22-1-2. Districts. – The state is hereby divided into thirty-eight (38) senatorial districts bounded and described as follows:

(1) it is understood and intended that for the purpose of this section a line described as running on, along, to or through any street (including road, avenue, lane, way, parkway, expressway, divided highway, state route or interstate route, or trail), stream or river, is intended to mean the center line of such street, stream or river, in all instances, unless the same shall be otherwise specified:

(2) It is further understood and intended that for the purpose of this section, the districts described herein shall be composed of United States census geography (tracts and blocks), as defined by the 2000 version of the "TIGER" files from the United States Census Bureau, whose boundaries correspond to the below metes and bounds set forth herein and which are hereby made a part of this chapter. A listing of which census blocks are contained within each district shall be deemed to be incorporated by reference.

(3) It is further understood and intended that for the purpose of this section, the districts will be depicted on thirty-nine (39) maps, compiled by Election Data Services, Inc. for each city and town, and hereinafter may be referred to as town maps.

The secretary of state shall keep a copy of each set of the foregoing maps and a copy of the census tract and block listing available for inspection during ordinary business hours at his/her office. The secretary of state shall furnish each city and town a copy of the town map covering that particular city or town within ten (10) days from the passage of this act.

For purposes of this title, references to "tract" or "CT" shall mean "census tract", as that demographic unit is established by the United States Bureau of the Census for the 2000 census as described by maps and publications of the bureau. References to "block", "blocks", "block groups", "enumeration district", or "enumeration districts", refer to those demographic units as established by the United States Census Bureau for the 2000 census as described by maps and publications of the bureau.

Any reference to a "city or town", "city or town boundaries", or "city or town limits" shall refer to the boundaries or limits of the particular city or town as they existed on January 1, 2000.

1       In the census tract and block listing, the first two (2) digits of a census description shall  
2 refer to the state of Rhode Island (44), the next three (3) digits of a census description shall refer  
3 to the county in which the district lies. Bristol county carries the code 001; Kent county carries  
4 the code 003; Newport county carries the code 005; Providence county carries the code 007 and  
5 Washington county carries the code 009. The next six (6) digits refer to the census tract within the  
6 county set forth in the description. The last four (4) digits refer to the census block within the  
7 census tract. "TIGER" is an acronym for the computer readable geographic data base that  
8 automates the mapping and related geographic activities required to support the United States'  
9 Census Bureau's census and survey programs and stands for "Topologically Integrated  
10 Geographic Encoding and Referencing."

11       If any census tract, block, block group, or enumeration district is omitted, listed more  
12 than once, or is only partially provided for, it is intended that the districts be defined in such a  
13 manner as to not omit any area of Rhode Island from a district and to comply with the standard of  
14 Articles VII and VIII of the Rhode Island Constitution requiring that districts be reasonably  
15 equal. In order to carry out the intent of the general assembly as expressed in this section the  
16 secretary of state, shall if necessary, undertake measures to insure compliance with this section.

17       In the event of a discrepancy between the metes and bounds description, the description

28 to mean the centerline of such street, stream or river, in all instances, unless the same shall be  
29 otherwise specified:

30 (2) It is further understood and intended that for the purpose of this section, the districts  
31 described herein shall be composed of United States census geography (tracts and blocks), as  
32 defined by the 2000 version of the "TIGER" files from the United States Census Bureau, whose  
33 boundaries correspond to the below metes and bounds set forth herein and hereby made a part of  
34 this chapter. A listing of which census blocks are contained within each district shall be deemed

1 to be incorporated by reference.

2 (3) It is further understood and intended that for the purpose of this section, the districts

4 and town, and hereinafter may be referred to as town maps.

5 The secretary of state shall keep a copy of each set of the foregoing maps and a copy of

7 office. The secretary of state shall furnish each city and town a copy of the town map covering  
8 that particular city or town within ten (10) days from the date of passage of this act.

9 For purposes of this title, references to "tract" or "CT" shall mean "census tract", as that  
10 demographic unit is established by the United States Bureau of the Census for the 2000 census as  
11 described by maps and publications of the bureau. References to "block", "blocks", "block  
12 groups", "enumeration district", or "enumeration districts", refer to those demographic units as

21 the code 003; Newport county carries the code 005; Providence county carries the code 007 and  
22 Washington county carries the code 009. The next six (6) digits refer to the census tract within the  
23 county set forth in the description. The last four (4) digits refer to the census block within the  
24 census tract. "TIGER" is an acronym for the computer readable geographic data base that  
25 automates the mapping and related geographic activities required to support the United States'  
26 Census Bureau's census and survey programs and stands for "Topologically Integrated  
27 Geographic Encoding and Referencing."

28 If any census tract, block, block group, or enumeration district is omitted, listed more  
29 than once, or is only partially provided for, it is intended that the districts be defined in such a  
30 manner as to not omit any area of Rhode Island from a district and to comply with the standard of  
31 Articles VII and VIII of the Rhode Island Constitution requiring that districts be reasonably  
32 equal. In order to carry out the intent of the general assembly as expressed in this section the  
33 secretary of state, shall if necessary, undertake measures to insure compliance with this section.

34 In the event of a discrepancy between the metes and bounds description, the description

1           SECTION 2. Chapter 22-1 of the General Laws entitled "Composition of Senate" is  
2 hereby amended by adding thereto the following sections:

3           22-1-1. Composition of senate. – Commencing on the first Tuesday in January, 2003,  
4 the senate shall consist of thirty-eight (38) senators, one (1) senator being elected from each of  
5 the senatorial districts into which the state is herein below divided.

6           22-1-2. Districts. – The state is hereby divided into thirty-eight (38) senatorial districts  
7 bounded and described as follows:

8           (1) it is understood and intended that for the purpose of this section a line described as  
9 running on, along, to or through any street (including road, avenue, lane, way, parkway,  
10 expressway, divided highway, state route or interstate route, or trail), stream or river, is intended  
11 to mean the center line of such street, stream or river, in all instances, unless the same shall be  
12 otherwise specified:

13           (2) It is further understood and intended that for the purpose of this section, the districts  
14 described herein shall be composed of United States census geography (tracts and blocks), as  
15 defined by the 2000 version of the "TIGER" files from the United States Census Bureau, whose  
16 boundaries correspond to the below metes and bounds set forth herein and which are hereby made  
17 a part of this chapter. A listing of which census blocks are contained within each district shall be  
18 deemed to be incorporated by reference.

19           (3) It is further understood and intended that for the purpose of this section, the districts  
20 will be depicted on thirty-nine (39) maps, compiled by Election Data Services, Inc. for each city  
21 and town, and hereinafter may be referred to as town maps.

22           The secretary of state shall keep a copy of each set of the foregoing maps and a copy of  
23 the census tract and block listing available for inspection during ordinary business hours at his/her  
24 office. The secretary of state shall furnish each city and town a copy of the town map covering  
25 that particular city or town within ten (10) days from the passage of this act.

26           For purposes of this title, references to "tract" or "CT" shall mean "census tract", as that  
27 demographic unit is established by the United States Bureau of the Census for the 2000 census as  
28 described by maps and publications of the bureau. References to "block", "blocks", "block  
29 groups", "enumeration district", or "enumeration districts", refer to those demographic units as  
30 established by the United States Census Bureau for the 2000 census as described by maps and  
31 publications of the bureau.

32           Any reference to a "city or town", "city or town boundaries", or "city or town limits"  
33 shall refer to the boundaries or limits of the particular city or town as they existed on January 1,  
34 2000.

1       In the census tract and block listing, the first two (2) digits of a census description shall  
2 refer to the state of Rhode Island (44), the next three (3) digits of a census description shall refer  
3 to the county in which the district lies. Bristol county carries the code 001; Kent county carries  
4 the code 003; Newport county carries the code 005; Providence county carries the code 007 and  
5 Washington county carries the code 009. The next six (6) digits refer to the census tract within the  
6 county set forth in the description. The last four (4) digits refer to the census block within the  
7 census tract. "TIGER" is an acronym for the computer readable geographic data base that  
8 automates the mapping and related geographic activities required to support the United States'  
9 Census Bureau's census and survey programs and stands for "Topologically Integrated  
10 Geographic Encoding and Referencing."

11       If any census tract, block, block group, or enumeration district is omitted, listed more  
12 than once, or is only partially provided for, it is intended that the districts be defined in such a  
13 manner as to not omit any area of Rhode Island from a district and to comply with the standard of  
14 Articles VII and VIII of the Rhode Island Constitution requiring that districts be reasonably  
15 equal. In order to carry out the intent of the general assembly as expressed in this section the  
16 secretary of state, shall if necessary, undertake measures to insure compliance with this section.

17       In the event of a discrepancy between the metes and bounds description, the description

24 districts bounded and described as follows:

25 (1) it is understood and intended that for the purpose of this section a line described as  
26 running on, along, to or through any street (including road, avenue, lane, way, parkway,  
27 expressway, divided highway, state route or interstate route, or trail), stream or river, is intended  
28 to mean the centerline of such street, stream or river, in all instances, unless the same shall be  
29 otherwise specified:

30 (2) It is further understood and intended that for the purpose of this section, the districts  
31 described herein shall be composed of United States census geography (tracts and blocks), as  
32 defined by the 2000 version of the "TIGER" files from the United States Census Bureau, whose  
33 boundaries correspond to the below metes and bounds set forth herein and hereby made a part of  
34 this chapter. A listing of which census blocks are contained within each district shall be deemed

1 to be incorporated by reference.

2 (3) It is further understood and intended that for the purpose of this section, the districts  
3 will be depicted on thirty-nine (39) maps, compiled by Election Data Services, Inc. for each city  
4 and town, and hereinafter may be referred to as town maps.

5 The secretary of state shall keep a copy of each set of the foregoing maps and a copy of  
6 the census tract and block listing available for inspection during ordinary business hours at his/her  
7 office. The secretary of state shall furnish each city and town a copy of the town map covering  
8 that particular city or town within ten (10) days from the date of passage of this act.

9 For purposes of this title, references to "tract" or "CT" shall mean "census tract", as that  
10 demographic unit is established by the United States Bureau of the Census for the 2000 census as  
11 described by maps and publications of the bureau. References to "block", "blocks", "block  
12 groups", "enumeration district", or "enumeration districts", refer to those demographic units as  
13 established by the United States Census Bureau for the 2000 census as described by maps and  
14 publications of the bureau.

15 Any reference to a "city or town", "city or town boundaries", or "city or town limits"  
16 shall refer to the boundaries or limits of the particular city or town as they existed on January 1,  
17 2000.

18 In the census tract and block listing, the first two (2) digits of a census description shall  
19 refer to the state of Rhode Island (44), the next three (3) digits of a census description shall refer  
20 to the county in which the district lies. Bristol county carries the code 001; Kent county carries  
21 the code 003; Newport county carries the code 005; Providence county carries the code 007 and  
22 Washington county carries the code 009. The next six (6) digits refer to the census tract within the  
23 county set forth in the description. The last four (4) digits refer to the census block within the  
24 census tract. "TIGER" is an acronym for the computer readable geographic data base that  
25 automates the mapping and related geographic activities required to support the United States'  
26 Census Bureau's census and survey programs and stands for "Topologically Integrated  
27 Geographic Encoding and Referencing."

28 If any census tract, block, block group, or enumeration district is omitted, listed more  
29 than once, or is only partially provided for, it is intended that the districts be defined in such a  
30 manner as to not omit any area of Rhode Island from a district and to comply with the standard of  
31 Articles VII and VIII of the Rhode Island Constitution requiring that districts be reasonably  
32 equal. In order to carry out the intent of the general assembly as expressed in this section the  
33 secretary of state, shall if necessary, undertake measures to insure compliance with this section.

34 In the event of a discrepancy between the metes and bounds description, the description

1 by census tracts and blocks, and the maps which shall be on file with the secretary of state, then  
2 the listing of census tracts and blocks shall take precedence and be controlling.
