A N A C T

RELATING TO ASBESTOS ABATEMENT

Introduced By:

Date Introduced:

Referred To:

It is enacted by the General Assembly as follows:

SECTION 1. Section 23-24-5-6 of the General Laws in Chapter 23-24 entitled "Asbestos Abatement" is hereby amended to read as follows:

23-24-5-6 Asbestos Abatement Plans - (a) The owner of any public or private building containing friable asbestos material in violation of this chapter who shall within one hundred twenty (120) days of notice of the violation, file an abatement plan with the director, shall be relieved of liability for such violation during the abatement process. For buildings in the high and immediate priority group found by the director or his agents to require abatement after inspection, the director shall so notify in writing, the owner, in the case of public buildings, the appropriate public agency or elected, appointed, or employed official with jurisdiction over the building; or, in the case of a private building, the owner or manager of the building.

(b) (Omitted.) Said person or agency shall within one hundred twenty (120) days of said notice, file an asbestos abatement plan with the director. Such a plan shall describe in detail the results of any asbestos detection tests performed, a blueprint of the structure involved, a program designed to (i) monitor the physical conditions of asbestos-containing materials, (ii) to educate the building staff and occupants regarding the presence of asbestos, (iii) to minimize the likelihood of fiber release, and (iv) to minimize the potential of human exposure to asbestos. The plan should further include a description of the remedies proposed, including but not limited to repair, enclosure or encapsulation, and/or removal, the process of selection and criteria for hiring licensed contractors, a time schedule for completion, disposal location, and the level of compliance with exposure and action criteria expected to be achieved.

The requirement for filing an asbestos abatement plan with the director prior to the removal of any friable asbestos material shall be waived whenever a public building, private building, or residence has been ordered demolished by a municipal building official in accordance with 23-27.3-125.5.; provided that all friable asbestos material is removed from the building prior to demolition by a licensed asbestos contractor following an asbestos abatement plan previously approved by the director specifically for the demolition of unsafe structures. The director may require the filing of whatever documentation may be deemed necessary to insure that compliance with the act has been met.

(c) The department director shall within ninety (90) days of submission of a plan, either approve or amend, or reject the plan of abatement.

(d) Within one hundred eighty (180) days after the effective date of this chapter, the director shall issue regulations establishing criteria for the inspection of buildings, identification and evaluation of asbestos hazard, the ranking of asbestos abatement and the development of abatement plans.

(e) The owner of any building failing to comply with an order of abatement issued by the director, after hearing, shall be fined by the director an amount not exceeding five hundred dollars (\$500) a day or of having the area in violation subject to closure. No such fine shall apply if such area is closed to the public.

This act shall take effect upon passage.

#### EXPLANATION

This act allows local municipal building officials to condemn and demolish buildings containing friable asbestos material, based on a plan previously approved by the director of health.

This act shall take effect upon passage.
