DOUBLE OVEN COOKING RANGES.

CHILSON'S CONE FURNACE.

CHILSON'S PATENT

ELEVATED DOUBLE-OVEN COOKING RANGE.

The subscriber's long experience in the invention, manufacture and erection of HOT-AIR FURNACES enables him with confidence to publicly challenge all other known inventions for heating buildings to equal the "CONE FURNACE" in any particular, as more than *twenty-five hundred testimonials*, received during the last five years, will prove. Every intelligent person will at once comprehend, by an examination of the engraving, the peculiar advantages combined in this furnace, with its broad, shallow fire-pot, its cluster of tapering radiators or cones standing over the fire, and holding the smoke and gas back near the fire, thereby causing a thorough and perfect combustion, while the heat is made to impinge against and radiate from the immense cone surfaces, thus combining a powerful heater with great economy in fuel, superior strength and durability of the apparatus (with no joints over the fire to allow leakage of gas or smoke,) simplicity of structure, ease of management, and above all, a fresh, healthful heat, free from the scorching, disagreeable odors common to the usual Hot-Air Furnaces, emitted from their red hot cylinders, cracked pots, and broken joints.

The "CONE" received a GOLD MEDAL at the last Fair in Boston, and the only Gold Medal ever awarded to a Furnace in Massachusetts.

The highly satisfactory testimony received from the large number of these Ranges in use, makes it quite certain that no housekeeper will long use any other plan of Range after once seeing this range. And feeling confident that it must come into general use, it was determined that it should be got up so very perfect in its principle and workmanship, as to have no equal in the world; and a visit to my store in Boston, or my foundry at Mansfield, will prove the truthfulness of this assertion, and show the largest assortment of Ranges and Furnaces to be found in any one establishment in the United States. We have just finished some extra large sizes, for large Families, Boarding Houses, Hotels, and other large buildings requiring a large and powerful apparatus. This Range excels all others in its entirely new principle, and thorough workmanship, its extra heavy, fine castings, its great economy in the use of fuel, and in its own cost, its quick and even baking ovens, its simplicity and ease of management, its self-regulating flues, avoiding the usual vexatious complication of dampers, and its flue plates, preventing the loss of heat in the brick walls.

These last two improvements will open the eyes of the Economists, to see how great is the saving in fuel over the extravagant waste in other ranges. Sizes in variety for dwellings, hotels, &c., with or without Water Backs. Hot-Air Fixtures for heating additional rooms, Hot Closets, &c.

ALSO, ALL SIZES OF

Chilson's Patent Trio Portable Furnaces, and Trio Stoves,

Universally acknowledged to be unrivalled in power, economy, and durability.

Registers, Ventilators, Mantels, Frame Grates, Stoves, &c., with every variety of Heating, Cooking and Ventilating Apparatus.

Personal attention given to their erection when desired. The above may be obtained at wholesale or retail, at my store, 99 and 101 Blackstone Street, Boston, or at my Foundry in Mansfield, Mass.

PERMANENT BLACK

WRITING INK,

TESTED FOR NEARLY HALF A CENTURY.

REGISTRY OF DEEDS OFFICE, Boston, January 10, 1859.

MESSRS. MAYNARD & NOYES: Gentlemen,—I am glad that longer use of your Writing Ink enables me to repeat the testimony given in its favor many years ago. I have used it in this office thirty-seven years, and my oldest records are as legible and black as when first written. This rare quality for permanence renders it invaluable for State and County Records and all mercantile purposes, where it is important that the writing should remain legible, and unchanged in color by the lapse of time.

HENRY ALLINE, Register of Deeds.

☞ The above popular Ink, together with

Red, Carmine and Copying Ink,

Is for sale by the manufacturers, in Boston; also, at wholesale and retail, by Stationers and Book-sellers throughout the United States and British Provinces.

COLORED PAPER

PREFACE.

THE present issue of the Providence Directory, comes to the public appearing, no doubt, to the casual observer, very much in many respects like its predecessor, but those who have occasion to refer to it for information, (and who does not?) will find no page that does not record numerous and important changes.

The migratory tendency of a portion of our population, and the never failing hand of death, have taken from our record some 3,800 names, while about 4,100 new ones have come to fill their places, giving about 300 increase.

Beside the essential changes of appearance and disappearance, the many removals of residences, or business and other changes, all serve to give the last Directory somewhat of the character of a last year's almanac, and to render the new one a most necessary appendage for every store and counting-room.

Every available means has been used to make the present Directory a model one, and worthy of the public support and patronage.

Last year we departed from our usual rule in arranging such names as are spelled differently but pronounced alike, but that change not proving so convenient or acceptable as was anticipated, we have in this edition re-arranged them in strictly alphabetical order.

Such additions have been made in the miscellaneous department as seemed likely to be useful or interesting, prominent among which, are some statistics from the United States census of 1860, concerning the city, and the names of the Providence volunteers who left in the First Rhode Island Regiment, to defend the National Capitol and Flag.

The publishers renew their thanks for the readiness with which the necessary information has been furnished by those who have been called upon for it, and especially to those who as advertisers or otherwise have encouraged the work by substantial aid.

FIRE DEPARTMENT.

ENGINES.

The Fire Alarm Telegraph has been in operation in this city about one year, and has proved far superior to the old method of fire alarm. The bells used for alarming the fire department are upon the following buildings, viz: St. Johns church, Benevolent st. Congregational church, (Dr. Hall's), St. Stephen's church, Roger William's church, G. T. Swart's tower, Central Baptist church, and No. 9 Engine house. The signal boxes, where alarms can be communicated, may be found in all the fire engine houses (except 6 and 12), in the store of A. F. Fuller, 66 Wickenden; the Police office; the Central watch station; the store of B. W. Bowen, 203 N. Main; G. T. Swart's house, 54 Pine; the new Market Building, corner of Broad and High; and the store of Williams & Cole, 273 High street.

BROWN UNIVERSITY.

This institution of learning was founded by the Baptists in 1764, the charter having been granted in February. It was at first located in Warren, where, on the seventh of September, 1769, the first Commencement was celebrated. In 1770 the College was removed to Providence, where its exercises have since been held, with a temporary suspension of some few years during the revolutionary war. The institution received its present name by a vote of the Corporation, passed September 6, 1804, in honor of its most liberal benefactor, the late Hon. NICHOLAS BROWN.

The Charter, which is now "the Constitution of Brown University," secures to the Baptists forever, the government of the College. Some of its provisions are as follows:—"That into this liberal and Catholic institution, shall never be admitted any religious tests; but on the contrary, all members hereof shall forever enjoy full, free, absolute and uninterrupted liberty of conscience:—And that the places of Professors, Tutors, and other officers, the President alone excepted, shall be free and open to all denominations of Protestants:—and that youth of all denominations shall and may be freely admitted to the equal advantages, emoluments, and honors of the College or University.

The Corporation for the regulation and government of the University, consists of two branches: "That of the Trustees, and that of the Fellowship." There are thirty-six Trustees, and twelve Fellows, including the President. Of the Trustees, twenty-two by the Charter are to be Baptists, five of the denomination called Friends, or Quakers, four Congregationalists, and five Episcopalians. Of the Fellows, eight are to be Baptists, "and the rest indifferently of any or all denominations." The President must be a Baptist. "The instruction and immediate government of the College," says the Charter, "shall forever be and rest in the President and Fellows, or Fellowship."

The buildings belonging to the University are as follows: University Hall, built in 1770-1; Hope College, built in 1821-2; Manning Hall, built in 1834; Rhode Island Hall, built in 1839-40; and a Mansion House for the President, built in 1841. Its enclosures contain upwards of fourteen acres of land, situated mostly between Prospect, Waterman, Thayer, and George streets. Its invested funds, including the Library Fund and Scholarship, amount to about two hundred and twenty-five thousand dollars. The number of its graduates up to the present time, is two thousand and forty-three.

LIBRARIES.

The University Library is in Manning Hall, and now contains 30,000 volumes. A large proportion of them have been purchased within the last few years, with special reference to the wants of students and gentlemen engaged in literary and scientific pursuits. It is constantly increasing from the proceeds of a permanent fund of \$25,000, established for this purpose in 1839. The Library is open four hours daily, from 9 A. M. till 1 P. M. In addition to the University Library, the Libraries of the Philermenian and the United Brothers' Societies, comprise together 6000 volumes, accessible to all the students of the University.

The number of students at the present time is two hundred and thirty-two.

The Annual Commencement is on the first Wednesday in September. The first Exhibition is on the Saturday preceding Thanksgiving, and the second Exhibition on the first Saturday in May. The week of the annual Thanksgiving, and the week succeeding the second exhibition, are given as recesses. The winter vacation of three weeks commences about the 20th of January, and the summer vacation of eight weeks commences about the 7th of July.

EMERY BROTHERS,
 Proprietors,

Nos. 62 & 64 State Street, Albany, N. Y.

PATENTEES AND MANUFACTURERS OF

EMERY'S PATENT CHANGEABLE RAILROAD HORSE POWER.
 ALSO LEVER POWERS,

For Four, Six and Eight Horses, of new and superior construction, together with a great variety of labor-saving
AGRICULTURAL MACHINERY.

ALSO

General Dealers in Implements and Seed.

HORSE POWERS.

It has ever been the aim of the proprietors to make none but the first class of work, and always use the best materials and workmanship. In the construction of their Horse Powers they have endeavored to adapt them most readily and advantageously to the great variety of purposes required by the Farmer and Mechanic. The same considerations have guided them in the construction and adaptation of the various Machines made and sold by them, and to be driven by the power, in calculating their various velocities, forces, pulleys and gears, required to enable them to operate in their maximum efficiency, which is the great secret of their success.

THRASHING MACHINES

WITH
SEPARATING AND CLEANING ATTACHMENT.
 Combined and adapted for all kinds and conditions of grain, &c.

This machine is the greatest success in its line yet produced. It can be operated with two horses as easily, and with equal results, as the ordinary thrashing machine without the cleaning attachment; while its capacity adapts it equally well to the force of four or six horses. It will thrash perfectly clean from the straw, and clean the grain for market without any wastage in any part of the process.

It is complete in one frame. Very compact and simple—runs light, still, and without any concussion from its moving parts. It has been very extensively used during the past two harvests, and its superiority over any others in market established beyond question, and considering its capacity and cost of construction it is at least fifty per cent cheaper than any other similar machine in use.

CLOVER MILLS AND CLEANERS.

This is a new Machine comparatively, and is believed to be one of the best Machines for the purpose ever made; can be driven by one, two, or more horses at a high or slow velocity, and do equally good work, and with wet and bad, as well as good condition, of the clover chuff. It cleans the seed and delivers it fit for market at the same operation.

STALK AND STRAW CUTTERS

For Horse Power—a strong and durable Machine, and adjustable to any length of cut.

SAWING MILLS.

With Circular Saws for Cutting Fire-wood, Splitting Boards, Plank, &c., for fencing and building purposes; also with Machine Cross-cut for cutting Logs for Wood, Shingles, Staves, &c.; also Mills for making Shingles.

FEED MILLS

For Grinding all kinds of Grain for Feeding, as well as corn in the ear when desired. Several sizes, and with or without Sieves and Bolts attached.

CIDER MILLS

For Power and Hand use, with and without Press attached. These Mills and Presses are of a superior style and utility to any others in use.

COTTON GINS

WITH
COTTON LINT CLEANER AND CONDENSER.

Cotton Gins with Improved Feeding Hoppers, with 30 to 100 Saws, calculated for one to eight horses. These are superior in finish and adaptation to the wants of the Cotton Grower, to anything of the kind before offered to the public.

The Lint Condenser is an attachment suited to any ordinary Cotton Gin; it receives the lint as it is discharged from the gin, condenses it and delivers it compact, ready for the press at one and the same operation, and at the same operation cleanses it from all earthy matter, as sand, dust, &c. It dispenses with the necessity of any lint room and large buildings, as the Gin may be equally as advantageously used in the field as the grain thrasher, and when used in buildings it requires no more additional room than the size of the Gin itself occupies. It is also a perfect safeguard against fire, as it is impossible for burning lint to pass through the machine without the fire being extinguished in its passage, thus making this Cotton Gin with its condenser fire-proof. They have been extensively used in Georgia the past two crops, and the cotton made by them has commanded an advanced price over that ginned by the best machines in use.

AGRICULTURAL IMPLEMENTS

Constantly on hand, embracing a large and selected assortment of Plows, Harrows, Cultivators, Dog Powers, Churns, Cheese Presses; also Forks, Hoes, Shovels, &c., always on hand at the lowest manufacturer's terms.

ILLUMINATED CATALOGUE.

The Proprietors have completed their new Catalogue the most complete and beautifully illustrated work ever published by any manufacturer, embracing a great number and variety of finely executed and carefully prepared

Illustrations and Descriptions.

together with ample references and indexes as well as the Prices, Terms of Sale, Weight, Cubic Measurements, Capacity, Directions for use, Durability and Warranty of their

Machinery, Implements, and Seeds.

On receipt of three cents in stamps to prepay postage, it will be sent to all applicants. Local Agencies solicited for the sale of the above Machines.

NO. 30 BACON STREET,

PROVIDENCE, R. I.

WOOLEN MANUFACTURERS'

ATTENTION IS RESPECTFULLY INVITED TO THE

TENTERING AND DRYING MACHINE!

Invented and Manufactured solely by

JOSEPH S. WINSOR.

Patent applied for.

This Machine has been proved and pronounced by the following Companies to be the best and most economical machine for drying and tentering now in use:

WALTER B. CHAPIN, Providence, R. I.

ELM ST. WOOLEN MILL, B. & J. Aborn, Providence, R. I.

S. & H. SAYLES, Daysville, Conn.

F. B. LOOMIS, Norwich Town.

The space required for this machine and its operation does not exceed eleven feet square, one hand being sufficient to operate it, and it will dry 50 to 60 pieces of medium cloth per day, at an expense for fuel of less than 75 cents.

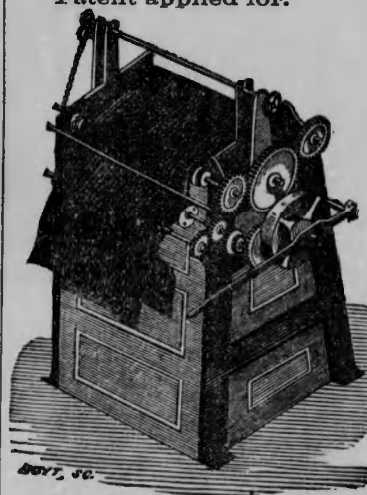

The machine may be seen at the factories of any of the above Companies, or at the shop of the subscriber.

Also, Patentee for an improvement in MACHINES for

MAKING WEAVER'S HARNESS.

This Harness, styled a Double-Knotted Harness as distinguished from the "Loop-Harness," the undersigned has for several years manufactured and furnished to order, and he has the satisfaction of knowing that but few of the many manufacturers who have given it a trial, have failed to adopt it in substitution for the Loop-Harness. It is, the undersigned unhesitatingly affirms, in all respects superior to the Loop-Harness, and in point of durability surpasses it in the ratio of at least two to one. He can designate Harnesses of his manufacture which have been in constant use for four years past, and which, ALTHOUGH NEVER RE-VARNISHED, are still in good working order!

Manufacturers and all interested in Harness are invited to call, and witness for themselves the working of this truly valuable Machine.

Orders addressed to J. O. LANGLEY, or GEORGE C. GOODWIN & CO., Boston.

Boston Medical and Surgical Journal.

This well-known and long-established Periodical entered upon its sixty-fourth volume in February, 1861. It will be issued weekly, as heretofore, from the office of publication, over 184 WASHINGTON STREET, BOSTON. Its editors are Dr. F. E. OLIVER, formerly Secretary of the Boston Society for Medical Improvement, and Dr. SAMUEL L. ABBOT, one of the Physicians of the Mass. General Hospital, who have been selected as fully qualified by their literary taste and scientific attainments to make the "JOURNAL" acceptable to the profession generally. Aid is also now freely given by many of the leading physicians of Boston, and it will continue to receive contributions from eminent members of the profession in every part of the country. Its contents, though mainly of a practical character, are intended to be sufficiently varied to make its weekly visits interesting as well as useful to the medical practitioner.

The price is THREE DOLLARS a year, payable in advance. Previous numbers of the current volume furnished, and back volumes also supplied at a liberal discount. Orders by mail, with subscription money enclosed, may be addressed, as above, to DAVID CLAPP, Publisher.
