STATE LAWS

RELATING TO THE

CITY OF PROVIDENCE

CHAPTER 2514.

An Act Providing for Off-street Parking Facilities in Providence.

It is enacted by the General Assembly as follows:

SECTION 1. It is hereby found and declared that the lack of adequate off-street parking facilities in the city of Providence creates congestion, obstructs the free circulation of traffic, diminishes property values, and endangers the health, safety and general welfare of the public; that the provision of conveniently located off-street parking facilities attractive in cost and the simultaneous public control of curb parking are therefore necessary to alleviate such conditions; and that the establishment of public off-street automobile parking facilities and fostering the provision of commercial and special-purpose off-street automobile parking facilities are deemed to be a proper public or municipal purpose for which public moneys may be expended and for which the power of eminent domain may be employed.

SEC. 2. For the purpose of this act (1) public off-street parking facilities are defined as accommodations provided by public authority for the parking of automobiles off the street or highway, and open to public use, with or without charge. Provided, however, that within the central downtown area as defined by the traffic engineer in collaboration with the city plan

commission and described by regulation of the traffic engineer no such facility within three hundred (300) feet of any commercial off-street parking facility capable of accommodating thirty-five (35) or more cars shall be open to the public use without charge. Such facilities may be publicly owned and publicly operated, or they may be publicly owned and privately operated; (2) commercial off-street parking facilities are defined as accommodations provided by private enterprise for the parking of automobiles off the street or highway, open to public use for a fee; (3) special-purpose off-street parking facilities are defined as accommodations provided by public authorities, private groups, or individuals, for restricted use in connection with public improvements, particular businesses, theatres, hotels, and other private enterprises or combinations thereof, or as adjuncts to housing developments or private residences. Such facilities may or may not be cooperatively established and operated; (4) combined off-street parking facilities are defined as accommodations provided by joint action of public and private interests.

Parking facilities may consist of lots, garages, or other structures and accessories, they may be surface facilities or facilities above or under the ground.

SEC. 3. The city of Providence is hereby authorized to establish and administer public off-street parking facilities and to foster the provisions of commercial and special-purpose off-street parking facilities within the city of Providence.

SEC. 4. The city plan commission, in collaboration with the traffic engineer and the redevelopment agency, shall formulate for public presentation, a general plan of automobile parking facilities, as a guide for the future provision of parking facilities, properly intergrated with present and proposed traffic facilities and the Providence master plan, subject to alteration as necessary. The general plan of automobile parking facilities shall include recommended design and location of proposed parking facilities which may include improved or unimproved lots, single or multistoried garages, or other structures and accessories; and shall further include estimates of costs of the various projects

therein included, a construction program, and recommended methods of financing. Where the inclusion in any proposed structure of rental space for other than parking purposes is incidental and reasonably related to the public use of the parking facilities and will materially reduce net public expenditures for such parking facilities, such rental space may be included in the plan; *provided, however,* that the city of Providence shall not within or on any public off-street parking facilities sell or offer for sale any petroleum products, nor shall the lessee of any public off-street parking facility sell or offer for sale any petroleum products.

SEC. 5. For the purposes of this act the city of Providence is hereby authorized to acquire public or private, real or personal, property and property rights, above, at, or below the surface of the earth, necessary for off-street parking facilities, by purchase, condemnation, gift, contribution, lease, bequest, devise or grant in the same manner as said city is now or hereafter may be authorized by law to acquire such property or property rights in connection with highways or streets; provided, however, that no off-street parking facility may be acquired without the consent of the owner and occupant unless such facility is to be incorporated within an off-street parking facility with a capacity at least 100% greater than the facility to be taken. Where property so acquired by the city of Providence for off-street parking facilities is being operated at the time of acquisition as a commercial off-street parking facility then the operator of said commercial off-street parking facility shall be permitted to continue to operate said facility until alterations to the property shall have been commenced by the City of Providence.

SEC. 6. The city of Providence is hereby authorized to construct or cause to be constructed off-street parking facilities above, at or below the surface of the earth, including buildings, structures, equipment, entrances, exits, fencing, and all other accessories necessary or desirable for the safety and convenience of motorists using the facilities.

SEC. 7. The city of Providence is hereby authorized to maintain and operate public off-street parking facilities or to contract therefor, or lease the same by competitive bidding to any individual, firm or corporation, upon such terms and conditions as the public interest may warrant.

The city of Providence shall prescribe rules and regulations for the use of off-street-parking facilities provided wholly or in part by public authorities. Such rules and regulations shall be designed to effectuate the public purposes of these facilities.

The city of Providence shall fix the maximum and minimum rates for each such facility. Where such facility is leased, such rates shall be fixed prior to the issuance of any invitation for proposals for leasing of such off-street parking facilities and shall be included in any such proposal.

In fixing rates, due allowance shall be made for the desirability of creating a reasonable parking turnover in any facility located in a highly congested district, and consideration shall be given to any other factors affecting the usefulness of the facility for ameliorating parking and traffic difficulties.

The provision of this section and of section 6 of this act shall be carried out by such official, committee, board, commission or agency as the city of Providence may designate, or the city may enter into an agreement with the development agency for such purposes.

SEC. 8. The city of Providence is hereby authorized, subject to the requirements of state law and municipal ordinance, to finance the planning design, maintenance, and operation of off-street parking facilities by any one or any combination of the following methods: (a) general fund appropriation or (b) gift, contribution, bequest, devise or grant; and to finance the design, acquisition of property for, construction, alteration, or enlargement of off-street parking facilities by any one or any combination of the following methods: (a) general obligation bonds; (b) revenue bonds payable solely out of revenue from off-street parking facilities, issued upon conditions prescribed by the city

council; (c) general fund appropriation; (d) state and federal grants and aids; (e) gift, contribution, bequest, devise or grant.

When general obligation bonds are to be issued they shall be issued and sold at such times, in such amounts, with such maturities and other terms, and in such form as the city council shall determine. Irrespective of any limitation, by general or special law, as to the amount of such bonds which may be issued, the city of Providence may issue such bonds for the purposes defined by this section in excess of such limitation, in such amount as may be approved by the voters at any general or special election, and all bonds issued under this section shall be exempted from the operation of section 25 of chapter 329 of the general laws, 1938, as amended. The city shall annually appropriate a sum sufficient to pay the interest upon its general obligation bonds issued and outstanding under the authority of this section, and also to pay the principal of such bonds maturing in any such year, until said bonds are paid in full. This section shall constitute statutory approval for the incurring of debt for the purposes of this act wherever such approval is required by any general or special law.

SEC. 9. In each instance wherein the city council shall have before it for consideration a proposal to expend money for the purpose of establishing off-street parking facilities there shall be filed with the city council, signed by the mayor and the traffic engineer, a report of said proposed project including the necessary plans, profiles, specifications, and estimates of the cost, including the cost of and necessary property acquisition; an estimate of the income yield of the facility; a statement showing that the proposed facilities conform to the general plan developed under section 4; and such other pertinent information as will permit the city council to decide the necessity, extent, cost and income yield of the proposed facility.

SEC. 10. After the mayor and traffic engineer have filed such report, the city council shall by resolution determine the necessity of the proposed public off-street parking facilities and the extent of any expenditure by the city for the purpose of establishing such improvements.

SEC. 11. In accordance with the provisions and procedures prescribed by section 8, the city council shall provide for financing of the improvements.

SEC. 12. If any provision of this act or the application thereof to any person or circumstance shall be held invalid, such invalidity shall not affect the provisions or applications of this act which can be given effect without the invalid provision or application, and to this end the provision of the act are declared to be severable.

SEC. 13. This act shall take effect upon its passage and thereupon chapter 2307 of the public laws of 1949 and all other acts and parts of acts inconsistent herewith shall stand repealed.

CHAPTER 2545.

The proceeds arising from the sale of the bonds authorized by this act shall be delivered to the city treasurer, and such proceeds, except as hereinbefore provided in respect to the premiums arising from the sale thereof, shall be expended for the purpose of meeting the various forms of welfare and relief expenses.

SEC. 3. CHAPTER 2546.

An Act to Amend Chapter 489 of the Public Laws Passed at the January Session, A. D. 1923 Entitled "An Act to Provide for the Retirement of Employees of the City of Providence."

It is enacted by the General Assembly as follows:

SECTION 1. Subdivision (9) of section 1 of chapter 489 of the public laws, 1923, is hereby amended to read as follows:

(9) "Regular interest" shall mean interest at four per cent per annum, compounded annually *or interest at such lower rate or rates as may be set by the retirement board but not less than 3 per cent per annum.*

Section 2. Subdivision (11) of section 1 of said chapter 489 is hereby amended to read as follows:

(11) "Final compensation" shall mean the average annual compensation, pay or salary earnable by a member during *the ten successive years of his service* as an employee, *during which such average was highest.*

Section 3. The first paragraph of subdivision (1) of section 5 of said chapter 489 is hereby amended to read as follows:

(1) The *annuity* savings fund shall be a fund in which shall be accumulated contributions from the compensation of members to provide for their annuities and their withdrawal allowances. Upon the basis of such tables as the retirement board shall adopt and regular interest, the actuary of the retirement system shall determine for each member the proportion of compensation which, when deducted from each payment of his prospective earnable annual compensation prior to his eligibility for service retirement and accumulated at regular interest until his attainment of the minimum age of service retirement for his group, shall be computed to provide at that time an annuity equal to

five-eighths of one percentum of his final compensation for each year of service as a member. Such proportion of compensation shall be computed to remain constant. *As of the 1st day of April, 1951, the retirement board shall adopt for employees in class A rates of contribution which shall be similarly computed except that they shall be computed to provide at the minimum service retirement age an annuity of one one-hundred-fortieth of the final compensation for each year of service as a member. Such increased percentage contribution rates shall apply to all class A employees who become members after said date. Such increased contribution rates shall not apply to such employees who are members on the said date, but any such member may elect prior to April 1, 1951 to contribute at the increased rate applicable to his age attained on said date and thereafter deductions shall be made from his compensation at such increased rate. The retirement board shall also adopt as of said date for employees in class B a percentage contribution rate of five percentum, and thereafter deductions shall be made from the compensation of all members so classified at this rate, anything to the contrary in this chapter notwithstanding.*

Section 4. Paragraph (c) of subdivision (3) of section 5 of said chapter 489 is hereby amended to read as follows:

(c) Immediately succeeding the first valuation, the actuary engaged by the retirement board shall compute the rate percentum of the total compensation of all members during the preceding fiscal year which is equivalent to four percentum of the amount of the total pension liability on account of all members and beneficiaries not dischargeable by the aforesaid normal contribution made on account of such members during the remainder of their active service. The rate percentum originally so determined shall be known as the "deficiency contribution rate." *On the basis of the first actuarial valuation following the 1st day of April, 1951 the deficiency contribution rate shall be revised to provide for the liquidation of the deficiency then existing.*

Section 5. Paragraph (b) of subdivision (1) and subdivision (2) of section 9 of said chapter 489 are hereby amended to read as follows:

(b) Any member may retire upon his written application to the retirement board setting forth at what time not less than thirty nor more than ninety days subsequent to the execution and filing thereof, he desires to be retired, provided that the said member at the time so specified for his retirement shall have attained the minimum retirement age for his group and notwithstanding that, during such period of notification, he may have separated from service. The minimum ages for service retirement from the groups created by section 7 of this act, shall be as follows:

Allowance on service retirement.

(2) Upon retirement for service a member shall receive a retirement allowance which shall consist of:

(a) An annuity which shall be the actuarial equivalent of his accumulated contributions at the time of his retirement; and

(b) *If the member is a class A employee* a pension in addition to his annuity which shall be equal to *one one-hundred-fortieth* of his final compensation multiplied by the number of years of service since he last became a member; and if he has a prior service certificate in full force and effect, an additional pension which shall be equal to *one seventieth* of his final compensation multiplied by the number of years of prior service certified to him on his prior service certificate.

(c) *If the member is a class B employee a pension which when added to his annuity will give a total retirement allowance equal to one-sixtieth of his final compensation for each year of total service.*

Section 6. Paragraph (b) of subdivision (4) of section 9 of said chapter 489 is hereby amended to read as follows:

(b) A pension which together with his annuity shall be equal to nine-tenths of *one-seventieth* of his final compensation multiplied by the number of years of his total service; no member retiring with less than 15 years of total service shall receive a benefit less than he would have received had he had 15 years of total service, with the exception, however, that if a member did not enter the city service until after he had attained an age within fifteen years of the minimum service retirement age he shall not receive an allowance greater than ninety per cent. of the rate of allowance which he would have received had he remained in service until the minimum retirement age. *Notwithstanding the foregoing if a member in class A is in service on the 1st day of April, 1951 and does not elect to increase his contributions as provided under subdivision (1) of section 3,* his pension shall be reduced by the acturial equivalent of the amount by which his accumulated contributions would have been increased had he elected to pay said increased contributions.

Section 7. Subdivision (7) of section 9 of said chapter 489 is hereby amended to read as follows:

(7) Once each year the retirement board may, and upon his application shall, require any disability pensioner under the minimum age for service retirement to undergo a medical examination, said examination to be made at the place of residence of said pensioner, or other place mutually agreed upon, by a physician or physicians engaged by the retirement board. If said examination indicates that said pensioner is able to engage in a gainful occupation, his name shall be placed on such appropriate lists of candidates as are prepared for appointment to position in his department for which he is stated to be qualified, of a salary grade not exceeding that from which he was last retired. Should said beneficiary be engaged in a gainful occupation or should he be offered service as a result of the placing of his name on such list of candidates, the retirement board shall adjust and from time to time readjust the amount of his disability pension to an amount which shall not exceed the rate of pension upon which he was originally retired, and which, when added to the amount then earnable by him, shall not exceed the amount of the *salary or compensation which he currently would be receiving in the position from which he was last retired, if he had not been so retired provided, however, that if the position from which he was so retired has been abolished, the retirement board, upon the basis of salary or compensation currently paid to persons in similar or comparable positions, shall determine, for the purposes of this subdivision, the amount of salary or compensation he currently would be receiving.* Should any disability pensioners under the minimum age of retirement refuse to submit to one medical examination in any year by a physician or physicians designated by the retirement board his retirement allowance may be discontinued until his withdrawal of such refusal, and should his refusal continue for one year, all his rights in and to such pension may be revoked by the retirement board. A disability pensioner reinstated to active service shall be reinstated as a member and participate in the benefits of the retirement system, but upon subsequent service retirement, shall, in respect to service rendered prior to such disability retirement, be paid only ninety percentum of the regular service retirement benefit.

Section 8. Subdivision (9) of section 9 of said chapter 489 is hereby amended by adding a new paragraph to be known as paragraph (c) and to read as follows:

No. 163. Resolution Urging Federal Re-insurance of the Rhode Island Employment Security Fund.

(Approved February 6, 1950.)

Whereas, The crisis involving the Rhode Island Security Fund is due solely to this state's economic structure dependent, as it is, on light industry which being subject to seasonal variations in demand has caused Rhode Island to have a higher ratio of unemployment than most states, and

Whereas, The present severe drain on the Rhode Island Employment Security Fund will place this State in an unfavorable

competitive position with other states, not so severely affected and, in a national economy so closely integrated as ours, a single state cannot be expected to insure itself against economic trends originating beyond its borders resulting in unemployment within the State.

NOW, THEREFORE, BE IT RESOLVED, That the City Council of the City of Providence hereby petitions the United States Congress to assume a larger share of responsibility of the Employment Security Program by enacting legislation providing for the principle of re-insurance thereby strengthening the Employment Security Program by equalizing the employers' tax load; and

BE IT FURTHER RESOLVED, That this City Council in urging the enactment of the principle of re-insurance, pleads for uniform nation-wide minimum benefit standards providing more liberal benefits than now prevail in many states and that there be a greater coverage of workers, many of whom are now excluded from Employment Security Law benefits; and directs the City Clerk to transmit to the Rhode Island members of Congress a certified copy of this Resolution.

Whereas, There exists in the State of Rhode Island and, particularly, in the City of Providence a shortage of rental housing which continues to be acute, and

Whereas, This shortage of rental housing, in the absence of rent controls, would inevitably lead to immediate raising of rents to levels well above present prices, and

Whereas, Many thousands of families could not afford an increase in rent, and would be caused severe inconvenience and deprivation thereby, and

Whereas, The maintenance of a situation in which families are able to find decent housing at prices they can afford is a matter of fundamental public policy in the interests of the health, safety and well-being of the community,

Now, Therefore, Be It Resolved, That the City Council of the City of Providence, hereby petitions the Congress of the United States, its several members and the President of the United States to enact without delay such legislation as may be needed to continue Federal control of rents until such time as the current housing shortage may be eased, and

Be It Further Resolved, That this Resolution be spread upon the records of this City Council, and that copies thereof be sent to the President of the United States and to the Rhode

Island members of the United States Senate and House of Representatives.

MINUTE

Luigi Maiello was born in Naples, Italy on July 24, 1874, the son of Dr. Pasquale and Anna (Castiglioni) Maiello.

Following in the footsteps of many of his forebears he took up the study of medicine at the Royal University in Naples and Turin University where he was awarded his degree in 1899. He came to the United States and began the practice of medicine in the City of Providence in 1903 and continued to be active in his profession until a short time ago. His was a full lifetime devoted to the health of this community.

His interest in the arts is attested to by the choice collection of valuable paintings and statuary which he brought from Italy. Despite his busy professional life he found time to serve his neighbors and friends in important civic posts. He was elected to the Providence City Council from the 13th Ward in 1936 and he was chosen to represent the 4th Senatorial District of Providence in the State Legislature during the 1939-1940 session and again from 1941 to 1948. He was a presidential elector in 1932 and 1936, and a member of Providence Water Supply Board from 1941 to 1948. To each high office for which he was chosen, he brought a broad experience, a keen mind, a kindly manner and a will to serve.

An honorable physician and an exemplary public servant, Dr. Maiello was a credit to his profession and an outstanding citizen of this community. His legion of friends though grieved at his passing will cherish kindly memories of their happy association with him.

To his bereaved wife and family this City Council extends sincere condolences and profound regret in the hour of their great loss.

(Approved July 10, 1950.)

RESOLVED, That the following Minute on the life and character of the late Daniel E. Geary, who passed away June 28, 1950, be and the same is hereby adopted, ordered inscribed on the records of the City Council and a copy thereof transmitted to the family of the deceased.

MINUTE

Daniel Edward Geary was born in Providence March 19, 1886, a son of the late Patrick J. and Mary Geary. He attended local public schools and Brown University where he was graduated in 1906 with the degree of Bachelor of Arts. He received his Bachelor of Laws degree from Boston University in 1910, was admitted to the Bar of the State of Rhode Island the same year and in 1918 was admitted to practice before the Federal Courts.

Early in life he became interested in civic affairs and he maintained that enthusiasm throughout his entire life. He served in both branches of the State Legislature, and in the Common Council and the Board of Aldermen of the City of Providence. As President of the latter body he was, on numerous occasions, the Acting Mayor of this City. He headed the Legal Department from 1935 to 1939 and as City Solicitor handled the legal details of a broad highway condemnation program and other public work projects carried to completion during the pre-war years.

During his long legal practice, Mr. Geary became a widely known expert in land condemnation procedures. In 1941 he was named a Commissioner by the Federal District Court to act on the vast Federal land takings in connection with the naval establishment at Quonset Point. From 1942 to 1947 he was a special attorney with the Department of Justice, Public Lands Division. In 1949 he was named special legal counsel to the City of Providence on the Olneyville Expressway, the most extensive condemnation proceedings ever undertaken by the City. He was engaged on this work when he became ill. He served his City, State and Nation with honor and distinction; performing his duties in an able, conscientious and meticulous manner. His legion of friends and associates will long remember their happy association with him.

Mr. Geary was a trustee of St. Augustine's Church and a member of the Holy Name Society of that parish. He also held membership in the St. Vincent Assembly, Benevolent and Protective Order of Elks and the Knights of Columbus.

The members of this City Council, with a deep sense of sorrow at his death, hereby expresses grateful appreciation for the high type of civic service rendered to the people of this community and extends to Mrs. Geary and to the members of his family their sincere sympathy and condolences.

No. 620. Resolution Requesting His Honor, the Mayor, to Appoint a Committee to Be Known as the Civilian Defense Survey Committee.

(Approved August 11, 1950.)

Whereas, The stark reality of unsettled conditions abroad has already embroiled the armed forces of the United States in a state of actual war, and

Whereas, Experience of the past dictates the need for awareness and the taking of realistic measures for the assurance of self-preservation and freedom, and

Whereas, Effective preparation in each community is an absolute essential in assuring the maximum of protection possible for the citizens of the nation as a whole, and

Whereas, Mass protection requires extensive planning, together with the coordination of National, State, municipal and all civic agencies, to meet any emergency, and

Whereas, An immediate survey of the ability of the City of Providence to cope with such an emergency, followed by execution of such plans as may be necessary toward that end, including perhaps the appointment of a Civilian Defense Director, seems highly desirable at this time,

Now, Therefore, Be It Resolved, That His Honor, the Mayor, forthwith appoint a committee of nine (9) citizens of the City of Providence to act as the Civilian Defense Survey Committee, whose duty it will be to complete a survey of existing conditions within the City for the purpose of projecting a plan to cope with any emergency or danger to the people of Providence and to report its findings and recommendations to the Mayor and the City Council not later than November 1, 1950.

No. 621. Resolution Objecting to the Methods Employed by the World Committee of Partisans of Peace.

(Approved August 11, 1950.)

Whereas, The United States Department of State has called to the attention of citizens of our country the methods being employed by a communist-dominated, world-wide organization known as Partisans of Peace, in circulating a petition calling for the banning of the use of the atomic bomb and the branding of nations first using it as war criminals; and

Whereas, This petition, on the face of it, has a direct appeal to peace-loving persons all over the world, in view of the fact

that it calls for the abolition of widely destructive weapons and the establishment of peace, which is the desire of every man and woman, and

Whereas, This petition has as its objective a means of changing the present United Nations' stand on combating communist aggression, by showing of a movement among the peace-loving peoples of the world to brand the United States as the aggressor nation;

Now, Therefore, Be It Resolved, That this City Council does hereby object to the methods employed by the communist-controlled World Committee of Partisans of Peace, and

Be It Further Resolved, That we support the United Nations which has officially approved the principles of a definite plan for effective control of atomic energy.

No. 817. Resolution Approving the Tentative Plan for "Point Street Project Area D2-R".

(Approved December 22, 1950.)

Whereas, The Providence Redevelopment Agency pursuant to the provisions of Article 5 of the "Slum Clearance and Redevelopment Act", constituting Chapter 2574 of the Public Laws of 1950 of the State of Rhode Island and Providence Plantations, has formulated and submitted on November 16, 1950 a tentative redevelopment plan for a project area within Redevelopment Area D-2 designated by the City Council on July 6, 1948, Chapter 103 of the Ordinances of the City of Providence under the provisions of Section 22 of the Community Redevelopment Act, Chapter 1802 of the Public Laws of 1946 as amended, and

Whereas, A copy of said tentative plan was transmitted to the City Plan Commission on November 14, 1950, and said Commission reported to the City Council on December 7th, 1950, that said tentative plan is in conformity with the master or general plan of the City of Providence, and

Whereas, Detailed inspections of the 110 of the 125 occupied dwelling units within said project area made by inspectors of the Providence Department of Health using survey methods adopted and recommended by the United States Public Health Service indicate that 85% of the dwelling units inspected have serious deterioration, 71% have no contral heating, 63% have

no inside hot water, 62% have no private bath, 35% have no bath available, 33% have no private toilet, 19% have serious daylight obstruction, 17% have seriously inadequate room facilities, and 13% have no dual egress, and

Whereas, The same survey shows that 97% of the housing surveyed is considered inadequate because of hazardous and insanitary conditions, and

Whereas, Said survey also indicates that by reason of extreme lack of facilities and extreme deterioration 81% of the dwelling units probably cannot be rehabilitated except by structural changes so basic and so costly as to be out of keeping with the worth of the structures, and

Whereas, The United States census of 1940 reported that 84% of the dwelling units reporting were built before 1900 and no significant residential construction had occurred within this area since 1930, and

Whereas, The Insurance Maps of Providence, Rhode Island, Volume I, published by the Sanborn Map Company, reveal that all of the structures containing dwelling units are of predominantly wood construction and that 94% of the structures containing dwelling units do not conform to the Providence Building Code because the side yards are too narrow, and

Whereas, It is reported by the Providence Redevelopment Agency that 46% of the land within said project area exclusive of streets is used for industrial or commercial purposes resulting in close intermixture of business and industry with housing, and

Whereas, The streets within said project area are reported by the Traffic Engineer to be narrow and congested with commercial and industrial traffic, and

Whereas, The records of the Providence Health Department and State Health Department indicate that the incidence of venereal disease, tuberculosis and illegitimate births are disproportionately high in the area bounded by Lockwood, Plain, Basset, Claverick, Clifford, Chestnut, Point, Richmond and Eddy streets of which said project area is a part, and

Whereas, The records of the Juvenile Court, Providence School Department and the Providence and State Welfare Departments indicate that the incidence of juvenile delinquency, truancy and aid to dependent children cases are disproportionately high in the said area of which said project area is a part,

Now, Therefore, Be It Resolved, (1) That redevelopment of the project area described in the tentative plan submitted by the Providence Redevelopment Agency on November 16, 1950 be and hereby is determined to be in the public interest and would tend to effectuate the purposes and policy of said Slum Clearance and Redevelopment Act; and that it be and hereby is determined that said project area is an approved redevelopment project area and shall be known as the Point Street Project Area and shall be numbered D2-R.

(2) That it be and hereby is determined that said Point Street Project Area, D2-R comprises that certain tract of land situated on the northerly side of Point street, in the City of Providence and State of Rhode Island, which is bounded and described as follows:

Beginning at the southwesterly corner of the tract herein described, at the northeasterly corner of Point and Plain streets; thence running N-15°-15′-00″W, along the easterly line of Plain street a distance of 282.20 feet to the southeasterly corner of Plain and Elm streets; thence turning an interior angle of 102°-48′-00″ and running N-61°-57′-00″E, along the southerly line of Elm street, a distance of 104.98 feet to a point in the range of the southeasterly line of Bassett street; thence turning an exterior angle of 153°-33′-20″ and running N-35°-30′-20″E, crossing Elm street, and along the southeasterly line of said Bassett street, a distance of 488.44 feet to an angle; thence turning an exterior angle of 179°-20′-20″ and running N-34°-50′-40″E, along the southeasterly line of Bassett street, a distance of 44.99 feet to the southeasterly corner of Bassett and Blount streets; thence turning an interior angle of 69°-06′-20″ and running S-28°-15′-40″E, along the easterly line of Blount street, and its prolongation across South street, a distance of 479.01 feet to the southerly line of South street; thence turning an exterior angle of 90°-

12′-40″ and running N-61°-57′-00″E, along the southerly line of South street, a distance of 241.00 feet to the southwesterly corner of South and Hospital streets; thence turning an interior angle of 90°-00′-00″ and running S-28°-03′-00″E, along the westerly line of Hospital street, a distance of 280.92 feet to the northwesterly corner of Hospital and Point streets; thence turning an interior angle of 90°-07′-22″ and running S-61°-49′-38″W, along the northerly line of Point street, a distance of 197.03 feet to an angle in the northerly line of Point street; thence turning an interior angle of 158°-30′-46″ and running S-83°-18′-52″W, along the said northerly line of Point street, a distance of 374.81 feet to another angle in the said northerly line of Point street; thence turning an interior angle of 183°-25′-32″ and running S-79°-53′-20″W, along said northerly line of Point street, a distance of 359.00 feet to the northeasterly corner of Point and Plain streets, at the point and place of beginning.

The above description of the boundaries of said Point Street Project Area D2-R was established by perimeter survey, by Charles A. Maguire & Associates, Engineers of Providence, R. I.

(3) That it be and hereby is found and determined for said Point Stret Project Area, D2-R, on the basis of the facts set forth in the reports and documents mentioned in the preamble of this Resolution:

(a) That 85% of the dwelling units surveyed have serious deterioration;

(b) That 71% of the dwelling units surveyed have no central heating;

(c) That 63% of the dwelling units surveyed have no inside hot water;

(d) That 62% of the dwelling units surveyed have no private bath;

(e) That 35% of the dwelling units surveyed have no bath available;

(f) That 33% of the dwelling units surveyed have no private toilet;

(g) That 19% of the dwelling units surveyed have serious daylight obstruction;

(h) That 17% of the dwelling units surveyed have seriously inadequate room facilities;

(i) That 13% of the dwelling units surveyed have no dual egress;

(j) That 97% of the housing surveyed is inadequate because of hazardous and insanitary conditions;

(k) That 84% of the dwelling units were built before 1900 and no significant residential construction has occurred within this area since 1930;

(l) That 94% of the structures containing dwelling units have side yards so narrow that they do not conform to the Providence Building Code;

(m) That all of the structures containing dwelling units are of predominantly wood construction and the narrow passageways between the buildings constitute serious fire hazards;

(n) That 46% of the land excluding streets is used for industrial or commercial purposes resulting in close intermixture of business and industry and housing;

(o) That the streets are narrow and congested with commercial and industrial traffic;

(p) That the incidence of venereal disease, tuberculosis and illegitimate birth cases is disproportionately high;

(q) That the incidence of juvenile delinquency, truancy and aid to dependent children cases is disproportionately high; and

(4) That it be and hereby is found and determined that said facts demonstrate that because of a predominance of conditions of dilapidation, deterioration, age, obsolescence, inadequate provision for light, sanitation and open spaces between buildings, insanitary and unsafe character and condition of physical construction, inadequate street layout, mixed character and shifting of uses which injuriously affect the entire area and constitute

a menace to the public health, safety and welfare of the inhabitants of the area and of the community generally, said project area is a slum blighted area within the meaning of Sections 2 (A) and 7 (A) of said "Slum Clearance and Redevelopment Act" of 1950 and that said Point Street Project Area numbered D2-R is hereby determined to be a slum blighted area.

(5) That the following constitutes the approved tentative plan for the redevelopment of Point Street Project Area, D2-R:

(a) LOCATION AND DESCRIPTION OF BOUNDARIES

The Point Street Project Area is located in inner South Providence and is bounded by Plain, Bassett, Blount, South, Hospital and Point streets, and includes the street area of Blount street, Hoppin street, and the portions of Elm and South streets lying within the project area. A legal description of the boundaries of the project area is included in Section (2) of this Resolution.

(b) DESCRIPTION OF CONDITIONS EXISTING IN THE PROJECT AREA

That part of the tentative plan describing the condition of housing and social conditions is set forth in the preamble and Section 3 of this Resolution. Approximately 400 people occupy 125 dwelling units in the project area. Three-fifth of the lots are occupied by the 49 structures containing these dwelling units, most of which have been individually classified as substandard on account of major defects and serious deterioration. Social data on the larger blighted area east of Plain street, of which the project area is a typical part, show that these people, particularly the children, are suffering the disorganizing effects of living in a bad environment.

The area is very accessible to downtown Providence, major highways, and a large labor pool. Despite traffic congestion within the area, industry has been gradually moving in.

The area has a fairly uniform slope of about 5%, which makes it well suited to development. The land varies from about 35

feet above mean sea level at Hospital street near Point street to about 70 feet along Plain street.

The only substantial new investments made in the area by private enterprise in recent years have consisted of new industrial plant, equipment and facilities, usually replacing residential structures, establishing beyond question that the highest and best future use for the land in the area is industrial.

On the other hand, the tight street pattern in this area and its vicinity and the difficulty of acquiring large blocks of miscellaneous properties under the normal processes of acquisition have undoubtedly combined both to slow down industrial growth and to limit the size of plant and the type of activity coming into this section of South Providence.

Consequently the manufacturing concerns in the project area and in the vicinity, while generally occupying well-constructed buildings do not have sufficient land for new buildings and for off-street parking and loading. This deficiency is made more acute by the narrow streets which are inadequate to handle moving traffic and still must be used in many cases by trucks stopped to load or unload.

(c) REASONS FOR SELECTION OF POINT STREET AS A PROJECT AREA

Redevelopment of the Point Street Area is to be undertaken at this time for the following reasons:

(i) *Blighted Condition of the Area*

The conditions described in the preamble and Section 3 of this Resolution demonstrate that the project area is severely blighted.

(ii) *The Opportunities for Industrial Development of the Area*

A constant need for additional land for industrial buildings, warehouses and parking facilities exists in Providence. Obsolesence of present buildings, additional floor area requirements by the new or expanding enterprises, and demolition of struc-

tures to make way for highways and other public improvements all contribute to this need. In many cases suitable new locations for concerns on the move can be found in existing buildings. In other cases, land must be made available for plant construction or expansion and for off-street parking and loading facilities. The project area once cleared and available for industrial re-use will contribute in this direction.

With the construction of the proposed North-South Freeway accessibility of this project area will be greatly enhanced. This section of the City is unique for a variety of enterprises requiring close contact with other like concerns and supplier of special products located in that general section of the City, as well as for concerns employing a high proportion of women.

Transition from residential to industrial use is proceeding slowly in a haphazard and disorganized manner and without opportunity for changes in the outmoded street pattern. Clearance of substandard housing, the assembly of land for use by industrial concerns, and changes in street pattern under redevelopment procedures will enable existing future plants in the project area to carry on their business more efficiently.

(iii) *Timing with Other Public Improvements*

The section of the North-South Freeway that has been recommended for first construction is a bridge at Ship street which would provide a new link between this area and George M. Cohan boulevard, the most convenient route to Boston and to the Massachusetts cities to the east.

(iv) *Opportunity for Progressive Clearance and Development*

The fact that cleared land in the project area would be sold or leased to several different industrial groups or concerns rather than to a single redeveloper makes it feasible to clear one segment of the project area at a time. This would make the job of finding new homes for displaced families easier.

(d) GENERAL STATEMENT OF REDEVELOPMENT PROPOSALS

(i) The redevelopment plan shall provide for the elimination of the blighted housing within the project area and shall provide for the acquisition of lands, buildings or improvements necessary to assure the proper clearance and redevelopment of the entire area and to prevent the spread or recurrence of conditions of blight thereby protecting the health, safety and welfare of the inhabitants of the City of Providence.

(ii) *Land Use*

The re-use of the cleared sites in the project area is to be industrial. Some reasonable restrictions on industrial development are necessary along the Plain street frontage.

(iii) *Layout of Principal Streets*

The existing street pattern in the project area shall be altered to provide for any street improvements needed to serve the area and to provide access to the North-South Freeway, and for elimination of sections of streets no longer needed after redesign of the area.

(iv) *Population Density*

There shall be no resident population in the project area after complete redevelopment.

(v) *Building Intensity*

Reasonable height and area regulations shall be provided for. Plans for the use of redevelopment sites should assure adequate off-street parking and loading space.

(e) CONFORMITY OF REDEVELOPMENT PROPOSALS TO THE MASTER PLAN

The following principal features of the master or general plan apply to this project area:

The project area is within Redevelopment Area D2 defined by the City Plan Commission in the *Master Plan for Redevelopment of Residential Areas* adopted by the City Plan Commission November 25, 1946.

This tentative plan assumes the location of the North-South Freeway to be Route 5 proposed by Charles A. Maguire and Associates in *The Expressway Plan for Metropolitan Providence,* 1947, and approved by the City Plan Commission in *The Master Plan for Thorofares,* adopted November 25, 1946, as amended June 28, 1950.

The industrial re-use herein proposed for the project area is in conformance with the *Master Plan for Land Use and Population Distribution* adopted by the City Plan Commission November 25, 1946.

(f) FINANCIAL FEASIBILITY OF THE TENTATIVE PLAN

The expenditures for property acquisition, street improvements, demolition of structures and regrading to accomplish the purpose of slum clearance and redevelopment have been estimated at $345,000. These expenditures will exceed the amount redevelopers would be able to pay for improved sites. The fair re-use value to the redevelopers of the industrial sites which could be made available has been estimated at $150,000. The difference between the expenditures made for improving the sites and the fair re-use value is the *cost of redevelopment.* This cost has been estimated at $195,000.

This project appears to be eligible for federal assistance needed to enable the City of Providence to finance redevelopment. Under the provisions of the Housing Act of 1949, two-thirds of the estimated cost of redevelopment of this project area or $130,000 could be covered by a federal grant. The balance, or $65,000, would be the net cost to the City of Providence to clear the slum housing and make this area a modern industrial district.

(g) HOW PURPOSES OF THE SLUM CLEARANCE AND REDEVELOPMENT ACT OF 1950 WOULD BE ATTAINED BY THE PROPOSED REDEVELOPMENT OF THE PROJECT AREA

Article 2, Section 4 of said "Slum Clearance and Redevelopment Act" of 1950 declares that "The purposes of this Act are

. . . to eliminate and redevelop slum blighted areas . . . in the manner and by the means provided in this Act, thereby to carry out the policy of this State . . . to protect and promote the health, safety and welfare of the people of the State . . ."

(6) That it be and hereby is determined that it is necessary that the blighted conditions be eliminated and said project area be redeveloped in accordance with the approved tentative plan to attain the purposes of the Slum Clearance and Redevelopment Act, and

(7) That the Providence Redevelopment Agency be and hereby is directed to prepare and submit a redevelopment plan for said project area based upon the approved tentative plan, and

(8) That the City Clerk be and hereby is authorized and directed to transmit a copy of this Resolution to the Redevelopment Agency and to the Division of Inspector of Buildings, and

(9) That the City Clerk be and hereby is authorized and directed to file in the Registry of Deeds of the City of Providence a description of the land within the project area and a statement that proceedings for the redevelopment of said project area have been instituted under the "Slum Clearance and Redevelopment Act" of 1950.

(10) That this Resolution shall take effect immediately.
