CHILSON'S

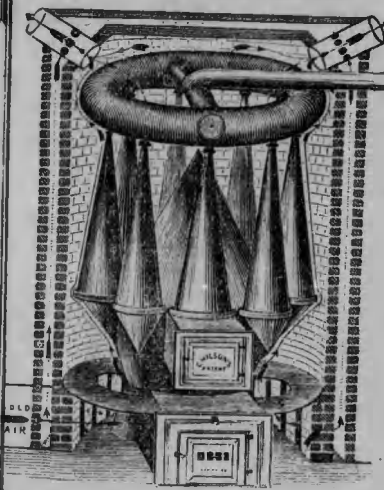

PATENT CONE FURNACES,

— AND —

DOUBLE OVEN COOKING RANGES.

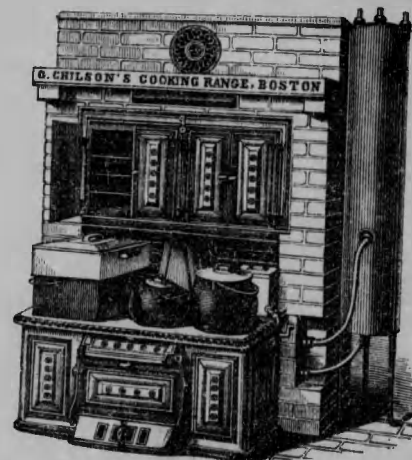

CHILSON'S CONE FURNACE.

Patented in America, England and France.

subscriber's long experience in the invention, manufacture and erection of HOT-AIR FURNACES enables him with confidence to publicly challenge all other known inventions for buildings to equal the "CONE FURNACE" in any particular as more than *twenty-five hundred testimonials*, received the last five years, will prove. Every intelligent person can comprehend, by an examination of the engraving, the peculiar advantages combined in this furnace, with its shallow fire-pot, its cluster of tapering radiators or cones projecting over the fire, and holding the smoke and gas back near the cones, thereby causing a thorough and perfect combustion, the heat is made to impinge against and radiate from the cone surfaces, thus combining a powerful heater with economy in fuel, superior strength and durability of the structure, simplicity of management, and freedom from the usual Hot-Air Furnaces, emitted odors common to the usual Hot-Air Furnaces, emitted their red hot cylinders, cracked pots, and broken joints. "CONE" received a GOLD MEDAL at the last Fair in London and the only Gold Medal ever awarded to a Furnace in Great Britain.

CHILSON'S PATENT ELEVATED DOUBLE-OVEN COOKING RANGE.

The highly satisfactory testimony received from the large number of these ranges in use, makes it quite certain that no housekeeper will long use any other plan of range after once seeing this range. And feeling confident that it must come into general use, it was determined that it should be got up so very perfect in its principle and workmanship, as to have no equal in the world; and a visit to my store in Boston, or my foundry at Mansfield, will prove the truthfulness of this assertion, and show the largest assortment of Ranges and Furnaces to be found in any one establishment in the United States. We have just finished some extra large sizes, for large Families, Boarding Houses, Hotels, and other large buildings requiring a large and powerful apparatus. This Range excels all others in its entirely new principle, and thorough workmanship, its extra heavy, fine castings, its great economy in the use of fuel, and in its own cost, its quick and even baking ovens, its simplicity and ease of management, its self-regulating flues, avoiding the usual vexatious complication of dampers, and its flue plates, preventing the loss of heat in the brick walls.

These last two improvements will open the eyes of the Economists, to see how great is the saving in fuel over the extravagant waste in other ranges. Sizes in variety for dwellings, hotels, &c., with or without Water Backs. Hot-Air Fixtures for heating additional rooms, Hot Closets, &c.

ALSO ALL SIZES OF

son's Patent Trio Portable Furnaces, and Trio Stoves,

Universally acknowledged to be unrivalled in power, economy, and durability.

Stoves, Ventilators, Mantels, Frame Grates, Stoves, &c., with every variety of Heating, Cooking and Ventilating Apparatus.

Attention given to their erection when desired. The above may be obtained at wholesale or retail, at my store 99 and 101 Blackstone Street, Boston, or at my Foundry in Mansfield, Mass.

ANT

TO THE PUBLIC.

HAVING purchased the copyright of the Providence Directory, the undersigned present to the people of Providence the first of a new series, enlarged and improved.

From the first, no pains or expense has been spared to make it thorough and correct. That it is thorough, we have little doubt, it having nearly nineteen hundred more names than the Directory of last year, and in proportion to the size of the city, the fullest Directory that has ever come to our notice—being one name to every three and a third persons of the estimated population, and over five hundred more names than is contained in the Albany Directory, where the population is ten thousand more.

As there are no figures whereby the correctness of the work may be ascertained, we can only hope that it is as correct, as we believe it to be thorough, though we doubt not that the transformation from the old shape to the new has been attended with some few errors; should this prove to be true, we promise reparation another year.

The people of Providence can but be pleased with its mechanical appearance. It is said to be as handsome a work as was ever printed in this city; we are confident that it could not have been done better elsewhere. The same applies as well to the superior binding, and the paper which has been manufactured expressly for the purpose.

We have in one instance departed from the usual alphabetical order in which Directories are compiled, believing that while it was at a sacrifice of a rule heretofore considered free from an exception, it has increased the utility and convenience of the book. All names of one kind, whether spelled in one, two, or more ways we have inserted in one place, as Chace—Chase; Millard—Millerd; Read—Reed—Reid, &c., at the same time preserving the individual mode of spelling each name. We can but believe this will meet the approbation of all who have much occasion to use this book. Many people refer to the Directory for a name, with no thought that it is spelled in a variety of ways, which brings a part of them alphabetically on another page, and they fail to find the name. A case of this kind came to our notice recently, in which a lady came to this city to visit her friends; not finding their names where she expected to in the Directory, she remained at one of the Hotels three days, before succeeding in finding them; had she thought of looking on another page for a different spelling of the name, she would have readily found the desired information.

Hoping to receive from the people of Providence, a fair return for their endeavors to serve them, the undersigned pledge themselves to furnish to their patrons, annually, a Directory that shall be creditable to themselves and a faithful and convenient mirror of the thrift and enterprise of the "What Cheer" City.

BROWN UNIVERSITY.

This institution of learning was founded by the Baptists in 1764, the charter having been granted in February. It was at first located in Warren, where, on the seventh of September, 1769, the first Commencement was celebrated. In 1770 the College was removed to Providence, where its exercises have since been held, with a temporary suspension of some few years during the revolutionary war. The institution received its present name by a vote of the Corporation, passed September 6, 1804, in honor of its most liberal benefactor, the late Hon. NICHOLAS BROWN.

The Charter, which is now "the Constitution of Brown University," secures to the Baptists forever, the government of the College. Some of its provisions are as follows:—"That into this liberal and Catholic Institution, shall never be admitted any religious tests; but on the contrary, all members hereof shall forever enjoy full, free, absolute and uninterrupted liberty of conscience:—And that the places of Professors, Tutors, and other officers, and the President alone excepted, shall be free and open to all denominations of Protestants:—And that youth of all denominations shall and may be freely admitted to the equal advantages, emoluments, and honors of the College or University."

The Corporation for the regulation and government of the University, consists of two branches: "That of the Trustees, and that of the Fellowship." There are thirty-six Trustees, and twelve Fellows including the President. Of the Trustees, twenty-two by the Charter are to be Baptists, five of the denomination called Friends, or Quakers, four Congregationalists, and five Episcopalians. Of the Fellows, eight are to be Baptists, "and the rest indifferently of any or all denominations." The President must be a Baptist. "The instruction and immediate government of the College," says the Charter, "shall forever be and rest in the President and Fellows, or Fellowship."

The buildings belonging to the University are as follows: University Hall, built in 1770-1; Hope College, built in 1821-2; Manning Hall, built in 1834; Rhode Island Hall, built in 1839-40; and a Mansion House for the President, built in 1841. Its enclosures contain upwards of fourteen acres of land, situated mostly between Prospect, Waterman, Thayer, and George streets. Its invested funds, including the Library Fund, amount to two hundred thousand dollars. The number of its graduates up to the present time, is about two thousand.

LIBRARIES.

The University Library is in Manning Hall, and now contains 28,000 volumes. A large proportion of these have been purchased within the last few years, with special reference to the wants of students and gentlemen engaged in literary and scientific pursuits. It is constantly increasing from the proceeds of a permanent fund of \$25,000, established for this purpose in 1839. The Library is open four hours daily, from 9, a. m., till 1 p. m. In addition to the University Library, the Libraries of the Philermenian and the United Brothers' Societies, comprise together 6000 volumes, accessible to all the students of the University.

The number of students is about two hundred.

The Annual Commencement is on the first Wednesday in September. The first Exhibition is on the Saturday preceding Thanksgiving, and the second Exhibition on the first Saturday in May. The week of the annual Thanksgiving and the week succeeding the second exhibition, are given as recesses. The winter vacation of three weeks commences about the 20th of January, and the summer vacation of eight weeks commences about the 7th of July.

PUBLIC SCHOOLS.

The Public Schools of the City of Providence are placed by the ordinance of the city under the management of the School Committee, consisting of forty-five members; six are elected from each of the seven wards. Two are elected from each ward annually. The Mayor, the President of the Common Council and the Chairman of the Committee on Education are *ex-officio* members of the School Committee, making the whole number forty-four, who serve without any compensation. The experience of many years has shown, that the members of this Committee, each one feeling more or less heavily the pressure of his own private or professional business, cannot give that amount of time to the Public Schools, which an economical and successful management of them requires. For this reason, they have wisely entrusted much of the executive duty of the Committee to a Superintendent.

Rev. Daniel Leach is the present Superintendent of the Public Schools, and also acts as Principal of the High School. He spends all his time in visiting the different schools, exercising a careful supervision over them, and while passing from school to school, he aims to remove existing defects in the modes of teaching and management, and to introduce such improvements as his own observation and the progress of popular education may have shown to be useful. He also furnishes all necessary supplies, superintends all repairs, and in every practical way promotes the improvement of the Public Schools.

There are at present established in this city, forty-eight Public Schools, in which are engaged one hundred and thirty-nine teachers; eleven gentlemen and the remainder ladies, who devote themselves faithfully to the instruction and government of their respective schools, which together contain about seven thousand four hundred pupils.

The schools are divided into four grades, viz:

1st.—Primary Schools,
 2d.—Intermediate Schools,

3d.—Grammar Schools,
 4th.—High School.

FIRST GRADE. There are now established in the city *twenty-two Primary Schools*. These schools are designed for pupils from five years of age to six or seven, according to their advancement in learning. Each school is under the immediate government and instruction of two female teachers, a Principal and an Assistant, and usually contains about one hundred and thirty pupils. The teachers in these schools, beside teaching the elements of Reading, Spelling and Arithmetic, give their pupils much oral instruction of a familiar kind, suited to their age, with daily exercises in Vocal Music.

SECOND GRADE. There are *eighteen Intermediate Schools* established for children from six to eight or nine years of age, including those who were formerly in the first classes in the Primary Schools, and those in the lowest classes in the Grammar Schools. Each of these schools usually contain about one hundred and twenty pupils, who are under the instruction and management of two female teachers, a Principal and an Assistant. The scholars in these schools advance progressively to more difficult lessons in Reading, Spelling and Arithmetic, and begin to take lessons in Writing and Geography. Vocal Music in these schools is taught by a professional teacher, employed by the School Committee.

THIRD GRADE. *Seven Grammar Schools* are now established in the city, for the instruction of scholars from eight or nine years old to twelve or fourteen. Each Grammar School, except the one for colored children, usually contains upwards of two hundred pupils, who are under the government and instruction of a male Principal and three female Assistants.

The Bridgman street school contains about five hundred and sixty scholars. The Elm street, the Arnold street and the Benefit street contain about 340 pupils each.

In these schools the scholars use a new set of text books, which present more enlarged and accurate views of the branches they have already begun, and in these books continue their exercises in Reading, Spelling, Writing, Arithmetic and Geography, and commence English Grammar, the History of the United States and General History. Instruction in Vocal Music is also given in the High School by a professional teacher.

FOURTH GRADE. *One High School*, with two departments—one for boys and one for girls. Each department will now accommodate more than two hundred pupils—making four hundred in the school. The full course of studies in this school occupies four years. The department for boys contains about one hundred and fifty scholars, and the one for girls about two hundred. The boys are thus divided into three classes of fifty each, and placed in separate rooms, under the government and instruction of a male teacher. The girls are divided into five classes, and each placed in a separate room, under the care and instruction of a female teacher. The course of studies in each department is adapted to the conditions of the pupils in after life; each sex pursuing all the common branches alike, but the boys taking the more scientific course, and the girls the more literary. The art of Drawing is taught in both departments by a professional teacher.

WOOLEN MANUFACTURERS'
ATTENTION IS RESPECTFULLY INVITED TO THE
TENTERING AND DRYING MACHINE

Invented, and Manufactured solely by

JOSEPH S. WINSOR,
Patent applied for.

This Machine has been proved and pronounced by the following Companies, to be the best and most economical machine for drying and tentering now in use:

WALTER B. CHAPIN, Providence, R. I.

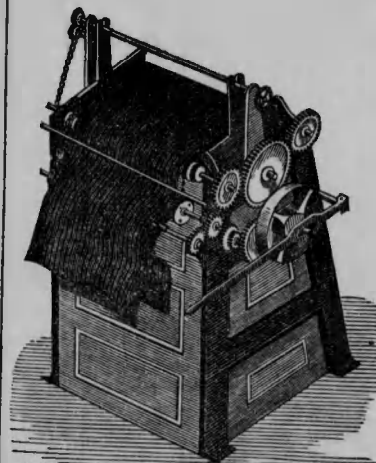

ELM ST. WOOLEN MILL, B. & J. Aborn, Providence, R. I.

S. & H. SAYLES, Daysville, Conn.

F. B. LOOMIS, Norwich Town.

The space required for this machine and its operation does not exceed eleven feet square, one hand being sufficient to operate it, and it will dry 50 to 60 pieces of medium cloth per day, at an expense for fuel of less than 75 cents.

The machine may be seen at the factories of any of the above Companies, or at the shop of the subscriber.

HOYT, JR.

Also, Patentee for an improvement in MACHINES for
MAKING WEAVER'S HARNESS.

This Harness, styled a Double-Knotted Harness, as distinguished from the "Loop-Harness," the undersigned has for several years manufactured, and furnished to order, and he has the satisfaction of knowing that but few of the many manufacturers who have given it a trial, have failed to adopt it in substitution for the Loop-Harness. It is, the undersigned unhesitatingly affirms, in all respects superior to the Loop-Harness, and in point of durability surpasses it in the ratio of at least two to one. He can designate Harnesses of his manufacture which have been in constant use for four years past, and which ALTHOUGH NEVER RE-VARNISHED, are still in good working order!

Manufacturers and all interested in Harness are invited to call, and witness for themselves the working of this truly valuable Machine.
