Honorable City Council
Committee on Public Works
City Hall
Providence, Rhode Island

Gentlemen:

The Traffic Engineering Department has investigated Laurel Hill Avenue between Pocasset Avenue and Plainfield Street relative to establishing it as a one-way street in a northerly direction as requested. As a result of this investigation, we wish to submit the following report and recommendation.

Laurel Hill Avenue between Pocasset Avenue and Plainfield Street is only 22 feet wide between curbs with parking permitted on only one side. This means there is a maximum of 16 feet available for a two direction traffic movement when there are cars parked. While the parking demand is not extremely heavy, there is sufficient parking to create a considerable amount of congestion at times. This congestion can be eliminated in large part by either eliminating all parking on this portion of Laurel Hill Avenue or by making this section one way. In view of the lack of off-street parking available to the commercial establishments in the area, it is felt that making the street one way will provide the maximum amount of relief and at the same time cause the least amount of inconvenience to the residents and motorists using these streets.

It is therefore recommended that the appropriate resolution be passed by the City Council establishing Laurel Hill Avenue as a one-way street in a northerly direction from Pocasset Avenue to Plainfield Street.

Very truly yours,

Roger T. Chandler
Traffic Engineer
