### QUARTERLY REPORT OF THE QUALITY OF MILK SOLD IN PROVIDENCE BY RETAIL DISTRIBUTORS

The following table gives the results of the average of analyses made by this department during the fourth quarter of the year 1962:

No distributor's name is listed under a particular grade of milk unless at least four samples of that grade were analyzed during the quarter. The standard plate count of colonies of bacteria is obtained by using the logarithmic average set forth in the United States Public Health Service Milk Code.

## PASTEURIZED SELECTED MILK

Under state law only three grades of milk are recognized, Certified, Grade "A", and Regular. Milk may also be classified as homogenized, skim, or defatted. Buttermilk and Cultured Buttermilk are other recognized types defined by state law. Goat milk is also defined. All milk sold in the City of Providence is required to be pasteurized.

While there is no separate legal classification of Pasteurized Selected Milk, some dealers utilize this "grade" as a price differential. Check this grade with dealer's Grade "A" or Regular.

\* STANDARD PLATE COUNT—The counts as listed are not all in accord with the "Standard Methods for the Examination of Dairy Products" as at present in force. Inasmuch as Standard Methods tries to overcome human errors as much as possible, only plate counts between 30 and 300 are to be tabulated. Inasmuch as direct plating, without dilution, would render the plate difficult to count through the milk cloud, most dilutions are 1:10 or 1:100. As most of the plates show a count under 30, Standard Methods insists that such plates be listed and averaged as less than 300, (30 times 10), organisms per millilitre. It is our feeling, however, that our method serves as a goal and greater incentive towards purer milk. This heading should preferably read PLATE COUNT.
