Mr. Lincoln Divoll, General Manager  
New England Telephone Company  
234 Washington Street  
Providence, Rhode Island

Dear Mr. Divoll:

On July 11, 1968, the Public Service Engineers office in the City of Providence was submitted a resolution on Deposits for Utilities.

This resolution of the City Council was submitted to us by the Committee on Public Works and was worded as follows:

Resolved, That the Public Service Engineer is requested to inquire of the New England Telephone Company, as to the policy of the said respective corporation with respect to the collection of deposits for service, and ultimate disposition of such deposits.

Any information that you may send to us shall be submitted to the Committee on Public Works.

Very truly yours,

Peter J. Hicks, Jr.  
Public Service Engineer

September 16, 1968

Mr. Peter J. Hicks, Jr.  
Public Service Engineer  
City of Providence  
112 Union Street  
Providence, Rhode Island 02903

Dear Mr. Hicks:

At the request of Mr. Divoll, I am answering your letter sent to him on the subject of deposits.

The policy of the New England Telephone Company with regard to deposits can best be outlined in two ways. First, those regulations that are filed with the Public Utilities Department of the State of Rhode Island and second, the practices used by the New England Telephone Company in administering its business in Rhode Island.

The filing with the Public Utilities Department is as follows:

"In order to safeguard it against loss of charges or tolls due at the time service may be terminated, the Telephone Company may require a customer or applicant for telephone service to make a cash deposit equal to the estimated amount of exchange and toll service charges for any period of two months. Simple interest of 4% per annum is credited to the customer annually, or upon termination of the service or the return of the deposit by the Telephone Company. The receipt of such a deposit by the Telephone Company shall in no way relieve the customer or applicant from compliance with the Telephone Company's regulations as to advance payments (if any) and the prompt payment of bills, nor constitute a waiver or modification of the practices of the Telephone Company for the discontinuance of service for non-payment of any sums due for service rendered."

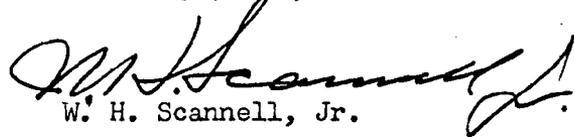

The practice of the New England Telephone Company covering deposits is as follows:

"A deposit is requested in all cases where the information obtained from a customer for business service indicates that credit is doubtful or that a loss may occur. Generally, a deposit is not requested from a customer who has already established satisfactory credit on business service at another location.

"A deposit is not requested from a customer for residence service unless the credit information obtained definitely indicates that a revenue loss is probable. Where there is an unpaid account for which the customer is responsible, an attempt is made to secure full payment or to arrange for installment payments. If satisfactory payment arrangements cannot be made, a deposit is requested."

If you require any further information on this subject, I would be pleased to have Mr. Paul A. Carlson, District Commercial Manager contact you.

Sincerely yours,

W. H. Scannell, Jr.

# PROVIDENCE GAS COMPANY

G. T. HENRY  
PRESIDENT

100 WEYBOSSET ST.  
PROVIDENCE, R.I. 02901

September 23, 1968

Mr. Peter J. Hicks, Jr.  
Public Service Engineer  
City of Providence  
112 Union Street  
Providence, Rhode Island 02903

Dear Mr. Hicks:

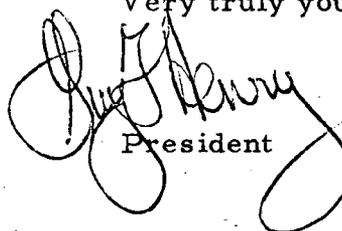

In reference to your inquiry regarding our deposit policy, I am submitting the following information.

Under law as a Utility, in order to protect against loss, we are authorized to request a satisfactory deposit before rendering service. However, in actual practice deposits are not required upon requesting service with the exception of restaurants and are only required when the customer's credit standing is known to be questionable.

This deposit should not be less than \$5.00, nor, more than two times the estimated maximum bill. Interest is paid on deposits in accordance with applicable rate schedules and deposits plus accrued interest less any amounts due are refunded upon termination of service or after a re-evaluation of a customer's paying habits.

I hope this satisfactorily answers your inquiry regarding our policy.

Very truly yours,

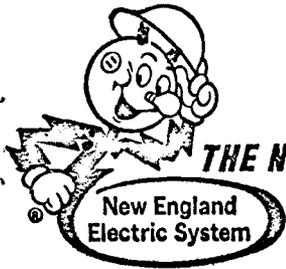

President

October 22, 1968

Mr. Peter J. Hicks, Jr.  
Public Service Engineer  
City of Providence  
112 Union Street  
Providence, Rhode Island 02903

Dear Mr. Hicks:

In a letter addressed to T. Dexter Clarke you requested certain information concerning the policy of The Narragansett Electric Company with respect to the collection of deposits for electric service and the ultimate disposition of such deposits. I have been asked to furnish this information.

We take no deposits from residential customers. In the case of commercial and industrial customers, we ask for a deposit based on the estimated use over a two month period, although there are exceptions. For example, if a nationally known organization locates a branch in our territory and the Company obtains a statement in writing from the home office that they assume responsibility for bills rendered, no deposit is requested. If a local outfit with an established credit rating opens additional branches in the Company territory, no deposit is asked for. When a customer leaves the territory the deposit is refunded.

Very truly yours,

Re: Investigation and Report on Preventing  
the Spread of Dutch Elm Disease by  
Means of an Insect (Entomology).

Dear Mr. Vespia:

Just about a month ago I heard that some work and studies were under way in order to prevent the spread of Dutch Elm Disease by means of an insect type of controls.

After receiving your memorandum of March 7th, 1968, I began to gather up pieces of information regarding the above mentioned type of elm disease control.

On March 19th, I contacted Mr. David Hartley, Rhode Island State Pathologist. Mr. Hartley commented that the European Wasp is the insect being used to experiment with to see it's effectiveness on reducing the spread of the Dutch Elm Disease.

On March 21st, I spoke to Doctor Frank Howard, Director of Plant Pathology at the University of Rhode Island. His remarks were, the insect theory of combating Dutch Elm Disease is worth investigating, and should be of some interest. Doctor Howard feels the insect type control may slow down, inhibit, or reduce the spread of Dutch Elm Disease, but will not eradicate the elm fungus disease completely.

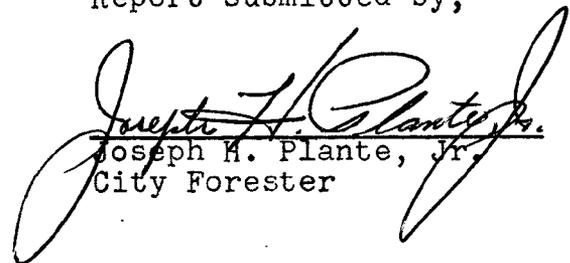

Enclosed is an article, published by the Suffolk County Farm News, entitled "Tiny Wasp Slows Spread of Elm Disease." This article points out many important factors which must be considered before actual use of the insect can be applied for the prevention of D. E. D.

In summarizing my findings, I would say it's still too soon, and immature to make a definite evaluation regarding the effectiveness of an insect type of control on our city elm trees. This insect control of Dutch Elm Disease is somewhat new in the United States and hasn't proven itself in this country up to date. Much testing and many demonstration trial areas have to be set up in order to evaluate it's effectiveness in holding back the spread of the Dutch Elm Disease.

In order to keep abreast of the new developments regarding insect control of D. E. D., in the New England Area; I'm submitting a letter to Mr. Vincent A. Lafleur, P. P. C. Division U. S. D. A., Waltham, Mass. Mr. Lafleur, Regional Director of U. S. D. A., would have the answers regarding what ~~efforts~~ will be made in this area to study the insect control of D. E. D.

This Spring of 1968, chemical spraying of the city elm trees will continue as in past years, plus the practice of good sanitation control measures, these are the best methods in trying to control elm disease up to date.

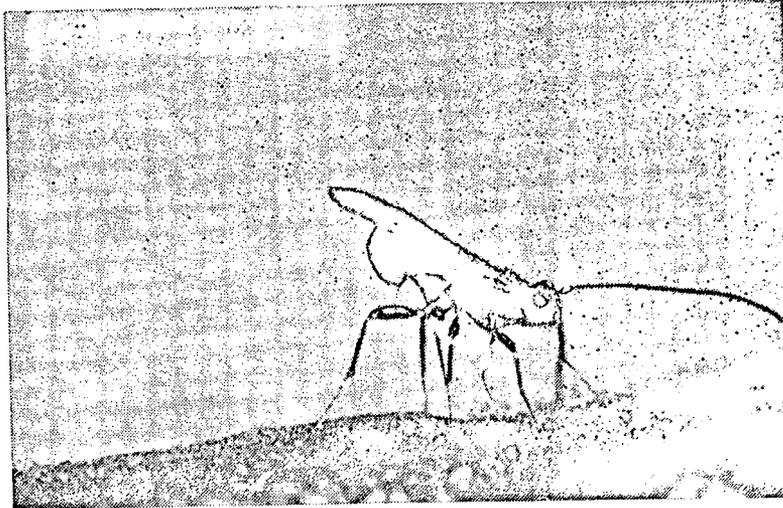

Report submitted by,

  
Joseph H. Plante, Jr.  
City Forester

## Tiny Wasp Slows Spread Of Elm Disease

Wasp thrusts egg-laying organ through bark to deposit egg beside a larva of elm bark beetle. Wasp egg hatches into larva and devours pest

A tiny wasp, collected by a U. S. Dept. of Agriculture entomologist in France, may help to curtail the spread of Dutch Elm Disease in the United States by destroying the bark beetles which carry this disease from diseased trees to healthy ones. So entomologists may yet save our Suffolk elms.

The wasp, *Dendrosoter protruberans*, attacks the disease bearing beetles that bore into the bark

of elm trees, especially in small crotches of twigs. The female *Dendrosoter* wasp locates hidden beetle larvae in the bark. Thrusting her stinger (actually an egg-laying organ) through the bark she deposits the eggs beside the beetle larvae.

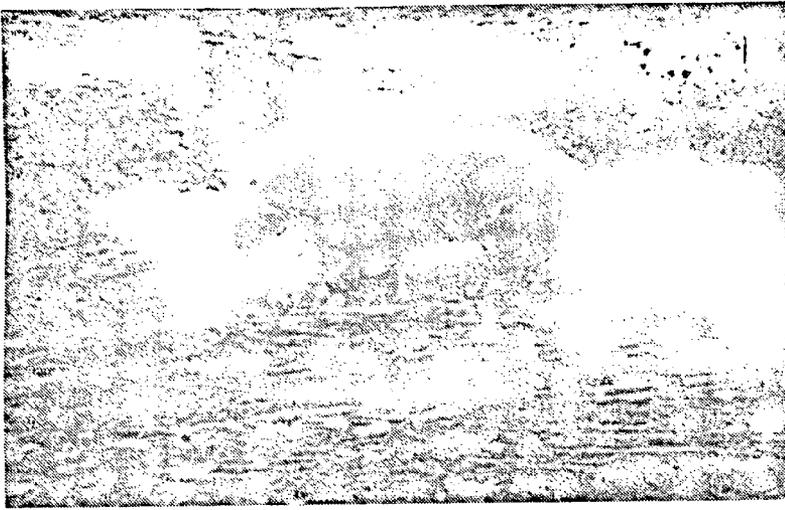

When the eggs hatch into wasp larvae, they attack the beetle larvae, killing them by sucking their body juices. Adult wasps increase the tempo of the attack by producing three generations for each generation of beetles.

Entomologist from France, Reece I. Sailer, former head of the ARS European Laboratory for Parasites, near Paris and now Chief of the Insect Identification and Parasite Introduction Branch, Beltsville, Maryland collected the wasp in France. After he determined that the wasp attacks only the European elm bark beetle, Sailer had more than 3,000 of the wasps imported to the United States for further observation and testing.

Release of the wasps by entomologists of the USDA Forest Service in Ohio and Missouri indicate that the parasites will seek out the beetle larvae under the environmental conditions in those states; more extensively releases are being made by cooperators in Michigan with equally promising results.

### Millions Being Raised

Scientists are now rearing the wasps by the millions at several laboratories, including the Northeast Forest Experiment Station Laboratory at Delaware, Ohio, for research and mass release in infested areas. Although the wasps are not expected to eradicate the beetles (this would result in the

Wasp larva, although still smaller than its host, has now almost completely devoured the bark beetle larva.

starvation of the wasps) but they could become a major weapon in battle to end the epidemic threat of Dutch Elm Disease.

Chemical insecticides are of limited help in eliminating the beetles, because of difficulty in reaching all parts of the twigs and weakened branches. Female wasps, however, can thrust their egg-laying organs through the bark to deposit an egg beside the beetle larvae. The egg hatches into a wasp larva that kills the immature beetle by drawing its body juices.

#### Beetles Carry Spores

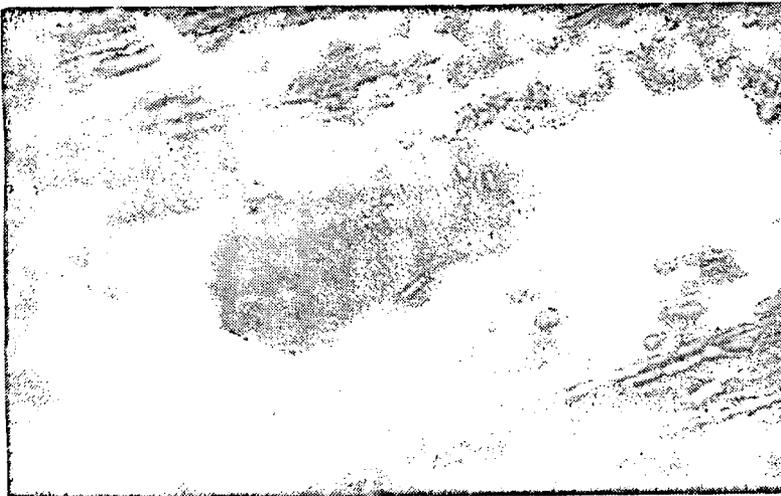

Not only do the European elm bark beetles carry the fungus disease spores from tree to tree, they obligingly shelter spores in special organs mycangia during flight and provide places for them to germinate. The beetles bore 2-inch tunnels in diseased and weakened trees in which they lay their eggs. The fungus spores develop in the tunnels, if the tree is diseased. When the beetles emerge from the tunnels as adults

in the spring, they carry spores with them to new, healthy trees, depositing them into the vessels that carry sap through the wood. The fungus growth blocks the flow of sap. The tree begins to wilt and may die within two years.

Although the wasps cannot save trees that are already under attack by beetles and the fungus, they can help prevent further spread of the elms enemies. The wasp kills up to 70 percent of the beetle larvae in Europe, which is one reason why Dutch Elm Disease is not a serious problem there. The beetle, like many of our insect pests, is native to Europe, where several natural enemies has kept it in check. Scientists are studying some of these insect enemies in addition to *D. protuberans* to determine their potential usefulness in the United States.

A worldwide search for natural enemies of insect pests that do not also harm useful insects, ani-

mals or plants in the United States is part of a Department's program to develop new biological control weapons.

Tiny larva of wasp develops on larva of elm bark beetle, sucking its body juices, eventually killing the beetle larva.

Department of City Clerk

MEMORANDUM

Providence, R. I. ~~September 11, 1963~~

TO: Mayor Doerley & City Assessor Cote

SUBJECT: Abandonment of Sewer Easement Robin Brook Sewer

CONSIDERED BY: City Clerk Vespia

DISPOSITION:

Attached is copy of Resolution of the City Council #605, Approved December 20, 1967, conveying to James M. Fuoroli, Sr., of 862 Charles Street, North Providence, a certain lot in the consideration of the sum of \$500.00 subject to a twenty-foot sewer right-of-way as indicated on the accompanying drawing.

Also, accompanying is copy of Resolution to the City Council introduced on June 6, 1968 and referred to Committee on Public Works. This Resolution was recommended to the City Council by the Committee on Public Works on August 8, 1968. The said Committee accepting the recommendation of the Director of Public Works dated May 29, 1968, a copy of which is hereto attached.

The City Council on August 15th referred the subject Resolution back to the Committee on Public Works. The consensus of the caucus considering this matter prior to the August 15th meeting being that the abandonment of the sewer easement would remove this encumbrance on the area in question thus making the land more valuable than the original sum of \$500.00 in accordance with Resolution #605 of 1967.

I am this day certifying this matter to City Assessor Cote with the above facts and request that he report, in writing, directly to you his appraisal of the subject land without the easement which the City would retain.

*Vernon Vespia*  
City Clerk

-----  
-----  
September 26, 1968

Honorable Joseph A. Doorley, Jr.  
Mayor,  
City of Providence,  
City Hall

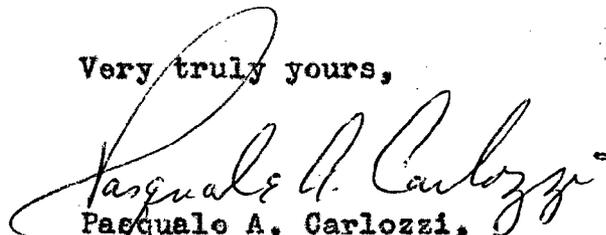

Dear Mayor Doorley:

As requested by the Department of City Clerk on a memorandum dated September 11, 1968 that parcel of Real Estate known as Plat 97 Lot 576 located on Leo Avenue in the City of Providence and portion of said Lot being located in North Providence was reviewed by me on September 25, 1968.

The topography of said land is such that it will need a certain amount of fill and two retaining walls.

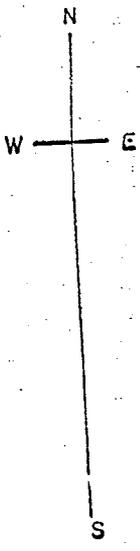

Taking into consideration the above, and the abandonment of the existing easement, it is my opinion that the original sum of \$ 500.00 in accordance with Resolution No. 605 of 1967 is too low. Therefore I suggest that the 14,873 sq. ft. of land be sold at no less than \$ .08 per sq. ft. or \$ 1,200.00.

Very truly yours,

  
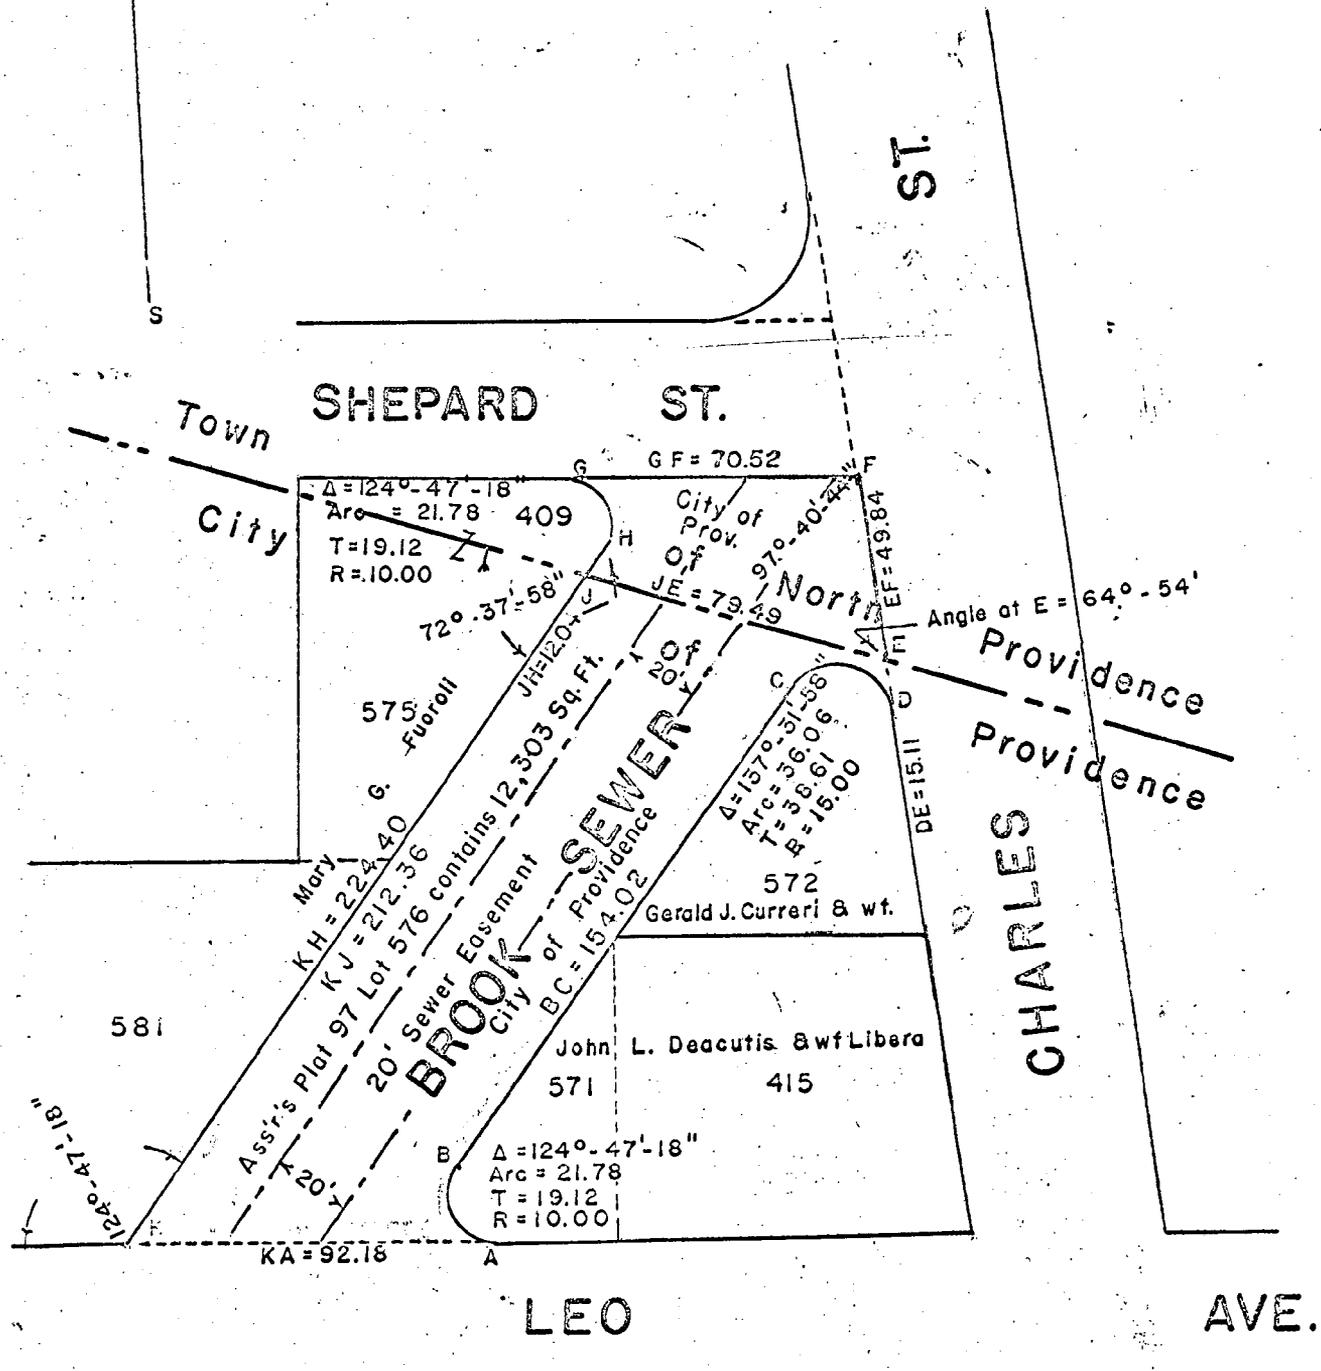

Pasquale A. Carlozzi,  
Assessment Aide III

STATE OF RHODE ISLAND, & C.

IN GENERAL ASSEMBLY

January Session, A.D. 1969

AN ACT

IN AMENDMENT OF CHAPTER 15, PUBLIC LAWS OF 1966, ENTITLED "AN ACT AUTHORIZING THE CITY TAX ASSESSOR OF THE CITY OF PROVIDENCE TO ABATE ANY INCREASE IN ASSESSED VALUATION RESULTING FROM ALTERATIONS AND IMPROVEMENTS TO EXISTING DWELLING OR PORTION OF SUCH DWELLINGS USED FOR RESIDENTIAL PURPOSES"

It is enacted by the General Assembly as follows:

SECTION 1. Section 1 of Chapter 15 of the Public Laws, 1966, entitled "An act authorizing the City Tax Assessor of the City of Providence to abate any increase in assessed valuation resulting from alterations and improvements to existing dwellings or portion of such dwellings used for residential purposes" is hereby amended to read as follows:

SECTION 1. The city tax assessor of the City of Providence may abate any increase in the assessed valuation of any local tax resulting from alterations and improvements made to existing dwellings used for residential purposes for a period of five (5) years beginning with the assessment date immediately following the completion of the alterations and improvements to the extent that such increase in assessed valuation results from such alterations and improvements; provided, however, that such alteration or improvement must be commenced between June 1, 1966 and June 1, 1970, and must be completed within two (2) years of the date of commencement. The assessed valuation of such dwelling and of the land on which it is situated, exclusive of the increase in valuation which is so abated shall not, after such alterations and improvements, exceed the valuation appearing on the assessment rolls on the assessment

date immediately preceding the commencement of such alterations and improvements; provided, however, that such dwelling and land shall be subject to any general revaluation done on a citywide basis.

SECTION 2. This act shall take effect upon its passage and all acts and parts of acts inconsistent herewith are hereby repealed.

# RESOLUTION OF THE CITY COUNCIL

No. 476

Approved November 13, 1968

WHEREAS, our esteemed colleague Thomas W. Pearlman will be formally presented with the Amudim Award of Torah Umesorah of the National Society of Hebrew Day Schools, at the Twenty-Fifth Anniversary Celebration of the Society in New York City on November Seventeenth, Nineteen Hundred and Sixty-Eight, and

WHEREAS, Councilman Pearlman, dynamic and zealous President of the Providence Hebrew Day School, a leader in promoting Torah Education, and in the founding of the New England Academy of Torah, a division of the Providence Hebrew Day School, has given unselfishly of his valuable time,

NOW THEREFORE BE IT RESOLVED, that in recognition of this Amudim Award to Councilman Thomas W. Pearlman, His Honor Joseph A. Doorley, Jr., the Mayor of the City of Providence, Rhode Island and the Members of the City Council of said City, do hereby congratulate him as the recipient, and further congratulate the Torah Umesorah Society for having selected this prominent citizen of our community for this coveted honor.

September 6, 1968

Council Thomas Payne, Chairman  
Committee on Public Works  
City Clerk's Office, City Hall  
Providence, Rhode Island

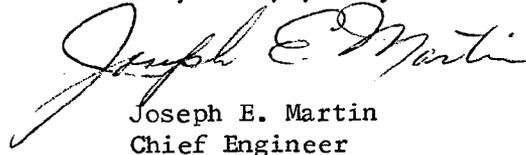

Dear Councilman Payne:

On August 26, we received a memorandum dated August 20 from the Department of the City Clerk together with a copy of a resolution for the abandonment of a portion of Roger Williams Avenue. After reviewing this resolution and a print from the Department of Public Works, we find that our facilities in the section to be abandoned will have to be removed and relocated within the new street alignment in order to maintain our present continuity of water main installation.

The cost of removing and relocating the 8" cast iron main with its pertinent facilities will cost the department \$2,005.00. It is indicated that the abandonment is at the request of Hi Hat Food Products Company, and we respectfully request that your Committee take no action on this matter until the Hi Hat Food Products Company compensates the department in the amount of \$2,005.00. We are filing a bill in the City Clerk's Office in the above amount and will notify the Public Works Department when payment is received covering the cost of relocating the above mentioned water facilities.

Also, included in this memorandum for abandonment were Hauxhurst Street and Brookfield Street in which the Water Supply Board has no facilities.

Very truly yours,

  
Joseph E. Martin  
Chief Engineer

Committee on Public Works  
City Hall  
Providence, R. I.

SUBJECT: Referral No. 1692 - ABANDONMENT OF PORTION OF ROGER WILLIAMS AVENUE

Gentlemen:

This referral is a request to abandon a portion of Roger Williams Avenue on Assessor's Plat 61, such portion described as a triangle located on the northerly side of the existing Roger Williams Avenue from its easterly termination to the intersection of Narragansett Avenue.

On an inspection and photographic survey it was determined that the portion of Roger Williams Avenue proposed for abandonment is no longer being used as a public highway and is vacant and unimproved. It is bounded by the railroad on the east, by the Hi Hat Food Products Company on the north and by the paved portion of Roger Williams Avenue on the south. The neighborhood is mixed industrial, commercial and residential and in fair to good condition.

The Commission

VOTED: To defer action until a legal opinion is obtained from the City Solicitor as to the law pertinent to this kind of situation.

Very truly yours,

A handwritten signature in cursive script that reads "Vincent Pallozzi".

SUBJECT: Referral No. 1692 - ABANDONMENT OF PORTION OF ROGER WILLIAMS AVENUE

Gentlemen:

The subject referral received further consideration by the City Plan Commission at a meeting held on Tuesday, October 8, 1968.

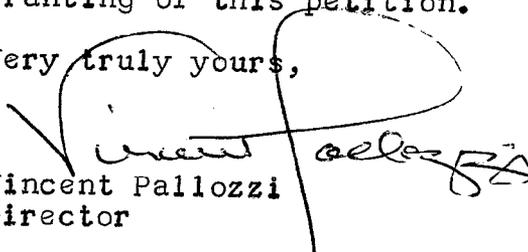

This referral is a request to abandon a portion of Roger Williams Avenue on Assessor's Plat 61, such portion described as a triangle located on the northerly side of the existing Roger Williams Avenue from its easterly termination to the intersection of Narragansett Avenue.

On an inspection and photographic survey it was determined that the portion of Roger Williams Avenue proposed for abandonment is no longer being used as a public highway and is vacant and unimproved. It is bounded by the railroad on the east, by the Hi Hat Food Products Company on the north and by the paved portion of Roger Williams Avenue on the south. The neighborhood is mixed industrial, commercial and residential and in fair to good condition.

The Commission

VOTED: To offer no objection to the granting of this petition.
