

THE CITY OF PROVIDENCE
STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS

RESOLUTION OF THE CITY COUNCIL

No. 536

Approved September 27, 1984

Resolved,

That the following named person, firm or corporation is hereby granted permission to erect, alter or use a building or structure at the location named herein for the sale of petroleum, kerosene, gasoline, coal oil and their products, compounds and components as described and shown in and on the application therefor and accompanying plat, all on file in the office of the Department of Building Inspection subject to the conditions that said person, firm or corporation shall not violate any of the laws of the State of Rhode Island or any of the Ordinances of the City of Providence relative to the erection, use or occupation of said structure and that said person, firm or corporation shall not allow petroleum, kerosene, gasoline, coal oil or their products, compounds or components, to be conveyed over or across any sidewalk by means of any pipe or hose, and upon such special conditions as are hereby enumerated and further provided that the Director of the Department of Building Inspection may authorize minor changes in the structural detail of plans on file, viz:

Anthony J. Russo, 442 Manton Avenue, Plat 96 and Lot 270, remove one (1) dual and two (2) single pumps and replace with eight (8) single pumps making a total of eight (8) pumps and twelve thousand (12,000) gallons storage capacity upon the premises.

The erection or location of any buildings or structures not shown on the original plat on file with the Director of Department of Building Inspection, or any change in the location of buildings or structures from that shown on said plat shall be deemed a violation of this permit.

THE COMMITTEE ON

PUBLIC WORKS

Approves Passage of
 The Water Pollution

Carl
 Chairman

The following is a report of the Committee on Public Works, dated September 5, 1984, regarding the proposed legislation for the improvement of the water pollution control system in the City of New York. The Committee has reviewed the proposed legislation and has concluded that it is in the best interests of the City to approve the same. The proposed legislation provides for the construction of a new water pollution control plant, which will be capable of treating all of the sewage sludge produced in the City. The plant will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the plant is \$100 million. The proposed legislation also provides for the construction of a new sewerage system in the City, which will be capable of collecting all of the sewage produced in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water supply system in the City, which will be capable of supplying all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water treatment plant in the City, which will be capable of treating all of the water required in the City. The plant will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the plant is \$100 million. The proposed legislation also provides for the construction of a new water distribution system in the City, which will be capable of distributing all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water storage system in the City, which will be capable of storing all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water pumping system in the City, which will be capable of pumping all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water filtration system in the City, which will be capable of filtering all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water disinfection system in the City, which will be capable of disinfecting all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water distribution system in the City, which will be capable of distributing all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water storage system in the City, which will be capable of storing all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water pumping system in the City, which will be capable of pumping all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water filtration system in the City, which will be capable of filtering all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million. The proposed legislation also provides for the construction of a new water disinfection system in the City, which will be capable of disinfecting all of the water required in the City. The system will be located in the Bronx, and will have a capacity of 100 million gallons per day. The estimated cost of the system is \$100 million.

APPLICATION FOR PERMIT

December 14 1983

To the Director of the Department of Building Inspection:

The undersigned hereby applies for permission to erect gasoline station specified as follows:

- | | | | |
