CHILSON'S PATENT CONE FURNACES — AND — DOUBLE OVEN COOKING RANGES.

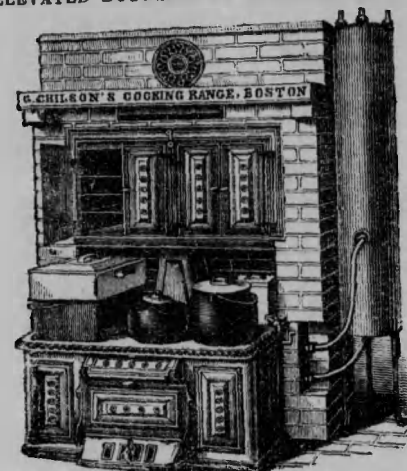

CHILSON'S CONE FURNACE.
(Patented in America, England, and France.)

The extensive use of this superior Furnace in the United States has acquired for it a reputation too well and favorably known to need more at this time than to call the special attention of those in want of the best possible means of warming dwellings, public buildings, etc., with pure, fresh, healthful heat (free from bad odors, and free from the heat and coal gas, so common to hot-air furnaces), to an examination of this superior invention, which represents a cluster of cones, or tapering radiators over a broad flaring shallow fire-pot. These cones being large at the base, and small at the top, secure the great and important object of retaining and holding the smoke and gases back, in contact with the burning fuel—thus thoroughly consuming the gases, while their heat is compressed up into the cones, and made to impinge against and radiate from the tapering surfaces.—*thereby securing twice the heat from a given amount of coal that can be obtained from any other plan known to man.* This Furnace is very simple in its construction, and easily managed, and much less liable to need repairs than any other plan of Furnace in use.

Also five sizes of PORTABLE FURNACES, on the same principle, that are giving the most perfect satisfaction. The Cone Furnace received a Gold Medal at a recent fair in Boston, and the only gold medal ever awarded to a Furnace in Massachusetts.

CHILSON'S PATENT
ELEVATED DOUBLE-OVEN COOKING RANGE.

Housekeepers and others interested in the use of Ranges or Stoves, whether wishing to purchase or not, are invited to examine the great improvements secured by five patented claims in this truly superior Range, now in so general use.

The subscriber confidently asserts these improvements to be far in advance of any other plan of Range or Stove in the United States, and believes an examination of them, together with the many thousand testimonials received from those in use, will fully substantiate this assertion. Sizes adapted for Hotels, Dwellings, Restaurants, or any public or private institution, fitted when desired with hot water backs for bathing and other washing purposes; hot air fixtures for heating additional rooms, and hot closets or plate warmers.

PARLOR STOVES.

CHILSON'S NEW PARLOR STOVE has great improvements over any other Stove in the market, for its great economy in fuel, keeping fire day and night, and warming the cold air near the floor for a great distance around the Stove. An Oven and Boiler attached when desired. Its arrangements for ventilating the room are complete. Call and see this Stove.

CHILSON'S NEW FLAT-IRON HEATER.—Just patented. Arranged so as to set into one of the boiling holes of a Range or Stove. The nicest invention ever devised for the purpose of effecting a great saving of fuel and Labor.

CHILSON'S NEW GRIDIRON.—Just patented. This is unquestionably the most perfect invention ever seen for broiling steak, etc., nice and quick, without one particle of smoke or odor from it in the room.

CHILSON'S NEW VENTILATOR AND DAMPER COMBINED.—Just patented. May be attached to the Smoke Pipe of any Furnace, Stove, etc., effecting a saving of at least 50 per cent. in fuel, and keeping one continuous fire through the season. Please notice this invention.

Circulars giving full descriptions of the above sent to any address.

Registers, Ventilators, Mantels, Frame Grates, Stoves, etc., with every variety of Heating, Cooking, and Ventilating Apparatus.

Personal attention given to their erection when desired. The above may be obtained at wholesale or retail, at my Store, 99 and 101 Blackstone Street, Boston, or at my Foundry in Mansfield, Mass.

PREFACE.

Strange as it may seem, it is nevertheless true, that few persons read a Directory through in course; indeed, after considerable experience in Directory matters, we can safely affirm that in no case can we point to the individual who has commenced at the first and read to the last page—save and except the Compiler or Proof Reader. Yet few books are consulted more, or their pages turned over with more intense eagerness to satisfy a mind thirsting for knowledge. A lengthened perusal of its pages seems unnecessary—oft times a single line crowded with important facts and statistics furnishes food for the inquiring mind, and the book is closed with a satisfied air, and the knowledge thus acquired is not permitted to amuse the mind alone for the passing hour, but is put to practical use in business, or made to facilitate the re-union of friends separated by the incidents of our ever changing life.

Especial pains have been taken this year to render the PROVIDENCE DIRECTORY as accurate and complete as is possible for a work so difficult—and notwithstanding so many of the patriotic citizens have left the city for the privations and glory of the Camp, yet the number of names in the Directory this year will equal former years. While the price of paper, printing and labor has materially advanced, the price of the Directory remains the same as last year; and it is hoped that this fact will be duly appreciated by a generous public, by an increase in the sales of the work.
