OF NEW YORK.

The new policy of this Company, issued Sept. 1, 1886, and now in force, is a marvel of brevity and simplicity. It does away with all restrictions on Residence, Occupation and Travel.

After being in force for three years, it is non-forfeitable. It is practically incontestable, and provides a certain legacy, instead of a possible lawsuit. In fact it amounts to this: If the insured pays his Premium while he lives, the company will pay the policy when he dies.

THE

Northwestern Mutual Life Ins. Co.

OF MILWAUKEE, WIS.,

In Twenty-Eight Years has Paid on Every Contract Terminated by Death or Maturity, More Than Any Other Company in the Country on Similar Policies.

From 1858, to December 31, 1886, it has

PAID POLICY HOLDERS	$39,186,836
SOLID ASSETS ON HAND	$26,669,878
AMOUNTING TO	$65,856,714
TOTAL PREMIUMS RECEIVED ARE BUT	$56,839,455
EXCESS	$9,017,259

Showing that the amount on hand, together with the amount paid Policy Holders, exceeds the entire Premium Receipts by

Over Nine Millions of Dollars in Twenty-Eight Years:

A result accomplished by no other company of its size or age in the country; nor indeed has its equal been realized upon the same ratio by any other company, regardless of its age or size, ample proof of which will be furnished on application.

The Bulk of the Assets of the Northwestern are in MORTGAGES, NOT AFFECTED BY THE FLUCTUATIONS OF THE STOCK MARKET.

The Northwestern does no new business in the Gulf States or Foreign Countries, resulting in the Lowest Mortality of any Mutual Company for many years. To illustrate: The ratio of death claims to mean amount insured for the last three years have been as follows, as per N. Y. Report, 1887:

1884	0.94
1885	0.96
1886	0.82

Which means that the death losses of the Northwestern during these three years were respectively $9.40, $9.60 and $8.20, against an average of $13.70, $14.50 and $13.80 during the respective years, of all other companies doing business in New York.

The Northwestern's rate of interest has exceeded that of any similar institution during its entire history. The judgment in selection of risks has kept its mortality far below the average of the fifteen largest institutions in the country during the last ten years. It has returned larger dividends than any other company, **and published Tables of the same regularly for the last sixteen years,** which no other company has done. It is carrying its risks for less money than any other company in the country. On this statement a comparison of the cost of similar policies is hereby challenged.

THOMAS EVANS,
STEAM ENGINEER.

FRONT.

Examinations and Tests of steam plants for securing economy of fuel. Steam Engines Indicated and Power carefully measured.

Investigations made on the performance of Steam Engines and Boilers under all working conditions.

Thomas Evans' Patent Steam Damper Regulator and Economiser.

Also, Patent Grate Bar.

TO STEAM USERS:

One of the chief features of this grate bar is *"A Uniform Air Space,"* free from sharp angles and curves, the air flowing through this bar meets with the least possible resistance, enabling a large amount of air to pass through with minimum amount of draught. The very large amount of air necessary to form a perfect combustion under ordinary conditions in burning coal demands a carefully designed grate bar, one that will allow free access of air or oxygen to the incandescent fuel and at the same time allow of the refuse ashes to fall through freely. This bar contains from 46 to 65 per cent. air space, according to nature of fuel used. To all parties using grate bars it is worth their serious consideration. Yours truly,

THOMAS EVANS, Steam Engineer.

Nothing Succeeds like Success. Dr. Lewis is always Successful.

THE GLORY OF A MAN IS IN HIS STRENGTH!

NERVE OR PHYSICAL FORCE WHEN LOST QUICKLY REGAINED BY CONSULTING

Dr. C. J. LEWIS,

WHO after intense study and deep research, has lately discovered a new, extraordinary, quick, certain and inexpensive cure for diseases incident to deranged functions of the nervous and generative system. THIS NEW AND MARVELLOUS MEDICAL TREATMENT has cured the most desperate forms of nervous disorder in both young and old. To debilitated youth it bestows the vigor of manhood and in advanced age it establishes the vigor of youth without the possibility of failure. Patients whose cases have been neglected, badly treated or pronounced incurable are particularly invited to visit Dr. Lewis. A written guarantee of cure given to all cases arranged and undertaken. In practice upwards of thirty years.

☞Dr. Lewis is frequently consulted by many who have been completely discouraged of ever being cured, after having experimented with various advertised nostrums, which invariably do more harm than good, as every phase of disease demands different and special treatment. To those who may have been disappointed, Dr. Lewis would say consult him and he will restore the disappointed one to all the duties of life, whether they be physical or mental, pertaining to married life or single blessedness.

Consultation, Medicines, etc., $5.00; Working Classes, $2.50.

DR. LEWIS is permanently located at

129 Friendship Street,

One door from Richmond street (off Broad street), Providence, R. I. **Office Hours, all the year round from 9 to 2, and 5 to 9; Sundays, 10 to 2, not later.**

Female Complaints Skillfully Treated.

FOURTH EDITION

Medical Minutes.

With additional colored illustrations and a PORTRAIT OF THE AUTHOR. An exceptional treatise on the treatment and speedy cure of above subjects, sexual diseases, etc.,

SAVE WATER RATES!

—AND PROCURE BETTER WATER BY—

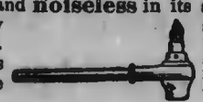
Artesian AND Driven Wells

Thousands of these wells are in use for supplying cities, towns and manufactories to save water rates. Gas works, breweries, tanneries, creameries and dairies, where cooler water is needed. When made properly they last a great many years. Any size pipe driven, from 1½ inch to 8 inches in diameter. The larger size sunk by steam power through earth or rock.

Sand and Vacuum Chamber.

It is a singular but **positive** fact, that when this Chamber is used, no sand will arise from the bottom of the well, unless the sand is fine—like quicksand; in that case a large Sand Chamber will stop it. Should the Chamber not be large enough, and any sand should rise, the plug in the bottom can be removed, and the sand in the Chamber taken out. These Chambers are warranted not to collapse or leak; will stop sand, or money refunded.

Advantages of this System.



1. It puts the consumer in direct communication with a pure fountain of water within the earth, and enables him to select such a quality as is most desirable.
2. It can penetrate the earth beneath salt water bays or rivers, till it reaches and supplies fresh water, as successfully as if there were no salt water on the surface.
3. All surface drainage is excluded, and it protects the water from all foreign substances and impurities. It may be put down in the immediate vicinity of stables, cattle yards, cesspools, etc., and be beyond the possibilty of contamination from them.
4. It can be put down in house, store, shop, mill or barn, in cellar or vault, wherever wanted, without injuring or disturbing the buildings.
5. It is practically inexhaustible and cannot, like a dug well be pumped dry, but will supply the same amount of water continuously, as has been thoroughly demonstrated.
6. For supplying towns and villages, for fire purposes, being inexhaustible, it supplies an urgent want heretofore unattainable, except at a large expense. Large numbers are in use for this purpose.
7. The driven well is invaluable, as a promoter of health, by furnishing water at all times sweet, cool and pure—beyond the reach of surface drainage or contamination by accident, or from insects, reptiles, vermin or fungi, to which dug wells are always liable, and to which cause a large proportion of fevers and other diseases owe their origin, especially in low grounds and in crowded towns and villages, where open or dug wells are depended upon.

☞ Parties are saving by the use of these wells from $50.00 to $10,000 per year for manufacturing purposes.

All Orders promptly attended to. B. F. SMITH, 266 Washington St., Boston, Mass.

Also, manufacturer and proprietor of the **ANTI-RATCHET FRICTION DRILL. No lost motion and noiseless** in its action. The merits of this drill are such, as to make it particularly advantageous to machinists, and especially so to Boiler Makers. In all Ratchet Drills, great annoyance and inconvenience arises in contracted places, where but little movement can be given to the handle, and none whatever to the Drill.

With this Drill ALL Motion given to the handle is imparted in revolving the Drill.

Note.
Total area of Land set off for Union Station & freight yards between West Exchange St & the river = 76.31 Acres
Total area of Land North of the river set off for Car Houses & Repair Shops = 29.91 / 106.72 Acres
From forty to fifty acres of land covered with water can be added to the above amount if needed.

Facts well to Remember.
Filling the Cove Basin will not abate the sewer nuisance, but intensify it. It can be removed only by removing the cause! Filling the Cove Basin would also in freshets raise the water some 2ft higher over all the Streets & fill the cellars.
Placing the Union Passenger Station as here represented removes the objectionable & costly elevated tracks & underground crossings, and provides ample freight facilities to all the R.R. Cos at a minimum cost for at least fifty years to come.

Note. The divisions as here represented are likewise arbitrary & will have to be adjusted to the necessity of each road.

Note. The above Plan has been arranged in the interest of no party or corporation but with special reference to what would be for the best interest of all concerned at a minimum cost, not only to the City but also to the railroads.
It will be seen that most ample and the very best facilities for handling & delivery of freight, can be secured in the heart of the City without infringing unwarrantably upon either private or public property.

PREFACE.

THE PROVIDENCE DIRECTORY AND RHODE ISLAND BUSINESS DIRECTORY for the year commenc July 1, 1887, the 47:h number in the series, is presented to the public with all the revision that a comp and thorough canvass of the City and State, and a careful compilation, could develope and set forth.

The evidences of this revision are found upon every page, but a reference to the statement of char at the foot of this page will perhaps give greater definiteness to the fact, and point out more clearly alterations that have been made upon the record of the Directory of 1886. The figures given are the re of a careful comparison of this Directory with the one immediately preceeding it, and are therefore wh reliable.

From this comparison we also gather the more specific facts, that during the twelve months betw the canvasses of these two Directories, 12,954 individuals whose names appear in this book changed location of their residences, 3,278 their business location. 2,737 the nature of their business, and in 297 f changes have been made, either in their names or membership.

The City's rapid growth in population is very clearly indicated by the unusually large increase i number of names in the GENERAL DIRECTORY, and the CITY AND STATE BUSINESS DIRECTORIES give tive evidences of the enterprise of our citizens, and the advancement of the manufacturing and comme interests of Providence and Rhode Island.

The following is a list of citizens whose names appeared in the first Directory of Providence, lished in 1824, and are recorded in the Directory of 1887. The year of birth is also given:—

Philip W. Martin, 1795; Thomas Harkness, 1799; Jonathan G. Draper, 1801; James C. Bucklin, James H. Read, 1801; David W. Pettey, 1801; R. H. N. Bates, 1801; Amasa Waterman, 1801; Ed Congdon, 1802; Thomas R. Briggs, 1807; John S. Harris, 1809; Jeremiah S. Barrett, 1810.

To our patrons, and to all who, by their readiness to give information have co-operated with u give thanks.
