PART I

Introduction

During 1959 the construction of a substantial part of the Huntington-Niantic extension of the Roberts Expressway was completed and opened to traffic. Also opened to traffic was the East Providence Expressway. These two new facilities are important segments of the freeway system of Metropolitan Providence. In addition, a substantial number of the buildings have been removed from the right-of-way of the North-South Freeway, Stage 2 (Hayward Park to Public Street), and the land has been condemned for the North-South Freeway, Stage 3 (Hayward Park to Aborn Street).

Included in reports made to the State of Rhode Island by two different consulting organizations were strong recommendations to expedite this type of freeway construction. In both reports the recommendation was made to complete the North-South Freeway from the Massachusetts-Rhode Island line through Pawtucket and Providence in the next five years. Both reports included many other major recommendations for new construction both in Providence and throughout the State. Other major recommendations in Providence included:

- a) A new Red Bridge and approaches
- b) Harris Avenue extension of the Roberts Expressway to Interstate 95 at Fershing Square
- c) Hartford Avenue extension of the Roberts Expressway to Johnston
- d) Louisquisset Pike connection to Interstate 95
- e) Huntington-Niantic Expressway extension from Reservoir Avenue to Interstate 95 and Elmwood Avenue.

From the relatively small mileage of expressway-type facilities that are already in service, it becomes quite apparent that several cause-and-effect conditions develop as a result of the construction of these new facilities which will require increased effort on the part of the Traffic

Engineering Department. Some examples of these cause-and effect-conditions are:

- a) Rapid changes in basic travel patterns will require extensive volume and travel-time studies in order to keep informed as to the changes that are taking place, and to be able to integrate the planning of the additional facilities.
- b) In some cases the construction of a new major facility will require the elimination of certain important local streets. The service functions of such a particular street may or may not be adequately taken care of by the new facility. If it is not adequately cared for, additional local improvements will have to be planned and constructed to serve the local street system.
- c) During the construction period of any of these major projects, the maintenance of a safe and efficient traffic flow is essential. It becomes the duty of the Traffic Engineering Department to provide labor and material for some of the special operational manipulations that cannot be foreseen and thereby included in the construction contract.
- d) The creation of these new facilities requires the modification of existing regulations on many local streets outside of the actual construction area. The department must plan for and execute the required field work.
- e) After the construction of the new facilities is finished, each facility must be maintained in the best possible manner in order to protect the capital investment, insure the best possible operating conditions.

TRAFFIC ENGINEERING DEPARTMENT ORGANIZATION

General Organization

The Traffic Engineering Department was authorized by City Council Ordinance in October, 1948, and the Department was activated on March 1, 1949 with the appointment of a Traffic Engineer, the reassignment of other maintenance personnel, and the use of a separate budget. The Traffic Engineer is appointed by the Mayor with confirmation of the City Council. To assist in forming advisory policy, the Ordinance established the Traffic Engineering Advisory Committee composed of the members of the official City family. The members include:

Mayor Walter H. Reynolds, Chairman
John J. Cashman, Finance Director
William E. McCabe, City Solicitor
John A. Murphy, Chief of Police
Charles F. McElroy, Director of Public Works
Ralph Matera, Chairman of the City Council's Committee
on Public Works
Frank H. Malley, Director, City Plan Commission
Peter J. Hicks, Jr., Public Service Engineer

The Engineers comprising the staff of the department during 1959 were as follows:

Roger T. Chandler, Traffic Engineer
John I. Logan, Assistant Traffic Engineer
Clinton F. Adams, in charge of the Planning and Design Division
(on leave to the Bureau of Highway Traffic
at Yale University)
Philip Lenz, in charge of the Maintenance and Operations
Division

1959 ACTIVITIES

1. Traffic Construction Program

The following list includes the major construction projects in which the Traffic Engineering Department became involved, either in establishing detours, or providing other planning, operational or construction services.

Huntington-Niantic Expressway Construction started Opened for traffic, except for the Reservoir Avenue Bridge and the Cranston Street on-ramp	July 15, 1958 December 19, 1959

2. Freeway Progress

During 1959 continued progress was made toward an integrated freeway network in Providence. As already indicated, specific recommendations have been made to expedite the construction of the entire North-South Freeway and other major projects. During the decade ending in 1959 we have seen the introduction of the limited-access type facility in Providence. During these ten years considerable progress has been made with the completion of:

- 1) The Roberts Expressway in Olneyville
- 2) The Louisquisset Pike from the City Line to Admiral Street
- 3) The North-South Freeway, Stage I from Cohan Boulevard to Hayward Park
- 4) The Huntington-Niantic extension of the Roberts Expressway from Olneyville to Reservoir Avenue

This department will continue to work closely with the Rhode Island Department of Public Works and their consultants in order to keep the planning of future sections continually progressing.

3. Sign, Signal, and Painting Maintenance

Traffic sign, signal, and pavement markings continue to be the major function of the Maintenance Division.

a. Traffic Signs

The duties of the sign maintenance crews include the installing of new signs together with maintaining the existing signing. Maintaining of the existing signing includes periodic sign - post painting and replacement of faded or illegible signs. In addition, the sign crews are responsible for the installation and maintenance of parking meter posts as well as the pedestrian posts and barriers. They also assist in the problem of removal of snow from the municipal parking lot.

The following figures show a comparison by years of the department's traffic signing activities:

<u>Sign Installation and Maintenance</u>	<u>1959</u>	<u>1958</u>	<u>1957</u>

TOTAL	5304	5716	5914

b. Traffic Signals

The following is a three year summary of the number of intersections in Providence that are controlled by traffic signals.

<u>Intersections Controlled By</u>	<u>1959</u>	<u>1958</u>	<u>1957</u>
Vehicle-actuated equipment (Vehicle control only)	41	43	44
Vehicle-actuated equipment (Vehicle and pedestrian control)	13	12	12
Fixed-time equipment (Vehicle control only)	87	86	81
Fixed-time equipment (Vehicle and pedestrian control)	21	21	21
Pedestrian actuation only	4	2	2
	166	164	160

The amount of work required to keep this traffic signal system in good working order is continually increasing due to both the increase in number of signalized intersections and the aging of the equipment. Since these signals are in operation 24 hours a day, one "trouble" man is on a stand-by basis and receives trouble calls during all non-working hours. The number of trouble calls received during the last three years is shown in the following tabulation:

<u>On Hour Calls</u>	<u>1959</u>	<u>1958</u>	<u>1957</u>
Mechanical or electrical	231	187	197
Lamps burned out	55	219	54
Damage to equipment	115	74	62
No trouble found	97	79	60
TOTAL	<u>498</u>	<u>559</u>	<u>373</u>

<u>Off Hour Calls</u>			
Mechanical or electrical	175	151	133
Lamps burned out	31	176	36
Damage to equipment	30	60	42
No trouble found	57	65	41
Miscellaneous(bent posts, standards, signs)	75	-	-
TOTAL	<u>368</u>	<u>452</u>	<u>252</u>

Emergency trouble duty is one phase of the duties of the signal maintenance crews. A continued preventitive maintenance program including cleaning the signal lenses and reflectors, painting the exposed equipment, group replacement of bulbs, and periodic testing of the vehicle detectors. In addition, the controllers are brought into the shop regularly for overhaul thus reducing the possibility of costly breakdown. The signal maintenance crew is also responsible for limited new construction which includes the setting of steel signal poles and precast concrete handholes, installing and wiring the detectors and all associated equipment.

c. Painting

The marking of the streets in Providence continues as a major function of this department. The following is a three year summary of our painting program:

	<u>1959</u>	<u>1958</u>	<u>1957</u>
Gallons of reflectorized paint used	4335	4814	4575
Miles of streets marked	107	105	98
Number of streets marked	140	138	137
Number of intersections marked with crosswalks	711	699	675

Street marking is scheduled for warm weather periods, because of the characteristics of the paint machines and marking materials. Because of the heavy volume of traffic on the arterials during the daytime, these streets are painted during the nighttime, leaving the lighter volume streets for the normal workday period.

During the non-painting season, the members of the paint crews prepare traffic sign blanks for future processing, and also assist the electrical and sign crews whenever possible.

4. Complaints and Requests

Complaints and requests originating from individual citizens constitute a major part of the field investigation work of the department. Upon receipt of either a complaint or request for some traffic control measure, a thorough field investigation is made, the results reviewed, and action taken, where necessary.

The following indicates the general classification of complaints and requests received:

	<u>1959</u>	<u>1958</u>	<u>1957</u>	<u>1956</u>

One-way streets	2	7	12	7
Miscellaneous	53	60	67	64
	<u>293</u>	<u>358</u>	<u>414</u>	<u>418</u>

The disposition of these investigations is indicated in the following tabulation:

	<u>1959</u>	<u>1958</u>	<u>1957</u>	<u>1956</u>
Requests granted	47%	56%	50%	40%

5. Changes in Traffic Regulations

For 1959 a total of 265 traffic regulation changes were made on the City streets, as shown in the list on the following page. These changes were brought about by changes in the traffic flow, including temporary regulations during the construction periods, as well as regulations established as a result of complaints and requests.

6. Parking Meters

Parking meter maintenance consists of meter winding, trouble calls, post straightening, and preventive maintenance. Trouble calls are usually the result of mechanism failures or, freeze-ups during the winter. These calls are serviced immediately, and repairs are completed in the field, if possible. The preventive maintenance program is designed to reduce these trouble calls to a minimum by periodic cleaning and overhaul of each meter mechanism.

During 1959 four metered spaces were lost due to changes in parking regulations, seven spaces lost because of new driveways and the installation of some plug-type fire hydrants.

The following is a summary of yearly parking meter revenue:

7. Traffic Accident Analysis

In order to establish a priority system for engineering studies of locations having unusually high accident frequencies, the Traffic Engineering Department assembles and analyzes all traffic accidents reported in the City. The sources of this accident material are the

Providence Police Department, the Rhode Island Department of Motor Vehicles, the United Transit Company, and the Yellow Cab Company.

The action taken following the analysis of any particular area might take the form of additional traffic restrictions, added police enforcement of existing regulations, redesign of an intersection, or traffic signal control.

A comparison of the 1958 and 1959 totals of reported accidents shows a decrease of 197 in all accidents; an increase of 108 in the number of personal injury accidents; and a total of 16 fatalities during 1959 as compared with 15 for the previous 12-month period.
