

THE CITY OF PROVIDENCE  
STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS

# RESOLUTION OF THE CITY COUNCIL

No. 80

Approved February 11, 1988

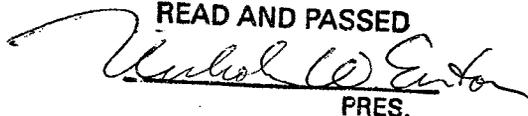

RESOLVED, That the following named person, firm or corporation is hereby granted permission to erect, alter or use a building or structure at the location named herein for the sale of petroleum, kerosene, gasoline, coal oil and their products, compounds and components as described and shown in and on the application therefor and accompanying plat, all on file in the office of the Department of Inspection and Standards subject to the conditions that said person, firm or corporation shall not violate any of the laws of the State of Rhode Island or any of the Ordinances of the City of Providence relative to the erection, use or occupation of said structure and that said person, firm or corporation shall not allow petroleum, kerosene, gasoline, coal oil or their products, compounds or components, to be conveyed over or across any sidewalk by means of any pipe or hose, and upon such special conditions as are hereby enumerated and further provided that the Director of the Department of Inspection and Standards may authorize minor changes in the structural detail of plans on file, viz:

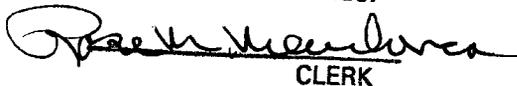

P.M. Realty Company, 36-38 Pleasant Valley Parkway, Plat 27, Lot 46, to remove four (4) existing pumps and replace with eleven (11) new pumps and new island, and the removal of four (4) existing storage tanks, and replace with four (4) new tanks at eight (8) Thousand gallons, making a total of eleven (11) new pumps and Thirty-Two Thousand gallons of storage capacity upon the premises.

The erection or location of any buildings or structures not shown on the original plat on file with the Director of the Department of Inspection and Standards, or any change in the location of buildings or structures from that shown on said plat shall be deemed a violation of this permit.

- GENERAL SCOPE OF WORK**
- All pump and tank work shall conform with Sun Refining & Marketing Co. current standards. General Contractor to call Big 24 by Number 78 hours prior to excavating tank hole. 1-800-225-4474.
  - Gas free, remove and dispose of three 6,000 gal. gasoline and one 3,000 gal. diesel tanks.
  - Break up and remove existing pump and vacuum islands. Deliver old pumps to Sun Co. Warehouse as directed.
  - Install four 8,000 gal 8 ft. dia. Bufferide tanks in accord with manufacturer's published specifications. Contractor shall include separate price for concrete beam type anchoring system as shown on drawing No. J-111.
  - Install Stage-1 Vapor Recovery manifold system.
  - Install two 2" dia. vents up 18'-6" and esp. tied to existing building.
  - Install 3" dia. vapor recovery drybreak in 12" dia. manhole.
  - Install four 3" dia. gauge cap and adapters in 12" dia. manhole.
  - Install four 4" dia. direct fill cap and adapters in 16" dia. spill protection type manholes.
  - Install four submersible pumps with approved leak detectors set in 30" long x 30" dia. corrugated galvanized pipe manholes with 27" dia. cast iron heavy duty frame and covers above. Install all necessary piping and electrical.
  - Install 4" Flat Valve in 4" x 4" x 2" extractable tee supplied by Sun Co. with 4" galvanized riser and 4" threaded cover. In 12" dia. manhole. Hold cover 4" below manhole.
  - Install Vee-der Root TIS-250 in-tank liquid level monitoring system in accord with manufacturer's specifications. NOTE: This system may interface with Bacard 2400 control console. If ordered with appropriate interfacing board. Contact Factory Rep. when ordering system.
  - Install 4" dia. pipe centered 6" in from three sides of 12" x 24" manhole for TIS-250 electronic gauge. Run separate 3" dia. conduit from each gauge point back to TIS-250 system wiring trough per spec.
  - Install 4" dia. P.V.C. inspection pipe in 12" dia. manhole, with security type cover.
  - Install 6" concrete mat reinforced with 6" x 6" - 42# wire mesh, including required construction and crossing key joints. See plan for size and configuration of mat. Install 2 ft. paving strip around perimeter of new concrete mats and aprons to provide smooth transition to yard paving.
  - Square out and replace all disturbed concrete and paving areas as required.
  - Install pilot lights for submersible pumps in close proximity of console operator.
  - Install new 12" x 45" split Full Serve/Self Serve island with electronic retrofit dispensers including necessary piping and electrical work installed in accord with Sun Co. specifications.
  - Locate new 12' x 12' masonry kiosk building on island as shown with suitable foundation extended below frost line (48" min.). Windows to provide control center with clear line of vision to Self Serve service dispensers. Toilet provisions to be in accord with local code.
  - Install self-serve related equipment in accord with State Fire Marshal guidelines including Bacard 2400 control console, intercom, and suppression system.
  - Provide auxiliary panel board in control center for switching of all yard equipment including sign, lights, and pump controls.
  - General Contractor to install concrete foundations for canopy columns in accord with manufacturer's requirements for depth, size, and reinforcing. Detail shown is minimum required. Refer to factory specification for installation.
  - Relocate existing 9 ft. Sunoco Diamond advertisement sign and pole onto new sign base, including necessary electrical.
  - Install two 48" x 66" illuminated gasoline and diesel price signs onto existing advertising sign pole.
  - Contractor shall provide and install two 4' x 8' white plywood signs with red letters to read:  
 WE ARE REMODELING TO BETTER SERVE YOU  
 OPEN DURING CONSTRUCTION  
 These signs shall be installed on the job site on the first day of construction. Location to be as directed by owner.
  - NOTE: Contractor to install piping and conduits to Sun Co. specifications. Run same to best advantage. Contractor to provide owner with a dimensioned sketch and supporting photos showing piping and conduits. "AS INSTALLED" before back filling trench.
