TO The Honorable Members of the City Council

City Hall

Providence, Rhode Island

Dear Sirs:

May 10-17, 1964 has been designated as "National Police Week" throughout America. In conjunction with this proclamation, the Providence Police Department is planning several events. Enclosed please find copy of all scheduled events which will be held by this department.

I would like at this time to invite the Honorable Members of the City Council to be in attendance at any event which they may desire.

During "National Police Week" of last year, a specially conducted tour of the Police Headquarters building was held for members of the City Council, also a Firearms Demonstration at the Police Pistol Range in Scituate, R.I. at which members of the council were invited. Through circumstances beyond their control, several members were unable to be present for the tour of the building or for the Firearms Demonstration and I would like to suggest, if possible, those gentlemen visit with us for these two events this year. Any member of the council, wishing to join us for the secondtime, is most welcome.

I sincerely hope, that each member of the Honorable Council, will avail himself of the opportunity to view "behind the scene" functions of the Providence Police Department.

Respectfully yours,

*Howard A. Franklin*

**QUARTERLY REPORT OF THE QUALITY OF MILK SOLD IN PROVIDENCE BY RETAIL DISTRIBUTORS**

The following table gives the results of the average of analyses made by this department during the fourth quarter of the year 1963.

No distributor's name is listed under a particular grade of milk unless at least four samples of that grade were analyzed during the quarter. The standard plate count of bacteria is obtained by using the logarithmic average set forth in the United States Public Health Service Milk Code. A total of 63 distributors are licensed in this city; 38 of them handle Grade A milk, 60 Pasteurized milk, and 49 cream.

**CERTIFIED MILK**

The legal standards for Certified Milk are those adopted by the American Association of Medical Milk Commissions, Inc. and in effect at the time of production.

Unless otherwise indicated on the label it shall contain an average of 4.0% of butter fat with a minimum of 3.3% for individual samples and a minimum of 12% of total solids.

The average bacterial count of Pasteurized Certified Milk shall not exceed 500 colonies of bacteria per cubic centimeter.

**GRADE A MILK—PASTEURIZED**

Grade A Pasteurized milk is produced on farms scoring not less than 85% using the dairy score card of the U. S. Department of Agriculture. The butter fat shall average not less than 3.50% for any four samples taken in a period of not less than 30 days or more than 90 days. The bacteria count shall have a logarithmic average of not greater than 5,000 for any 4 consecutive samples.

The Milk Solids Not Fat shall average 8.50%.

### PASTEURIZED SELECTED MILK

Under state law only three grades of milk are recognized. Certified Grade "A", and Regular Milk may also be classified as homogenized, skim, or detatted. Buttermilk and Cultured Butter-milk are other recognized types defined by state law. Goat milk is also defined. All milk sold in the City of Providence is required to be pasteurized.

While there is no separate legal classification of Pasteurized Selected Milk, some dealers utilize this "grade" as a price differential. Check this grade with dealer's Grade "A" or Regular.

\* STANDARD PLATE COUNT—The counts as listed are not all in record with the "Standard Methods" of Examination of Dairy Products as at present. These counts are based on Standard Methods which are common human as well as animal. The plate counts between 30 and 300 are to be tabulated inasmuch as direct plating without dilution would render the plate difficult to count through the milk cloud, most dilutions are 1:10 or 1:100. As most of the plates show a count under 30, Standard Methods insists that such plates be listed and averaged as less than 300. (30 times 10) organisms per millilitre. It is our feeling, however, that our method serves as a goal and greater incentive towards purer milk. This heading should preferably read PLATE COUNT.

On January 1, 1963, the bacterial standards were strengthened: — Grade A from 10,000 to 5,000; Regular from 25,000 to 10,000.
