Self-Clinching Belt Hooks.

These hooks are the strongest, lightest and most durable belt fastener made.

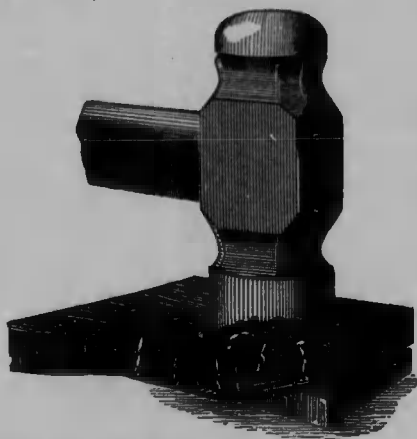

Among the many meritorious points are the following: No metal on the pulley side of the belt, as, *being self-clinching*, the points are buried in the stock, thereby keeping up a constant and equal friction.

Is the narrowest, and as a result, the least rigid, being adapted for the smallest size pulleys for any kind of machinery, and is at the same time equally appropriate for the largest and heaviest belts.

They are made of the very best and toughest material, and every hook warranted perfect and satisfactory.

For **Cone Belts** will outwear and outstand any other joint, and for **Cotton Belts** of all makes are the only **successful belt fastener** in the market, and for **repairing old belts**, they have no equal in economy of time or saving of stock.

The special attention of all who are using machinery, and are troubled with belts breaking or tearing out at the joints, is directed to the above points of merit in our Self-Clinching Belt Hooks. (Correspondence solicited.)

This practical and indispensable article—especially for wear where exposed to ice, snow, or slush—was first introduced by this company several years ago, and its real value is in being almost indestructible, when proper materials are used in its manufacture, whilst the cheap, inferior quality forced on the public by reckless imitators of our patent goods, soon becomes brittle and crumbles to pieces. PREFACE.

The PROVIDENCE DIRECTORY and RHODE ISLAND BUSINESS DIRECTORY FOR 1885, the 45th in the series, is presented to the public at the usual time, with the usual features, and we believe, will receive the customary approval of its patrons throughout this City and State.

The typographical excellence attained last year, is preserved; every department in the book has been thoroughly revised and in many cases amplified; to the list of Institutions, Societies, &c., now an important division, many additions have been made; the Directory of Streets, Avenues, &c., and Buildings, Halls, &c., has been fully corrected; the revision of the city map has been made from a careful comparison with facts obtained at the City Engineer's office, and the new boundary lines of Swan Point Cemetery have also been added.

The information given in the General and Business Directories is the result of a thorough and intelligent canvass of the City and State. There are, as must be apparent to everyone, many obstacles to be met with and overcome before the publishers can issue such a work as this and claim for it, as they do, any great measure of accuracy. Many of these hindrances are seemingly unavoidable, but there is one troublesome feature in every canvass of this city, which not only adds to our labor, but is the cause of unsatisfactory information, and this is the poor and incomplete numbering of houses on some streets and the total lack of numbers on others. The action of the city government within the last few weeks, gives assurance, however, that this will be remedied, for the work of street numbering has been taken from an already overworked city official and given to another, who, we presume, will have ample time to attend to what is a matter of no small importance when the convenience of the public is taken into consideration.

This change is the result of very natural causes and points to this fact, that as a city grows, the work in the various departments correspondingly increases, and new demands are made, which call not only for more assistance in these departments, but perhaps for new divisions of labor and even new departments.

It certainly would be of great convenience to the public, if, at our City Hall, there could be found plans of the streets and avenues within the city limits, giving the numbers to each house or lot and at intersections of streets, and when there have been changes of numbers, the old as well as the new ones, for purposes of identification. By a simple reference to these street plans, the city official could readily give to any citizen such information as he desired, and there would be much saving of time, labor and annoyance to both citizen and official. An ordinance requiring of the owners or tenants of premises, a practical recognition of any number officially assigned them, would perhaps, if carried out, give good results.

The population of the city is rapidly increasing, and although during the last twelve months the growth has been much smaller than in previous years, yet we believe the census of 1885 will show an increase over that of 1880, of more than 20,000.

The city of Providence possesses, to-day, very many advantages. Her geography, climate, wealth, varied business interests, and the character of her citizenship are all in her favor. But we must look beyond all these facts to find a surety for her future greatness. The great questions which are now pressing to the front must be wisely settled. Improved terminal facilities for railroads now entering the city and for lines to be constructed, generously inviting trade from north, south and west; harbor improvements, opening up a highway to the ocean and establishing a commercial importance throughout the world; a sewerage system thorough and complete, and public parks extended and beautified, both ensuring health, comfort and happiness—when this shall be accomplished, then will Providence become a permanently prosperous city.

The changes which have occurred among our citizens during the past year, as recorded on the pages of this Directory, are as follows: Of those whose names appeared in the Directory of 1884, 7765 have changed the location of their residences, 1164 their business location, 1353 the nature of their business or occupation, and in 224 firms changes have been made either in their names or membership.

The following is a list of citizens whose names appeared in the first Directory of Providence published in 1824, and are recorded in the Directory of 1885. The year of birth is also given: Resolved Waterman, 1787; George Burr, 1792; Philip W. Martin, 1795; John Warharkness, 1799; Lucian Draper, 1800; Jonathan G. Draper, 1801; James C. Bucklin, 1801; David W. Pettay, 1801; R. H. N. Bates, 1801; Amasa Waterman, 1801; Jonathan Congdon, 1802; Thomas R. Briggs, 1807; John S. Harris, 1809; Jeremiah S. Barrett, 18

From this list, the location of any number on a street can be easily ascertained; as, for instance, wishing to know at what part of High Street No. 321 comes, you look at High Street, upon page 18, and find that Spring Street runs from 224, and Winter Street from 321, showing that 321 High Street would come about half-way between Spring and Winter Streets.

The dust and dirt, as fast as beaten out of the fabric, are removed from the compartment where the carpets are beaten, by an EXHAUST FAN, which also removes and carries out of the room any moth or larva which may be beaten out of the carpet with the dirt and dust, so that there is no possibility of their settling back on the carpet.

PROVIDENCE STEAM TRAP COMPANY,

NEWTON'S PATENT

Steam Trap,

Newton's Patent Oscillating Fire Bars,

Newton's Patent Compensating Valve.

THE attention of Manufacturers and Steam Users in general is called to our **STEAM TRAP** which we claim to be superior to any other now in use, and to have a simplicity of construction which alone gives it an advantage over all others. It cannot get out of order as it always works to a face and will stand a pressure of from 1 to 140 pounds and is adapted to conditions where much dry Steam is needed. We shall be glad to send one of these Traps to any one who may wish to try it, and it can be retained for thirty days and if not satisfactory, returned at our expense. We have sold our Traps to some of the largest mills in New England where they are working and giving perfect satisfaction.

THE PATENT FIRE BARS,

Which are very much appreciated where they are used, will consume from 1 to 20 pounds of fuel per square foot per hour, and will not warp as they are free from expansion and contraction, both transversal and longitudinal.

The following Companies, etc., to whom we refer have them in successful operation:—Providence Worsted Mills, Providence, R. I.; Lewiston Bleaching and Dyeing Co., Lewiston, Me.; Shove Mills, Fall River, Mass.; Elizabeth Mills, Hill's Grove, R. I.; Augustus Chase, Fall River, Mass.; Durfee Mills, Fall River, Mass.; S. H. Greene & Sons, River Point, R. I.

We thank our patrons for past favors, and hope to be able to serve them as well, if not better in the future.

The remarkable and only process of combining Gutta Percha and other valuable materials with Linseed Oil, without the use of injurious solvents, is controlled and worked by us. By this process we manufacture a preparation which has

or any surface which requires protection from the weather. Because of its peculiar texture and elasticity, which allow it to expand and contract with the surface it covers

WITHOUT CRACKING.

It is especially adapted for use in either hot or cold climates. It resists the action of salt water, and for this reason is superior for

Marine Painting,

Or for buildings exposed to sea breezes.
