years this machine has been in continuous operation from eight to twelve hours daily. Delaying break-downs are recently occurring with increasing frequency and the Photostat Company has recommended replacement with a new and more efficient and modern unit.

We have, however, hesitated to request such a machine, not only because of the cost, but also because of modern trend in recording to microfilm each document as received for record and have such microfilm reproduced electrostatically on linen record paper by a commercial firm which reproduction would become a part of the record.

Several of our local towns and cities have already purchased this microfilm equipment and contracted for this reproduction service at a net cost less than that of their present recording system. Middletown, East Providence, Pawtucket and Westerly are among those who have adopted this procedure which appears to have the advantages of lower cost per record page, microfilm protection in case of disaster, and a quicker copying procedure when done in volume.

In the event this office were to adopt this procedure our photostat machine would not need to be replaced, but could be used for certified copies of the record and also for index work.

Laboratory and Office at
Charles V. Chapin Hospital

QUARTERLY REPORT OF THE QUALITY OF MILK SOLD IN PROVIDENCE BY RETAIL DISTRIBUTORS

The following table gives the results of the average of analyses made by this department during the second quarter of the year 1959:

No distributor's name is listed under a particular grade of milk unless at least four samples of that grade were analyzed during the quarter. The standard plate count of colonies of bacteria is obtained by using the logarithmic average set forth in the United States Public Health Service Milk Code.

CERTIFIED MILK

The legal standards for Certified Milk are those adopted by the American Association of Medical Milk Commissions, Inc. and in effect at the time of production.

Unless otherwise indicated on the label it shall contain an average of 4.0% of butter fat with a minimum of 3.5% for individual samples and a minimum of 12% of total solids.

The average bacterial count of Pasteurized Certified Milk shall not exceed 500 colonies of bacteria per cubic centimeter.

NAME OF DEALER	BUTTER FAT	TOTAL SOLIDS	Standard Plate Count. Colonies of Bacteria in One Cubic Centimeter
	Per Cent	Per Cent	
Hillside Farms, Inc.....	4.15	12.81	35
Hood, H. P. & Sons.....	4.03	12.90	10

GRADE A MILK—PASTEURIZED

Grade A Pasteurized milk is produced on farms scoring not less than 85% using the dairy score card of the U. S. Department of Agriculture. It shall have been pasteurized within 24 hours of the time of milking and delivered to the consumer within 30 hours after pasteurization. The butter fat shall average not less than 3.50% for any four samples taken in a period of not less than 30 days or more than 90 days. The bacteria count shall have a logarithmic average of not greater than 10,000 for any 4 consecutive samples.

The Total Solids Content shall average 12%.

107
THE RHODE ISLAND MEDICAL SOCIETY

106 Francis Street

Providence 3, Rhode Island

February 2, 1960

To the President of the City or Town Council in each of the Cities
and Towns in Rhode Island:

This communication is directed to you as a form letter.
Please accept my assurance, however, that it is sent as a personal
message from me, as President of the Rhode Island Medical Society, to
each of you.

The problem of highway safety has long engaged the interest
of the physicians here, as well as throughout the nation. Our
committee on highway safety has worked closely with the Registrar of
Motor Vehicles for several years. The Society has supported effective
legislation for chemical testing of alleged intoxicated drivers.

Periodically we find that physicians are assailed in general
because they do not leave their homes or offices, night or day, to
make an examination for a local police department of a motorist
arrested and alleged to be driving while under the influence of alco-
hol or drugs. It is too easy to blame the busy doctor for the failure
of the system now in vogue in the handling of this problem.

The Rhode Island Medical Society is ready and willing to aid
in every reasonable manner. We believe each city and town will always
have the cooperation of local physicians if a workable plan is de-
veloped between the police or town authorities and the doctors.

The House of Delegates adopted a report of its highway safety
committee at a recent meeting that includes recommendations towards a
solution of the existing problem. The report is enclosed and we
commend it to the attention of your Council. We also invite you to
present to us suggestions for mutual cooperation in solving this
problem, and we also urge you to arrange a conference with physicians
in your local area to explore ways in which they may cooperate.

Better highway safety must be achieved, and you have our pledge
to do everything possible to assist in the reduction of traffic
fatalities and accidents.

Sincerely yours,

Alfred L. Potter

CLERK

HIGHWAY SAFETY

The Highway Safety Committee of the Rhode Island Medical Society has for years campaigned in the interest of the prevention of deaths and disabilities resulting from traffic accidents on our highways. The death toll from motor vehicle accidents is considered low in Rhode Island in comparison with other states, but such comparisons are merely statistical and there can be no comfort for anyone in the fact that in 1958 accidents were the 4th leading cause of death for all ages in our state.

The enactment of the so called chemical test law by the General Assembly at its 1959 session was a long delayed action for which the Society had campaigned for years. The Society, through this Committee, took an active interest in the special institute held at the University of Rhode Island during the past summer for the demonstration of the use of the various procedures involved in the chemical tests to be conducted upon motorists alleged to be driving while under the influence of intoxicating liquors. Effective prosecution of test cases under this new law should be pressed as a deterrent to all persons who attempt to drive motor vehicles while under the influence of liquor or drugs.

The effective enforcement of the new motor vehicle legislation adopted at the special session should also aid in halting the death and injury toll on our highways in 1960.

Recently physicians have been criticized by police officials for not being readily available at any hour of the day or night to respond to calls from a local police department to come immediately to examine an alleged drunken driver. The Society has made known its position on this question in previous years, and your Committee now recommends that the House of Delegates notify every city and town Council in Rhode Island that--

- 1.) The Rhode Island Medical Society is deeply concerned with the problem of highway safety and the public health problem that it presents.
- 2.) That the Society is on record as approving every effective legal action to prosecute the motorist who drives a vehicle on the highways of the state while he is under the influence of liquor or drugs.
- 3.) That the rights of the individual be protected legally in that he continued to be permitted to be examined by a physician of his own choice, if he desires such an examination and it can be arranged.
- 4.) That the policy adopted in Providence whereby police physicians, so called, are retained on a salary or fee basis, to be available to examine alleged drunken drivers for the police departments, be adopted in the other cities and towns.
- 5.) That the Society pledges its full cooperation, directly and through the component district societies, to all local police authorities in securing physicians who will accept assignments as police physicians on a salary or fee for service

basis, such fee to include payment for the initial examination as well as compensation for the court appearance and testimony when required.

- 6.) That the Society urge every City and Town Council in Rhode Island to give consideration in 1960 of such a program, budgeting local funds for a proper and effective medical examination of motorists when required by a local police department, with the cost to be borne by the city or town when the motorist is exonerated, and by the motorist as part of court costs upon conviction.

Crash Safety in Auto Designs

The attention of your Committee has been directed by the Colorado State Medical Society to its efforts for the adoption of crash safety features in motor car designs. Attention is also directed to H.R. 1341, placed before the Congress in 1959, passed by the House and scheduled to come before the Senate this year.

This legislation has as its purpose "to establish reasonable safety standards for passenger-carrying motor vehicles acquired by the Federal government. The standards would be established by the Secretary of Commerce...". The adoption of this regulation might materially aid in the development of safer motor vehicles for general distribution also. We urge that the Society urge our United States Senators to press for passage of this act during the current session of Congress.

COMMITTEE ON HIGHWAY SAFETY

Thomas C. McOsker, M. D., Chairman
Frederick A. Webster, M. D.
Thomas Nestor, M. D.
John A. Dillon, M. D.

Robert E. Martin, M.D.
Harry Levine, M. D.
Nathaniel Robinson, M. D.

Adopted by the
House of Delegates of the
Rhode Island Medical Society

January 27, 1960
