TELEGRAPH FIRE ALARM.

New code of Fire Alarm Signals by Gamowell & Co's Automatic System, adopted Dec., 1870.

The following directions will be observed when a fire is discovered :

1. Go to the nearest box and open the door, pull the hook down as far as you can, (firmly without jerking) and then let it slide back, close the door and remove the key.
2. If upon going to a box to give an alarm you hear the small bell inside ringing (which is an indication that an alarm is being sent over the wires) in all such cases count the signals being sounded, and be certain whether it is for the same fire or not, if not for the same fire wait until the signals have entirely ceased before pull-ing the box.

- Key-holders are cautioned,
1. Not give an alarm until certain of a fire.
  2. Not give an alarm for a fire seen at a distance.
  3. To be sure after giving an alarm that the door is securely closed before leaving the box.

OLD CARPETS MADE TO LOOK NEARLY AS GOOD AS NEW.

The undersigned having purchased the exclusive right for this State, to use the Patent Carpet Cleaning Machine, which has been in successful operation for a number of years, in most of the principal cities of the Union, and having had six years experience in this business, feels confident, now that he has opened an establishment in this city, that he can give entire satisfaction, and would respectfully solicit the patronage of the public.

By this method of Cleaning Carpets they are uniformly beaten their entire length and breadth, by revolving flexible whips, which will not injure the finest fabric, yet thoroughly expel all the Dust and Moths. Orders sent by mail or otherwise to the factory, will receive prompt attention. All work guaranteed.

Address No. 70 Knight St.,

Providence, R. I.

We respectfully call the attention of the public to a few FACTS determining why our

**Guardian Galvanized Lightning Rod**  
**IS SUPERIOR TO ANY OTHER IN USE.**

FIRST, It is made from MAGNETIC IRON, manufactured expressly for Lightning Rod purposes only. 5-8th square-grooved, spiral twisted and galvanized, and connected with PURE COPPER COUPLINGS, rendering it Superior to any other Rod; the whole surmounted with a Gold-Plated Cluster-Point of Pure Copper, thus forming a continuous rod from the Point to the ground, and by a combination of metals forming a Galvanic Battery in the Rod.

SECOND, Our GUARDIAN GALVANIZED ROD is WARRANTED always to remain Bright and Clean and never Corrode or Rust, thus presenting a Neat, Ornamental Appearance on the building worth more than its cost as a matter of ornament, say nothing about its SURE PROTECTION AGAINST LIGHTNING.

All Work Done by an Experienced Man, in the most Thorough and Satisfactory manner.  
 OLD RODS REMOVED AND REPLACED WITH NEW.

**TERMS REASONABLE. ORDERS SOLICITED.**

WE, the undersigned, fully endorse the  
**GUARDIAN GALVANIZED LIGHTNING ROD**  
 As Superior to all others in use.

 PROVIDENCE, R. I., April 22d, 1871.

J. F. HOLMES, Esq., SIR:—I have examined the GUARDIAN LIGHTNING ROD AND POINTS, constructed of Galvanized Iron with spiral twist, copper couplings and gilded points, and consider it to be constructed on scientific principles, and to afford efficient protection against damage by lightning.

Yours Respectfully,

JOHN H. APPLETON, Prof. of Chemistry.

RIVERPOINT, R. I., May 19, 1869.

VOLNEY W. MASON & Co.,—Dear Sirs: Our experience with your Friction Pulleys and Clutches extends over a period of at least eight years. We first applied them to Mangles, two of them requiring great power to operate them; so great as to cause excessive breakage of gears in starting, when other kinds of Clutches were used. Since the application of MASON'S FRICTION CLUTCH, no gears have been broken through their means. Besides five Mangles, there are here, twenty other machines driven by Mason's Friction Clutches and Pulleys, varying in size from 14 in. diameter, 2 1/2 in. face, to 30 in. diameter, 10 in. face. Among these are a Singeing Machine, Washing Machines, Madder Dye Becks, Second Dyeing Machines, Hot Watering Machines, &c., &c. Their application to machinery in the Madder Dye House, is especially satisfactory and useful, for the reason the belts running in a moist atmosphere, stretch badly and unevenly on the edges, and the butts and laps are separated where they come in contact with the shipper; while in case your Pulleys are used, no such injury is inflicted. With ordinary care, your Pulleys and Clutches will last many years, though subjected to continual use, as is the case of those in our establishment. Yours truly,

Clyde Bleachery and Print Works.

CHAS. F. TAYLOR, Treas., Providence, R. I.—Dear Sir,—For some *three years* we have been using the Cop Tubes of the Burgess Cop Tube Co., and have found them in every way satisfactory. We cheerfully recommend them to cotton manufacturers as the *best cop tubes that we have ever used.*

Respectfully yours,

LAWRENCE, 12th January, 1870.

CHAS. F. TAYLOR, Esq., Treas. Burgess Cop Tube Co., Prov., R. I.—Dear Sir,—I cheerfully give my testimony in favor of the paper cup tubes you have furnished us. The ordinary article made of paper was so unsatisfactory, that we continued the use of the tin tubes until we heard of yours, but have adopted the use of your manufacture exclusively, and are well satisfied with them.

I am truly yours,

In case of smokey fires it enables the firemen to clear a track through the dense smoke to the seat of the fire immediately, as it keeps a cool breeze in the fireman's face while advancing, thereby saving much delay, when delays are most dangerous to the destruction of property.

## Patent Sectional Grate & Grate Bars,

For Steamboats, Steamships, Locomotives and other Furnaces.

No. 1.

We are now prepared to furnish these Grates with greater dispatch, having completed our series of Iron Patterns, which will enable us to deliver at short notice.

Our Patterns are of the following sizes, and are marked respectively thus:

A—	$\frac{1}{4}$	inch opening and	$\frac{3}{8}$	inch iron, for burning Screenings.
B—	$\frac{3}{8}$	“ “ “ “	“ “	for Pea Coal.
C—	$\frac{1}{2}$	“ “ “ “	“ “	for Large Nut Coal.
D—	$\frac{3}{4}$	“ “ “ “	“ “	for Stove Coal.
E—	$\frac{3}{4}$	“ “ “ “	“ “	for Grate Size.
F—	$\frac{7}{8}$	“ “ “ “	“ “	for Steamers.
G—	1	“ “ “ “	“ “	for Ocean Steamer Lump.

### PLEASE TAKE NOTICE.

Those who may favor us with orders for these Grates will please specify No. 1, or "Sectional Grate," and the letter corresponding with the opening, or size of coal used; giving, if possible, a diagram of Furnace. State if the Fire-Box be of brick or iron. Give the exact dimensions of depth and width in the clear. If of iron, measure width from the rivet heads in the corner laps. We make the allowance or margin for expansion.

No. 2.

Average weight of this Grate, 47 lbs. to the square foot.

Is our long bar section with the diagonal openings. The bars are same length as ordinary Grate Bars, and designed for the use of both hard and soft coal, where it is necessary to break up the coke or clobber by raking underneath. These bars have great air opening, and more strength and durability, with less weight, than any other long grate bar now in use.

PROVIDENCE, April 1st, 1870.

This is to certify that I have used W. W. Tupper & Co's Grate Bars for the last six years, and find them to be in every respect superior to any Bar I have ever used in making steam easier and saving all of 15 per cent. of fuel.

EUGENE CAHILL,  
Engineer for Gorham Manufacturing Co.

PEPPERILL MILLS, Biddeford Me., }  
June 16th, 1868. }

W. W. TUPPER & Co.:

Gents,—Your Patent Grate Bars have been in use in these Mills for about two years, and have thus far given the best satisfaction. On referring to our account of coal used during this period, I find that we have not only saved a large per centage of coal, but have driven our steam from five boilers where we were formerly using six—the Mills also being kept at a warmer temperature than formerly.

Truly yours,

F. HAINES, Agent.

## The Providence Weekly Gazette.

WHEN we first conceived the idea of starting the present *Weekly Gazette*, we based it upon our experience in publishing the *Weekly Times*. The *Times* had paid us well, and the *Gazette*, thus far, has netted us a better profit than ever the *Times* did, and we have enlarged it to the size of the *Daily Journal*.

Three Thousand Copies are printed weekly; two thousand of which are circulated in the wards of this city, which supplies one quarter of the families in all the different wards, weekly, every week supplying new families in those wards, thereby taking four weeks to supply the entire city. The balance, one thousand, goes into country villages through the State; never two weeks in succession in the same village. We think this is the whole secret of success. The *Gazette* has now been published over Four Years, and is now in so prosperous a condition that its permanency has become a "fixed fact." We desire to give the readers of our paper a full reading page, but as yet have been unable to do so, but will as soon as our narrow limits will admit.

Thankful for the very liberal patronage already received, we invite the citizens of the State generally, to call and see
