**CLASS TITLE:** Associate Engineer III

**CLASS DEFINITION:** Difficult engineering work at the professional level involving extensive responsibility for specific engineering activities of the City; and related work as required.

**DISTINGUISHING FEATURES OF WORK:** Work involves responsibility for directing engineers and other employees and personally participating in the preparation of a variety of difficult civil engineering projects. Assignments are usually outlined and work affords a wide opportunity for the exercise of individual initiative and judgment in assigning work to others, making technical engineering decisions and carrying projects to completion. Work is generally reviewed only for accomplishment and adherence to departmental standards and policies; technical supervision is available and may be exercised while work is in progress.

**ILLUSTRATIVE EXAMPLES OF WORK:** Directs others and participates in the development and execution of engineering designs, computations, drawings, specifications, estimates of quantities and costs and inspection of construction, reconstruction, repairs, maintenance and remodeling of various sewage disposal and incinerator structures and equipment, public buildings, bridges, highways, and storm and sanitary sewers and miscellaneous public works structures and equipment. Directs and supervises the activities of operating crews of city-owned bridges and supervises the repairs and maintenance of all city-owned bridges. Constructs and directs hydraulic computations and studies relative to rainfall and runoff. Directs others and participates in the development and execution of designs, computations, specifications, quantity and cost estimates, and inspection of construction, reconstruction, maintenance and remodeling of various water works operations, extensions and improvements, structures and equipment. Makes investigation and reports and prepares complete plans for reconstruction, construction, and remodeling of buildings, and similar structures, and for heating systems. Directs and supervises engineers and other employees on various engineering projects. Keeps engineering and other records and makes reports as required.

**DESIRABLE KNOWLEDGES, SKILLS AND ABILITIES:** Thorough knowledge of principles and practices of civil engineering as applied to public works construction, including a working knowledge of hydraulic and mechanical engineering. Thorough knowledge of the materials, methods and techniques of public works construction. Advanced skill in planning and conducting

-2-

engineering research work and in making complete engineering plans and specifications. Ability to plan and supervise the work of other engineers, and engineering aides. Ability to procure cooperative working relationships with subordinates and others, including the public.

**QUALIFICATIONS REQUIRED FOR APPOINTMENT:** Graduation from a recognised college or university with major courses in civil engineering and considerable experience in the practice of public works engineering, including supervision over the work of other engineers. Certification as a professional engineer.

ENGINEERING TRAINEE

**CLASS TITLE:** Engineering Trainee

**CLASS DEFINITION:** Practical engineering work approaching the professional level in both field and office operations, with minor assignments in design, planning, development and maintenance of water works or public works facilities or other specific engineering activities of the City.

**DISTINGUISHING FEATURES OF WORK:** Work involves the practical application of engineering knowledge and training to minor projects of design, layout, and development of water works and public works facilities. Duties are performed under the guidance of superiors, and assignments are received in general outline and detail. The incumbent shall exercise some individual initiative and judgment in completing assignments, and shall participate with and assist superiors in joint assignments of a varied and general engineering nature.

**EXAMPLES OF WORK:** (Note: The following examples of work are illustrative only and are not intended to be all inclusive or exclusive of the duties to be performed.) Prepare drawings and layouts for extensions, rebuilding, and constructing new water works or public works facilities. Make computations on cost data, construction estimates, and design features on a moderate scale. Assist chief of party in linear topographic and hydrographic field surveys. Serve as a field inspector on various construction projects and make progress reports and keep accurate records of field activities for permanent reference. Incumbent is required to observe operations, and fully acquaint himself with departmental procedures, methods, and new and improved techniques applied in the field of water works and public works operations.

**NECESSARY KNOWLEDGES, SKILLS AND ABILITIES:** A complete training in the theoretical principles of civil and/or mechanical engineering, with a good knowledge of hydraulics and the ability and personal initiative to apply these principles to the practical phase of water works and public works engineering activities.

QUALIFYING: recognized college or university with major courses in civil or mechanical engineering.

USUAL LEVEL OF PROMOTION:

To: Associate Engineer I

7/58

FAMILY AND BUSINESS RELOCATION ADMINISTRATOR

**CLASS DEFINITION:** Responsible supervisory work connected with the relocating of families and businesses displaced as a result of any public works or redevelopment project undertaken in the city.

**DISTINGUISHING FEATURES OF WORK:** Work involves responsibility for ascertaining lists of vacant rentals which can be made available to families and businesses displaced as a result of condemnation or direct purchase for public works or redevelopment projects undertaken in the city. Supervision is exercised over a staff of social case workers, special assistants, clerks, stenographers or other employees as may be required from time to time.

**ILLUSTRATIVE EXAMPLES OF WORK:** Conducts interviews either in person or through social case workers or other assistants designated by him with families or businessmen who may be displaced by any public works or redevelopment project and refers them to new locations.

**DESIRABLE KNOWLEDGES, SKILLS AND ABILITIES:** Considerable administrative ability and public relations skill. Ability to plan and assign work so that dead lines can be met in relocating families and businesses effectively so that undue delay is not encountered in awarding demolition and construction projects.

**QUALIFICATIONS REQUIRED FOR APPOINTMENT:** Graduation from a recognized college or university or several years of administrative experience preferably in housing or allied fields.

DEPUTY CHIEF ENGINEER (Water)

CLASS TITLE: Deputy Chief Engineer (Water)

CLASS DEFINITION: Responsible administrative work of a professional engineering nature in actively directing and supervising the operation, planning, maintenance, improvement, expansion and extension of water works activities of supply, collection, treatment, distribution, metering, billing, and related work of the Providence Water System.

DISTINGUISHING FEATURES of WORK: Work involves the administrative responsibility for actively directing and supervising the various activities of the Water Supply Board under the direction of the Chief Engineer. Supervision is exercised through subordinates over the department's personnel. Policy directions and general assignments are received from the Chief Engineer, and the incumbent shall be responsible for detailed operation and enforcement of policies set down. Work is subject to review for thoroughness and overall accomplishment.

EXAMPLES OF WORK: Under the general direction of the Chief Engineer, the following described work, not intended to be all inclusive or exclusive, shall be performed. Administer and direct the operation and maintenance of the Water Purification Works, Hydro-Electric Station, Pumping Stations, Distribution System, Metering and Billing and other related departmental functions. Supervise and schedule the work of maintenance and upkeep of reservoirs, dams, spillways, tunnels, aqueducts, conduits, gate houses, roads, bridges, marginal reforestation and watershed protection, and other properties or related structures. Check and supervise extensions and reinforcements of transmission and distribution mains, hydrant and valve installations and replacements, and related or appurtenant work. Direct all construction, improvements, modifications and additions to water works facilities. Schedule and direct tests on efficiency of mechanical equipment, distribution flow pressure analyses and requirements, fire flow tests, etc. Conduct or participate in hydrological studies, compilation and evaluation of rainfall, runoff, storage, draft and yield data, efficiency and effectiveness of water treatment methods with respect to cost relationship. Make, participate or supervise engineering design and studies, surveys, construction plans and specifications, materials selection, rate studies, appraisals, cost data, and efficiency of operations. Initiate long range

(over)

planning for projected loads on supply, treatment, distribution, pumping and storage facilities. Prepare specific and detailed reports for the Chief Engineer's consideration in matters relating to improved operating methods, materials selection, major improvements, cost and efficiency data, and similar matters. Act for the Chief Engineer in conditions of emergency or during his absence.

**NECESSARY KNOWLEDGES, SKILLS AND ABILITIES:** A full and comprehensive knowledge of the principles and practices of civil, mechanical and electrical engineering, with special reference to the field of hydraulics and the techniques of water collection, storage, water treatment and distribution. Also a working knowledge of hydroelectric plant operation and station management, complete familiarity with modern construction methods and management, mechanical equipment and operating procedures, ability to administer departmental policies, and to maintain cooperative relationship with superiors, subordinate employees, professional associates, and the general public.

**QUALIFICATIONS REQUIRED FOR EMPLOYMENT:** Certification as a registered professional engineer. Graduation from a recognised college or university with major courses in civil or mechanical engineering and at least five (5) years experience in a satisfactory field of civil or mechanical engineering, and/or not less than ten(10) years experience in the water works field in a demonstrated successful capacity of administrative engineering work as described.

ASSOCIATE ENGINEER II

**CLASS TITLE:** Associate Engineer II

**CLASS DEFINITION:** Advanced engineering work at the professional level performed in office or field operations connected with planning, design layout, and supervision of construction of various water works or public works structures or other specific engineering activities of the City.

**DISTINGUISHING FEATURES OF WORK:** Work involves responsibility for the application of professional engineering knowledge, judgment and skill in completing of detailed design and planning of assignments received from superiors. Complex or intricate technical problems are resolved by superiors, but the incumbent shall be capable of following through to completion after general guidance, and departmental or policy decisions by others. Supervision over their work, and general guidance of subordinates is required, and work is reviewed for overall accomplishment, accuracy and thoroughness.

**ILLUSTRATIVE EXAMPLES OF WORK:** (Note: The following examples of work are only illustrative of the kind and scope of work to be performed by employees of this class, and are not intended to be all inclusive or exclusive.) Actively prepare detailed computations, layouts, drawings, design features, cost estimates, specifications and other data relating to construction documents for various water works or public works facilities. Make and prepare hydraulic studies in graphical analysis and tabular form for presentation to superiors. Act as chief of party in the performance of linear, hydrographic and topographic field surveys. Supervise and inspect the various phases of water works and public works construction projects. Participate in and assist others in the performance of flow analysis surveys; duty, performance, and efficiency tests on-mechanical equipment and related or similar activities. Prepare written reports on conclusions and results of surveys, studies, tests, etc., and exercise direct supervision and guidance over subordinate personnel.

**NECESSARY KNOWLEDGES, SKILLS AND ABILITIES:** A theoretical and practical knowledge of the principles and procedures of civil and mechanical engineering, with a good knowledge of hydraulics. A broad working knowledge or experience gained in the general engineering principles, procedures, methods and materials relating to water works and public works design, construction, operation and maintenance. Ability to evaluate, study, and apply modern engineering practices and new techniques to proper fields of operation. The incumbent shall possess a
