D. Everett Whelan, City Clerk  
City Hall  
Providence, Rhode Island

Dear Mr. Whelan:

Reference is made to the Resolution of the City Council adopted September 6, 1962 which requests the Housing Authority to consider equipping with gymnasium apparatus, the auditorium facilities at Chad Brown Houses.

To do so would be impractical because of other uses being made of the facilities. It is a meeting place for boy scouts, golden agers, baby clinics and two Catholic masses on Sunday. It is also going to be used by the Smith Hill Girls Club for some of their activities until such time that permanent quarters can be developed for them.

We would be very happy to cooperate with the Department of Recreation in planning some activity on the days or evenings that the auditorium facilities are not used; also, in supervising the use of the outdoor basketball areas that are available at both Chad Brown and Admiral Terrace.

Sincerely yours,

IN CITY COUNCIL

City Hall  
Providence, Rhode Island

Dear Mr. Whelan:

Reference is made to the City Council Resolution No. 343 approved June 8, 1962 requesting the Housing Authority to consider the development of an apartment housing unit in the vicinity of the State House on Smith Hill for elderly low-income residents of the City of Providence.

If the Public Housing Administration approves an allocation of more units for the elderly the Commissioners of the Authority would be happy to consider that area during the site selection period.

Sincerely yours,

IN CITY COUNCIL

## CITY OF PROVIDENCE MILK DEPARTMENT

JOSEPH SMITH, M. D.  
Superintendent of Health  
Inspector of Milk, ex-officio  
Health Dept., 161 Fountain St.

RICHARD S. MCKENZIE, B.S.  
Deputy Inspector of Milk  
Laboratory and Office at  
Charles V. Chapin Hospital

### QUARTERLY REPORT OF THE QUALITY OF MILK SOLD IN PROVIDENCE BY RETAIL DISTRIBUTORS

The following table gives the results of the average of analyses made by this department during the second quarter of the year 1962:

No distributor's name is listed under a particular grade of milk unless at least four samples of that grade were analyzed during the quarter. The standard plate count of colonies of bacteria is obtained by using the logarithmic average set forth in the United States Public Health Service Milk Code.

#### CERTIFIED MILK

The legal standards for Certified Milk are those adopted by the American Association of Medical Milk Commissions, Inc. and in effect at the time of production.

Unless otherwise indicated on the label it shall contain an average of 4.0% of butter fat with a minimum of 3.5% for individual samples and a minimum of 12% of total solids.

The average bacterial count of Pasteurized Certified Milk shall not exceed 500 colonies of bacteria per cubic centimeter.

NAME OF DEALER	BUTTER FAT	TOTAL SOLIDS	*Standard Plate Count. Colonies of Bacteria in One Cubic Centimeter
	Per Cent	Per Cent	
Whiting Milk Co.....	4.01	12.97	15

#### GRADE A MILK—PASTEURIZED

Grade A Pasteurized milk is produced on farms scoring not less than 85% using the dairy score card of the U. S. Department of Agriculture. The butter fat shall average not less than 3.50% for any four samples taken in a period of not less than 30 days or more than 90 days. The bacteria count shall have a logarithmic average of not greater than 10,000 for any 4 consecutive samples.

The Milk Solids Not Fat shall average 8.50%.

### PASTEURIZED SELECTED MILK

Under state law only three grades of milk are recognized, Certified, Grade "A", and Regular. Milk may also be classified as homogenized, skim, or defatted. Buttermilk and Cultured Buttermilk are other recognized types defined by state law. Goat milk is also defined. All milk sold in the City of Providence is required to be pasteurized.

While there is no separate legal classification of Pasteurized Selected Milk, some dealers utilize this "grade" as a price differential. Check this grade with dealer's Grade "A" or Regular.

Whiting Milk Co.....	3.79	8.61	1,250

\* STANDARD PLATE COUNT—The counts as listed are not all in accord with the "Standard Methods for the Examination of Dairy Products" as at present in force. Inasmuch as Standard Methods tries to overcome human errors as much as possible, only plate counts between 30 and 300 are to be tabulated. Inasmuch as direct plating, without dilution, would render the plate difficult to count through the milk cloud, most dilutions are 1:10 or 1:100. As most of the plates show a count under 30, Standard Methods insists that such plates be listed and averaged as less than 300, (30 times 10), organisms per millilitre. It is our feeling, however, that our method serves as a goal and greater incentive towards purer milk. This heading should preferably read PLATE COUNT.

Respectfully submitted,

JOSEPH SMITH, M.D.
