"Letters?"

They do get in, oftentimes, where a salesman cannot. They have no expense accounts, and if the right kind, are sure to be read.

But they must be done right. They must make a personal appeal, and avoid the appearance of a "form" letter.

This can only be done on a typewriter, or a machine that faithfully reproduces the hammer blow of type through ribbon,-just as the typewriter does it.

Our mechanical equipment, and our peculiar facilities for compiling lists, mean unusual service in direct advertising.

PUBLICITY ENGINEERING

is practical application of correct theories IN BUSINESS.

THE FIRST PRINCIPLE
is to get complete and accurate information about your

Customers; perhaps you might serve them in ways not thought of, if you knew more about them, and they about you.

Customers-to-be; but how can you get hold of them unless you look them up, and you might as well look them all up while you are doing it, for Directory lists make this easy.

Supply Men; Some are better than others, know about them all—and choose.

Competitors; they exist—let them and the public know you exist—for a purpose.

THE FIRST SOURCE of information about a business is ***The Directory.*** It is made from actual canvass and forms the basis of every kind of "mailing list", "trade directory", "reference book" or "buyers guide" in this territory. The original is best and you should study its pages, and be represented therein yourself, for

Bricks Without Straw

In ancient times, we are told, the Israelites were forced to do their work without the proper materials. They did it—after a fashion—but at an enormous cost in time and labor. Labor was cheap in those days however, and their task masters had the power to insist upon the full quota being given in spite of limitations.

Now the labor market is high, yet, in many cases history repeats itself. We still often see business trying to get along without the proper tools or with antiquated equipment.

You *can* do business without the telephone; it is possible to get along without a typewriter; you may use a quill pen for your correspondence if you so desire; it is your privilege to be without insurance, or the latest directory. If you wish you may still use a mailing list that was old when grandfather was a boy.

If the results are not entirely satisfactory, it is up to you.

Some firms prate wisely of business efficiency and then lose time and money sending to wrong addresses culled from an out-of-date directory. Rather than spend the few dollars necessary to insure themselves being properly listed under all the headings applicable to their business, they run the risk of letting their competitor get their trade. They save the first cost of an up-to-date mailing list and waste postage stamps by the gross.

Would you improve on old methods? Then phone or write at once for particulars to
