PROVIDENCE DIRECTORY.

A. CRAWFORD GREENE'S
GREAT
Book, Job and Newspaper
PRINTING OFFICE,

— IN THE —

EXTENSIVE HALLS OF THE RAILROAD DEPOT.

*The Largest Printing and Publishing House
in the State.*

The most valuable, comprehensive, and costly stock of Presses and Printing materials to be found in Rhode Island. All the latest, best and most fashionable styles of Type, Borders, Rules, Flourishes, and Ornaments generally, in profusion. Improved and powerful Steam Boiler, and Engine, with Power Presses of the newest and most approved patterns for Book Work, Newspaper Work, and Job Work of every description. Nearly Twenty different Printing Machines for all kinds of Heavy, Light, Common, or Fine Work. The greatest number of experienced and accomplished Compositors and Pressmen to be found in any Rhode Island Office. All work executed in the most faithful and skillful manner, and with unusual promptitude.

PRICES INVARIABLY MODERATE.

MR. GREENE would take the occasion to express his thanks to the public for the large measure of patronage which has been constantly extended to him during many years past, and would respectfully announce that as he has recently been making great and valuable additions to his stock of material, in every department, and still continues to make other additions of desirable and fashionable new type and other articles, he feels better prepared than ever to turn out the best and most satisfactory work in every branch of the Printing business, with great dispatch and upon the most reasonable terms.

He also takes pleasure in stating that the union, within ten months past, of the old, well known and popular GENERAL ADVERTISER with the younger but very successful PROVIDENCE WEEKLY GAZETTE, has proved most acceptable to the people and eminently encouraging in a business point of view. The amount of advertising patronage extended this paper has from first to last been all that was desired, and sometimes even more than could be received without crowding out everything but advertisements. It is of course intended to have the columns of the General Advertiser supplied with as much original and selected matter, of an interesting and amusing character as can possibly be accommodated in connection with the advertisements, and important improvements in its miscellaneous department are in contemplation. The method of circulating the paper, from week to week, in different parts of the city and state, renders it a most excellent advertising medium for business men and women, as those who have fairly tried it well know, and as the constant demand for advertising space sufficiently evidences. With the exception of the Journal the GENERAL ADVERTISER is now the oldest paper in the city, having been published for more than a quarter of a century; and assuredly it bids fair to flourish for a long time to come.

Providence, June 7th, 1873.

TELEGRAPH FIRE ALARM.

GANEWELL'S AUTOMATIC SYSTEM, ADOPTED BY THE CITY OF PROV. Dec. 1870.

DIRECTIONS.

When a fire has been discovered, go to the near-
 est box and open the door, pull the hook down as
 far as you can, (firmly without jerking,) and
 then let it slide back, close the door and remove
 the key.

When the bell inside the alarm box is heard to
 ring, it is an indication that an alarm has been
 already given, and in order to ascertain if it is
 for the same fire, carefully count the signals. If
 the signals indicate a fire in another district, wait
 until all the signals have sounded and then give
 the alarm.

The key-holders will be careful not to give an
 alarm unless they are certain there is a fire, nor
 give an alarm for a fire seen at a distance. Af-
 ter giving an alarm they will see that the box is
 securely closed.

LOCATION OF ALARM BOXES AND KEYS.

The lines not numbered indicate where the
 keys may be found.

SAVE YOUR BEDS.

Now is the time to have your Feather Beds Renovated, when you are about cleaning house, by a Feather Renovator that surpasses all others. All moths are destroyed and removed, the Feathers cleaned, and the fibres relieved from their matted position, giving to a goose feather bed an astonishing increase in bulk, often more than ONE HALF; also removing all disagreeable scent which is so common to new feathers; and relieving them from all liability to moths, by the removal of all gummy and glutinous matter from the quill. Our facilities are such that at short notice we can take and return beds the same day, well dressed and ready for immediate use, for \$2.00 per bed. \$1.00 per set for Pillows and Bolsters. Ticks washed, and well washed, for FIFTY CENTS EACH. Mattresses upholstered in good style. Orders left at Nos. 14 and 16 Maple Street, or addressed to HORACE LUKE, Lock Box 287, Providence, R. 1873 **FAVORITE** 1873
Galvanized Lightning Rod.

We enter the field the present season with the same reliable and beautiful Lightning Conductor which has been so extensively patronized and given such general satisfaction for the past ten years, for the following reasons.

- It will never Rust or Corrode but remain clean and bright.
- Its Insulation is thorough and the best yet devised.
- Solid Copper Screw Couplings make it equal to a continuous Rod.
- Its peculiar construction gives it great strength and large surface, and when surmounted by Gold Plated Cluster Points of Pure Copper and properly erected, it becomes a combined practical and ornamental safeguard against damage by lightning.
- In our experience covering a period of ten years no harm has ever come to either building or occupants where we have erected this rod, a result which may be attributed more to thorough work than any other cause. All work will be done by my partner who has had ten years experience in erecting rods, and we guarantee satisfaction in every case, and should this rod fail to protect our patrons we will refund the money. Rates reasonable. Old rods examined free of charge.

N. B.—We have no connection with, or interest in any team except the one we travel and operate with.
Address J. F. HOLMES, 70 Knight St., Providence, R. I.

Read the following Eminent Testimony in favor of Lightning Rods.

In a house properly provided with Lightning Rods, however many discharges may fall upon it we are well assured from full experience and established principles no damage can ensue to the occupants within. But observation and experiments both indicate that the Insulation of a Lightning Rod in no way impairs its protective power, but that on the contrary it affords an additional safeguard and should therefore not be discarded.

My investigations and researches have been continued for upwards of forty years and in no case have I met with an instance of the loss of human life in a building upon which Lightning Rods had been properly erected and kept in good repair. This I regard as conclusive as to the sufficiency of Lightning Conductors for the protection of human life.

And this from our well known fellow-townsmen cannot fail to be both reliable and convincing.

J. F. HOLMES, Esq., Sir:—I have examined the Lightning Rod and Point constructed of Galvanized Iron with Spiral Twist, Copper Couplings and Gilded Points, and consider it to be constructed on scientific principles and to afford efficient protection against damage by lightning.

Office of A. & W. SPRAGUE MFG. CO., Providence, R. I., Dec. 22, 1869.

CHAS. F. TAYLOR, Treasurer, Providence, R. I.: Dear Sir—For some THREE YEARS we have been
 using the Cop Tubes of the Burgess Cop Tube Co., and have found them in every way satisfactory.
 We cheerfully recommend them to cotton manufacturers as the Best Cop Tubes that we have ever used.

CHAS. F. TAYLOR, Esq., Treas Burgess Cop Tube Co., Prov., R. I.: Dear Sir—I cheerfully give my
 testimony in favor of the Paper Cop Tubes you have furnished us. The ordinary article made of paper
 was so unsatisfactory that we continued the use of the Tin Tubes until we heard of yours, but have
 adopted the use of your manufacture exclusively, and are well satisfied with them.

I am truly yours, WM. C. CHAPIN, Agent Pacific Mills.

Volney W. Mason & Co.,

MANUFACTURERS OF

Mason's Patent Friction Clutches,

FOR

STARTING MACHINERY

Without Sudden Shock or Jar.

Reference can be given to many of our best Manufacturers who have them in use, among others, the

Corliss Steam Engine Co., Providence; S. H. Greene & Sons, Riverpoint; Atlantic Print Works, E. Greenwich; Oriental Print Works, Apponaug, R. I.; James Sanders, Centerville, R. I.; W. F. & F. C. Sayles' Bleachery, Pawtucket, R. I., and many others, in Providence and vicinity.

RIVERPOINT, R. I., May 19, 1869.

VOLNEY W. MASON & Co.—Dear Sirs: Our experience with your Friction Pulleys and Clutches extends over a period of at least eight years. We first applied them to Mangles, two of them requiring great power to operate them; so great as to cause excessive breakage of gears in starting, when other kinds of Clutches were used. Since the application of MASON'S FRICTION CLUTCH, no gears have been broken through their means. Besides five Mangles, there are here, twenty other machines driven by Mason's Friction Clutches and Pulleys, varying in size from 14 in. diameter, 3 1/2 in. face, to 30 in. diameter, 10 in. face. Among these are a Singeing Machine, Washing Machine, Madder Dye Becks, Second Dyeing Machines, Hot Watering Machine, &c., &c. Their application to machinery in the Madder Dye House, is especially satisfactory and useful, for the reason that the belts running in a moist atmosphere, stretch badly and unevenly on the edges, and the butts and laps are separated where they come in contact with the shipper; while in case your Pulleys are used, no such injury is inflicted. With ordinary care, your Pulleys and Clutches will last many years, though subjected to continual use, as in the case of those in our establishment. Yours truly,

Clyde Bleachery and Print Works

WILLIAM W. TUPPER & CO.,

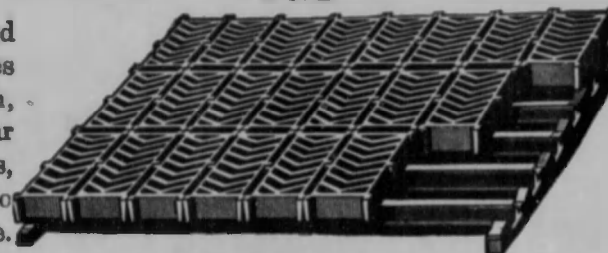

No. 206 WEST STREET, NEW YORK,

Patent Sectional Grate & Grate Bars,

For Steamboats, Steamships, Locomotives and other Furnaces.

No. 1.

We are now prepared to furnish these Grates with greater dispatch, having completed our series of Iron Patterns, which will enable us to deliver at short notice.

Our Patterns are of the following sizes, and are marked respectively, thus:

A—	1/2	inch opening and	3/4	inch iron, for burning	Screenings.
B—	"	"	"	"	for Pea Coal.
C—	"	"	"	"	for Large Nut Coal.
D—	"	"	"	"	for Stove Coal.
E—	"	"	"	"	for Grate Size.
F—	"	"	"	"	for Steamers.
G—	1	"	"	"	for Ocean Steamer Lump.

PLEASE TAKE NOTICE.

Those who may favor us with orders for these Grates will please specify No. 1, or "Sectional Grate," and the letter corresponding with the opening, or size of coal used; giving, if possible, a diagram of Furnace. State if the Fire-Box be of Brick or Iron. Give the exact dimensions of depth and width in the clear. If of iron, measure width from the rivet heads in the corner laps. We make the allowance or margin for expansion.

No. 2.

Average weight of this Grate, 47 pounds to the square foot.

Is our long bar section with the diagonal openings. The bars are same length as ordinary Grate Bars, and designed for the use of both hard and soft coal, where it is necessary to break up the coke or clinker by raking underneath. These bars have great air opening, and more strength and durability with less weight, than any other grate bar now in use.

Providence, April 1st, 1870.

This is to certify that I have used W. W. Tupper & Co.'s Grate Bars for the last 6 years, and find them to be in every respect superior to any Bar I have ever used in making steam easier and saving all of 15 per cent. of fuel.

EUGENE CAHILL,
Engineer for Gorham Manufacturing Co.

Pepperhill Mills, Biddeford, Me.; June 16th, 1868.

W. W. Tupper & Co.: Gents—Your Patent Grate Bars have been in use in these Mills for about two years, and have thus far given the best satisfaction. On referring to our account of coal used during the period, I find that we have not only saved a large percentage of coal, but have driven our steam from five boilers where we were formerly using six—the Mills also being kept at a warmer temperature than formerly.

Truly yours,

F. HAINES, Agent.

ALL KINDS OF WORK GALVANIZED.

THE MANUFACTURERS OF THE

RELIANCE WRINGER,

Have had unusual opportunities of ascertaining precisely what is wanted, and
of producing a perfect machine. They have brought out an en-
tirely NEW WRINGER, which they call the

“PROVIDENCE.”

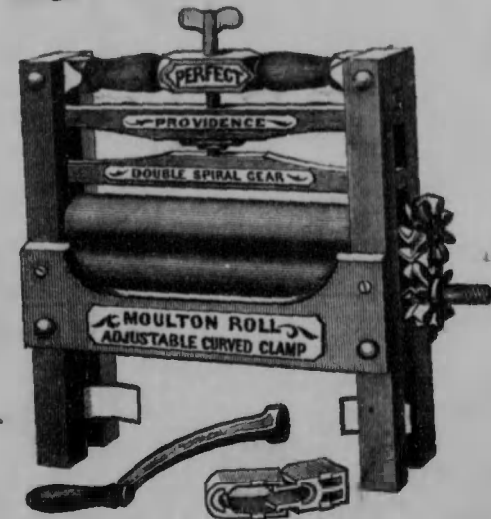

NEW.

1871.

PERFECT.

A Great Improvement over all other Wringers.

IT SAVES LABOR.
IT SAVES THE CLOTHES.

IT SAVES TIME.
IT WILL SAVE THE COST EVERY YEAR.

IT WRINGS FASTER THAN BY HAND.

We consider the Providence superior to all others for the following reasons:—

- 1st. The ROLLERS, of large size and best quality of White Rubber are all secured to their Shafts in the most permanent manner, by the MOULTON PROCESS, making the BEST ROLLER IN THE WORLD.
- 2d. THE PATENT METAL JOURNAL CASINGS prevent any wear upon the journals. (The wooden journals in which the iron shafts of other machines run, soon wear, and the efficiency of this Wringer is hereby greatly reduced.)
- 3d. The DOUBLE SPIRAL GEAR used on the Wringer give the utmost ease and steadiness in working, while the double stop prevents them from bottoming or being thrown out of gear. We furnish either single or double gear PROVISIONALLY, as desired.
- 4th. The ADJUSTABLE CURVED CLAMP readily adjusts this Machine to tubs of any size or thickness, making a perfect fastening. No wooden pegs or rubber straps on this Clamp.
- 5th. SIMPLICITY, STRENGTH and BEAUTY, are combined in this Machine, with all the requisites of a first-class WRINGER.
