

Office of the Internal Auditor
City of Providence

November 25, 2019

Council President Sabina Matos
City of Providence
25 Dorrance Street
Providence, RI 02903

Dear Council President Matos:

I am writing to formally submit to the City Council the review of the Code of Ordinances, Chapter 12, "Health and Sanitation", Article III, "Garbage, Trash and Refuse", section 12-63 (d).

It was brought to my attention that the cost of the violation for late removal of trash receptacles was not in accordance with the Code of Ordinance, as amended in 2011. This report will confirm that violators were overcharged and reimbursements should be due to those overcharged.

Sincerely,

A handwritten signature in blue ink, appearing to read "Gina M. Costa".

Gina M. Costa
Internal Auditor

IN CITY COUNCIL

DEC 05 2019

READ
WHEREUPON IT IS ORDERED THAT
THE SAME BE RECEIVED.

APPENDIX A: Ordinance 2011-326

[Amendment to the Code of Ordinance Chapter 12 Article III, Section 12-63\(d\)](#)

APPENDIX B: Early Storage/Late Removal Violations Paid (V02) July 28, 2011 – September 17, 2019

APPENDIX C: Environmental Violation (Redacted)

APPENDIX D: Alphabetical List of Streets with Pickup Day

APPENDIX E: Map of Pickup Days by Area and Streets

THIS PAGE INTENTIONAL LEFT BLANK

SCOPE:

It has been brought to my attention that homeowners were being fined incorrectly for violating the Code of Ordinances, Chapter 12 "Health and Sanitation" Article III, "Garbage, Trash and Refuse" Section 12-63 (d). Therefore, the office of the internal auditor conducted a review of these violations dating back to the effective change of the ordinance, July 28, 2011. The ordinance can be found in Appendix A.

During the period of July 28, 2011 through September 17, 2019 there were over thirty thousand (30,000) environmental violations issued, of which one thousand thirty-six (1036) violations were reported as paid relative to Chapter 12 Article III, Section 12-63 (d). Nine hundred forty (940) of the one thousand thirty-six (1036) violations were for late removal, eighty-five (85) were for early storage violations, and eleven (11) were coded incorrectly. Based on the data provided and approach taken, the amount charged, that appears to be outside the ordinance, to homeowners is approximately \$30,625.00.

SUMMARY RECOMMENDATIONS:

1. Comply with the City ordinances.
2. Create a separate violation code for late removal of trash receptacles on the violation tickets.
3. Create a database of tickets from issuance to final outcome.
4. Create policies and procedure for issuing violations.
 - a. Identify any previous violations
5. Create routes to physically monitor each neighborhood the day before and after garbage pickup.
6. Review each violation to confirm that coding and dates are correct.
 - a. Upon completion, reimburse all late violations, \$25.00, \$50.00, or \$75.00 based on the penalties incurred due to lateness.
 - b. Confirm violations from September 17, 2019 to current have been charged correctly.
7. Review vendor reports on a monthly basis for accuracy of coding.
8. Educate the public on the City's environmental ordinances.

BACKGROUND

The initial request to the Department of Public Works (DPW) for information began October 2, 2019. The request included a list of violations to Chapter 12 Article III Section 12-63 of the Code of Ordinances, as well as any policies, procedures or protocol for issuing the violations. On this date, it was communicated that a request for the violations was submitted to the third party vendor, Conduent State and Local Solutions, Inc. (the vendor) and "a report would be forthcoming in a few days and a copy would be provided." When asked questions about how fines were issued and protocol for issuance, the department's response was "Mike McKenna will review your questions with the Administration and we will get back to you with the answers".

On October 7, 2019, a follow up email with the same request was sent to the Director of Operations, Sabrina Solares-Hand, because the Director of DPW resigned, the Deputy Director of DPW was on vacation for two weeks and the Associate Director of Environmental Control also resigned.

By October 9, 2019, there was no response from the Director of Operations and still no copy of the report from the vendor. The Director of Operations was emailed again and asked about receipt of the report from the vendor. The response received reads as follows:

“The DPW team did receive some information that was needed for analysis and is working to examine the findings so that we can better understand the full circumstance. The team has prioritized reviewing the information to inform next steps. As soon as we have that full review completed we will be in touch”

Since the Administration was obstructing information, the vendor was contacted directly that day. They provided the list of violations (coded V02) on October 11, 2019. A copy of this report is provided in Appendix B. (Note: Names and addresses are not disclosed).

A review of the physical violation ticket was necessary to determine if the violation was for early storage or late removal because there was no difference in fee or code for an early or late violation in the report provided. All fines for this violation were \$50.00. The next step was to proceed with this review and determine whether the penalty was for early storage of the receptacles (prior to 4:00 p.m. day before pickup) or late removal (after 12:00 midnight day of pickup).

The physical violation ticket sent to the homeowner does not reflect the change to the ordinance which created a lower fee of \$25.00 per late violation. The V02 category of the ticket is a combined violation for “early storage/late removal of trash containers (Sec. 12-63)”. This is a fifty dollar (\$50.00) fine. The department did not amend the violation notice upon passage of the amended ordinance. This is the basis of the incorrect violation fees for late removal of trash receptacles. Appendix C is a redacted copy of a “Notice of Environmental Violation.”

An attempt was made to review all 1036 violations to determine early storage or late removal. The department provided 15 boxes of records dating back to 2014, which included all environmental violations. The attempt was unsuccessful because of the filing method. There were some violations filed numerically by year while others were filed by last name and date resolved. It was a burdensome task due to the difficulty of locating the actual violations.

The new approach to determine if the violation was early storage or late removal was based on the issue date of the violation, as provided in the vendor’s report. Chapter 12, Article III, Section 12-63 (a) identifies the definition of early. “...**“Early” shall mean prior to 4 p.m. on the day preceding the date of garbage collection.**” Therefore the assumption was made that early violations occur only on the day before garbage collection. If the violation is issued on any other day, it is assumed to be a late removal of trash receptacles. For example, if the pickup for a property is on Thursday and the ticket is issued on Wednesday, it is considered early. Any other day of issuance for this property location would be considered a late violation. Table 1. shows which days the violation was deemed early based on the pickup day.

Table 1. Early Violation Issue Days	
Pickup Day	Violation Issue Day
Monday	Friday/Saturday
Tuesday	Monday
Wednesday	Tuesday
Thursday	Wednesday
Friday	Thursday

In order to determine the trash pickup day by address, we obtained the list of streets with the day of pickup on Waste Management's website:

(https://www.wm.com/us/local/ri/providence/residential?cmp=ag_home_2019-08-02_usa_ri_providence).

The full list can be located in Appendix D (The city was unable to provide us with pickup day by street, but they did provide a map, which is Appendix E). The data provided by the vendor, which included a list of all violations, was sorted by street name and then cross referenced to Waste Management's street listing pickup schedule.

Once the violation was identified as either an early storage or a late removal, the amount over charged was calculated. Only the late removals are entitled to a refund. Late penalty fees, clearly stated on the ticket, include doubling of the fine after fourteen days and tripling of the original fine after twenty eight days. The amounts paid are clear in the report. With some exceptions, payments were made in the amounts of \$50.00, \$100.00, or \$150.00. The \$50.00 payments were paid on time but should have only been charged \$25.00. The \$100.00 payments represent a doubling of the fine (14 days late), but should have only been charged \$50.00 (\$25.00 x 2). The \$150.00 payments represent a tripling of the fine (28 days late) but should have only been charged \$75.00 (\$25.00 x 3). Table 3 shows the total cost of the reimbursement due to individuals who were over charged according to the Code of Ordinances, Chapter 12, Article III, Section 12-63 (d), late removal violation.

Table 3: Breakdown of Late Violations by Amount Paid					
	Count	% of Total	Paid	\$\$ Due	\$\$ Total
Paid on time	726	70.83%	50.00	25.00	18,150.00
Violation Doubles (after 14 days)	89	8.68%	100.00	50.00	4,450.00
Violation Triples (after 28 days)	107	10.44%	150.00	75.00	8,025.00
Payment of \$25.00 or less	18	1.76%	\$25.00 or less	None	
	940		Total to Reimburse:		30,625.00

During the review, there were nineteen tickets that were anomalies to our assumptions and feedback was requested from the department. The anomalies were payments inconsistent with \$50.00, \$100.00 or \$150.00. Of the nineteen, it was determined that eleven of these tickets were coded incorrectly. The

remaining eight were either sent to the collection agency and accrued interest or had a \$25.00 bounced check fee applied. Those sent to the collection agency had the opportunity to pay the violation, request a conference, and/or go to trial. All of those options were ignored. Based on the review, the maximum amount owed should not exceed \$75.00.

Table 4. Vendor Count Reconciliation	
Late Violations	940
Early Violation	85
Incorrect Coding	<u>11</u>
Vendor Report:	1036

During the review of all “early storage/late removal” violations (V02), there were tickets that were dismissed for various reasons or considered a warning. The department does have a paper trail of the dismissals. When the department dismissed the violation or issued a warning, it did not appear on the vendor’s list. It is important to note that the one thousand thirty-six (1036) violations represent the number of violations paid during this period, not issued.

RECOMMENDATIONS AND *DEPARTMENT RESPONSE (italicized)*:

1. Comply with City Ordinances.

This ordinance was amended in July 2011, effective without the Mayor’s signature. The Administration should have communicated the change to the respective department so the proper changes could have been implemented on the physical violation ticket.

The department is currently in the process of updating the software used to issue violations, correcting the fee structure to comply with the ordinance.

2. Create a separate violation code for late removal of trash receptacles on the violation tickets.

As shown in Appendix C, the fee structure for environmental tickets was never changed. Any time a fee is changed, the respective department should print new tickets with the new fee structure. Due to the progressive charges for this violation, there should be an area to include any previous violations of this code. Until the new tickets are printed, there is space on the tickets to write in the violation offense and write in the correct fee.

The department is creating a separate code for the late removal violation.

3. Create a database of tickets from issuance through final outcome.

Since the filing system does not file by ticket number, a database should be created to include all aspects of the violations. If this is done, it can be sorted by any one of the various fields on the violations. This provides the department with the capability to review the status of unpaid tickets by name, address, code, etc. It is possible that the department does maintain something like this, since the response to the tickets that were submitted for further review as anomalies was received within one day. If this is true, it was not shared with us.

The department utilizes the vendor's (Conduent State & Local Solutions, Inc.) database to maintain records. They have the ability to review all past violations. This is city owned data that is hosted by the vendor.

4. Create policies and procedure for issuing violations.

a. Identify any previous violations

When inquiring about written policy, procedure for issuance and protocols used for issuance, the response included:

- "When an inspector receives a PVD311 complaint for a particular street, the inspector will proactively look into other environmental issues in the area."
- "This includes both reported and non-reported potential violations."
- "Inspectors typically visit locations cited that have been reported with storing their bins too late two days after the assumed date of violation to ensure that there is clearly a violation."

There were no formal written policies or procedures available during the period under review.

A true proactive approach would consist of educating residents of all environmental violations, placing the allowed time that the receptacles can be out on the city provided receptacles; send out informational notices that the city does have time restrictions in coordination with the recycle initiative.

During the scope of the audit a second violation to the same dwelling was not found. There should be a method to quickly and easily determine the number of occurrences a dwelling has received so the Environmental Specialist can issue correctly.

The department is in the process of hiring a new Associate Director of Environmental Control. One of their duties will be to create written policies.

5. Create routes to physically monitor each neighborhood the day before and the day after garbage pickup.

There are currently six Environmental Specialists in the department tasked with multiple duties. One of their duties includes the issuance of environmental fines. If there is an Environmental Specialist assigned to each of the five areas of trash removal, two days per week can be spent in the each area for monitoring and compliance of all violations. The two days would be the day before trash pickup and the day after trash pickup. It provides residents with the comfort that environmental violations are being addressed and routinely monitored. Waiting on PVD311 complaints is reactionary and causes focus on problem areas only. Meter checkers, firefighters and police officers are all responsible for a specific area. Apply this same area coverage model to the Environmental Specialist. The department has the availability to increase to seven Environmental Specialists. If the goal is compliance, education and routine monitoring is

essential. If seven Environmental Specialist are not enough, the department can request additional personnel in the upcoming budget season.

This is a current practice. Environmental Specialists are assigned to wards.

6. Review each violation to confirm that the coding and dates are correct.

Due to the approach taken, and discovery that some of the violations were coded incorrectly, it is strongly advised to review every one that has been listed for reimbursement to confirm that it is a late removal violation. We did not have allowance to access any computer based spreadsheets or databases. All of the files were physically in the auditor's office. Department personnel were quick to respond to an inquiry without the files, which gives the impression that there is a computer based library of these violations. Each one should be individually reviewed for confirmation. If additional fines are coded incorrectly, the total amount owed could be reduced.

- a. Upon completion of review, reimburse all late violations, \$25.00, \$50.00, or \$75.00 based on the penalties incurred due to lateness.

- b. Confirm that violations from September 17, 2019 to current have been charged correctly.

The department will review the tickets in the vendor's database to confirm that each of the 940 have been correctly identified as a late violation to ensure that a refund is warranted. Additionally, review any violations issued since September 17, 2019 to ensure the fee of the violation is accurate.

7. Review vendor reports on a monthly basis for accuracy of coding.

Vendor reports should be provided monthly with the invoices. These should be reviewed at that time to confirm accuracy of violation code and fees charged. This helps with historical data of enforcement.

The accuracy of tickets should improve dramatically now that the department has implemented the use of handheld devices. Previously, tickets were hand written and then input to the vendor's system for tracking.

8. Educate the public on the City's environmental ordinances.

The city and recycling pickup vendor have educational material for the importance of recycling and what to recycle. The violations of recycling should be included, along with environmental violations. The timeframe that receptacles can be placed on the curb should be part of the education.

The city provides each dwelling with proper receptacles for trash disposal and recycling. Each container has the city seal and a numerical identification code. The acceptable day and time of curb placement should be put on all containers the city distributes.

New education material will be the responsibility of the new Associate Director of Environmental Control.

At this time, it is not feasible to include the day and time of curb placement on each receptacle due to associated cost.

APPENDIX A: Ordinance 2011-36 No. 426

“Amending Chapter 12, “Health and Sanitation,” Article III, “Garbage, Trash and Refuse”

City of Providence
STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS

CHAPTER 2011-36

No. 426 **AN ORDINANCE**

AMENDING CHAPTER 12, "HEALTH
 AND SANITATION," ARTICLE III,
 "GARBAGE, TRASH AND REFUSE."

EFFECTIVE ~~XXXXXX~~ July 28, 2011
Be it Ordained by the City of Providence:

SECTION 1. The Code of Ordinances of the City of Providence, Chapter 12,

"Health and Sanitation," Article III, "Garbage, Trash and Refuse," is hereby amended as

follows:

Sec. 12-63. Time to place waste for collection; duty to remove after collection.

(a) The owner of any dwelling shall be deemed to have allowed an unsanitary condition and a nuisance to exist whenever garbage, trash or debris at that dwelling is placed out early for municipal collection. "Early" shall mean prior to 4 p.m. on the day preceding the date of garbage collection.

(b) The owner of any dwelling shall be deemed to have allowed an unsanitary condition and a nuisance to exist whenever containers used for the deposit of garbage, trash or debris at that dwelling are not removed from the public way by midnight of the designated collection day for that particular area of the city.

(c) Except for the placement of containers on the public way for trash collection, an owner of any dwelling shall be deemed to have allowed an unsanitary condition and nuisance to exist at that dwelling whenever containers for the storage of garbage, trash or debris are not screened or are otherwise viewable from the street. This provision shall not apply to nonresidential uses.

(d) Penalties for violation of subsection (b) shall not be assessed at more than one thousand five hundred dollars (\$1,500.00) cumulatively per calendar year for each individual dwelling. The penalty shall not exceed twenty-five dollars (\$25.00) for the first violation, fifty dollars (\$50.00) for the second violation, and one hundred dollars (\$100.00) for all subsequent violations occurring within a calendar year.

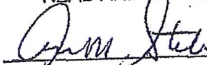

Sec. 12-80. Penalties for littering violations.

(a) Unless otherwise specified, the penalty for violation of any provision set forth herein shall be one dollar (\$1.00) to five hundred dollars (\$500.00), provided, however, that any individual electing to admit the violation charged and electing to appear before the clerk of the court or to mail notice of violation shall be penalized as follows:
