Be advised that the catch basins at the corner of Moorland Avenue and Jastram Street have been cleaned in an attempt to alleviate the problem. In addition, this department reset several pieces of curbing. However, our inspection reveals that to resolve this problem in the gutter line (puddles of water) in its entirety, this section of the roadway needs to be scarified and resurfaced. We will add this location to our future paving list.

Inspection of this location reveals that puddling is caused by the settling of the curbing which this department will schedule for resetting in the spring. Also to resolve this problem in its entirety, we will add this location to our future paving program list.
