Annual Report
OF THE
PROVIDENCE FIRE DEPARTMENT
FOR THE YEAR ENDING
December 31, 1969

JAMES T. KILLILEA
CHIEF OF
FIRE DEPARTMENT

HARRY GOLDSTEIN
COMMISSIONER
OF PUBLIC SAFETY

FIRE DEPARTMENT

209 FOUNTAIN ST., PROVIDENCE, RHODE ISLAND 02903

The Honorable Commissioner of Public Safety
209 Fountain Street
Providence, Rhode Island

Dear Sir:

I am pleased to submit for your approval the Annual Report of the activities of the Providence Fire Department and its divisions for the year 1969.

Important in 1969 was the fact that Providence was again adjudged first in its population class throughout the country and third place for all classes and all cities in the fire prevention contest sponsored by the National Fire Protection Association.

During the year, four new 1000 Gallon Per Minute pumpers and two completely refurbished aerial ladder trucks were purchased. A modern sophisticated communications center was begun in the existing Fire Alarm Headquarters. This facility is scheduled to be completed early in 1970. The modernization of this facility will give the City of Providence one of the most modern communication centers in the country.

I wish to take this opportunity to commend the officers and men of the fire department for their expertness and their loyal and dedicated service to this department and to the community, many times under most trying conditions.

To Mayor Doorley, and to you Commissioner Goldstein, and the honorable members of the City Government, my sincere thanks for the support and cooperation you have shown by providing this department with modern equipment and apparatus.

Respectfully submitted,

IN CITY COUNCIL
JUN 18 1970

From: John T. McLaughlin, Chief of the Fire Prevention Bureau

To: The Chief of Department

Subject: Annual Report - 1969

Sir:

The City of Providence has once again been adjudged as having the most effective fire prevention program in the nation for cities in our population category. In addition, the results of the 1969 National Fire Protection Association Fire Prevention Contest rate the City of Providence third in the entire nation, regardless of population classification.

Since being selected as the Grand Award Winner in the nation in 1968, we have been requested to appear at various national and local seminars to explain aspects of our fire prevention program which were conducive to our winning the award. On these occasions, I have discussed the effectiveness of our newly-created arson squad; the accomplishments of our rather unique demolition program; our fire prevention and fire brigade training programs for the personnel of our hospitals, institutions, business establishments and industrial plants; the Fire Safety Education Program which we conduct for our schools and youth organizations, which has attracted national recognition for years; and a "watchdog" policy as it may concern the use and storage of flammable liquids and dangerous chemicals, new construction, and the flammability of items, including clothing, for sale in our retail stores. The foregoing are, of course, in addition to our routine building inspections, the investigation of fires and complaints, and the maintenance of department records and statistics.

I believe we have a very comprehensive and effective fire prevention program, a belief which is more or less substantiated by the national recognition accorded it. I would like to take this opportunity to thank the personnel of the Fire Prevention Bureau whose dedication to duty has contributed so much to the success of this program. I also extend my sincere gratitude to the administrative personnel of the City of Providence, The Fire Safety Committee of The Greater Providence Chamber of Commerce, the personnel of the Providence Fire Department, and the civic-minded community of the City of Providence who have made this program possible.

Respectfully submitted,

John T. McLaughlin

From: Batt. Chief John E. McDonald, Director
Division of Training

To: The Chief of Department

Subject: Annual Report 1969

Sir:

The Twenty-Eighth (28th) Class of Trainees consisting of nineteen (19) men were in the advanced training stage as the year 1969 activities commenced. These nineteen (19) Trainees were sworn in as permanent members of the department as of February 26, 1969 at 8:00 A.M.

On January 14, 1969 physicals were held at the Division of Training for the Twenty-Ninth (29) Training Class.

On February 13, 1969 Batt. Chief Falvey and Capt. Poudrier attended an Oil Fire Seminar at the Biltmore Hotel.

On February 24, 1969 the Twenty-Ninth (29) Class of Trainees consisting of fourteen (14) men started basic training.

Batt. Chief John E. McDonald was detailed to the Division of Training as of April 1, 1969.

On April 18, 1969 an examination announcement for entrance to the Privates to Lieutenants Promotional School would be held at 7:00 P.M. on May 13, 1969 at Mount Pleasant High School. On May 27, 1969 on General Order No. 21 Twenty-one (21) men were selected to attend this school. The Lieutenants Promotional School started on June 9, 1969 for a two week period. This school covered all subjects and training needed to produce good officers. On July 11, 1969 on General Order #28 the order of finish for this school was listed.

All four Battalion Districts and Companies were inventoried, color coded, equipment tagged and all metal tools were die stamped by Batt. Chief John E. McDonald and Pvt. Robert Wilks while detailed to this division.

The fourteen (14) members of the 29th Trainees Class were appointed permanent members of the Providence Fire Department as of Sunday, August 24, 1969, per General Order No. 35.

Effective, Sunday, September 14, 1969, Batt. Chief John J. Falvey retired and was placed on the Employees Retirement list. Batt. Chief John E. McDonald replaced Chief Falvey as Director of Training.

A competitive examination was held at the Division of Training for applicants to the Thirtieth (30th) Training School on Friday, September 19, 1969, at 7:00 P.M. Physical examinations for the accepted members were conducted by Doctor Arnold Ciccone and Blood, Urine, and Chest X-Rays were taken at Charles V. Chapin Hospital on October 2nd and October 3rd 1969.

Adaptability tests were conducted at this Division by Mr. Charles A. Devine on October 11, 14, 15, 1969.

On November 3, 1969 the Thirtieth (30th) Trainees Class with twenty-nine (29) members started basic training. As of January 1, 1970 Twenty-six (26) members are still in basic training.

Promotional School: On October 8, 1969 an announcement of a Lieutenant's Promotional School was circulated throughout the department. Thirteen (13) Lieutenants will be competitively selected for promotion to Captain. The thirteen (13) top Lieutenants reported to classes at 8:30 A.M. on December 1, 1969. On December 14, 1969 the top four (4) men in the class started their new assignments as Captain.

An announcement on October 10, 1969 to all Lieutenants and Privates that the practice of having night duty officers to assist the working Lieutenant in training the recruits for 1/2 a credit point towards promotion was brought back into practice. All men who submitted applications for duty were selected by seniority. Those men who didn't get a tour in the Thirtieth (30th) Trainees School will be contacted by seniority to serve in the Thirty-First (31st) Trainees School.

Evaluation: On October 10, 1969 Batt. Chief John E. McDonald served on the Cranston Fire Department's Oral examination evaluation board for a Captains and Deputy Chiefs promotional list.

On October 24, 1969 this Division with Engine 14 held a hydrant flow test at the Veterans Administration Hospital, Davis Park.

With the start of the Thirtieth (30th) Trainees Class on November 3, 1969, the Trainees Notebook was standardized and mimeotyped copies were given to all Trainees and to all Lieutenants attending the December Promotional School. It is hoped in the near future to give each company a standardized book. Points previously allotted to Trainees and Officers final graduation mark for notebooks has been added into the General Knowledge Exam.

The time saved by the Instructor reading and the Student taking many mistaken and misspelled words into their notes, gave this Class an opportunity to put theory into practice. Through the courtesy of the Office of Housing and Urban Development, we had the opportunity to operate all types of Sprinkler Systems and various types of Shut-Offs in the Manufacturing Buildings in the Randall Square area. Each man learned how to use every tool, manual or power type, that this department has. This class had the first opportunity in years for a Trainees Group to tour the Test Grounds, Foundry and Factory of the Grinnell Sprinkler Company. We also worked in conjunction with the Cranston Fire Department in fighting all types of fires in old buildings, formerly the Oaklawn Girls School, finally demolishing the buildings for the State with fully involved building fires.

Records: The records of the Personnel of the Department have been kept in force - whereby all information has been recorded on the files of the membership of the department.

Forms: Stencils were cut and Forms were printed as required or requested by the departments needs.

Library: The use of the Training Manuals in the custody of this Division is on the increase. Consideration is being given to the requesting of additional material for use in the Library.

Respectfully submitted,

Battalion Chief

John E. McDonald
Director of Training

FROM: Alfred J. Mello, Superintendent of Fire Alarm

TO: The Chief of Department

SUBJECT: Annual Report (Bureau of Operations and Control) 1969

SIR: The principal duty of the Bureau of Operations and control is the accurate interperation of all emergency calls and the dispatching of the proper apparatus to these emergencies.

The following is a break down of all types of alarms received in the year 1969 compared with the previous year:

	Boxes	St Boxes	Stills	R.I.E.P.	Rescues	Emerg.	Lockouts
1969	7400	1532	3777	51	10,114	509	568
1968	5041	1481	3404	64	10,366	894	708

The total number of emergencies received by this office and transmitted to the department during the year 1969 was 22,815 compared with 21,250 during 1968. As in previous years we have shown a large increase in alarms transmitted. This increase is due largely to the sharp increase in the number of Box Alarms for the year.

As in the past the department is still sending the first due Engine Company and Battalion Chief. This compliment is sent only on known False Alarm Boxes. The logic behind this was to try and eliminate the large display of apparatus, also it would decrease the possibility of depleting the department inventory of available apparatus. This practice has proven to be satisfactory in certain areas of the city. Its actual impact on other sections of the city cannot be measured due to the fact False Alarms are still on the upswing. With all apparatus radio equipped, if help is required the first due company can readily call for assistance. This is using our Radio Network to its fullest.

Rescue calls in the past year have decreased. This is due in part to the members of the B.C.C. screening all calls. By doing so they have eliminated some but not all unnecessary calls.

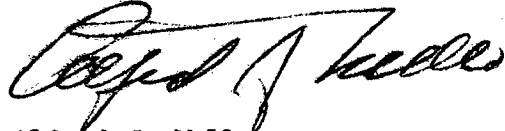

Again this year, lockouts have fallen off by a few, not enough to reflect any significant trend. I feel how as I have felt in the past that a service charge should be placed for this type of service. If this were the case, I feel that many of the calls which are repeats would be eliminated.

It is also the responsibility of this office to maintain records of all alarms transmitted to the department. Tests conducted by Fire Alarm Technicians, American Service Testing Co, Grinnell Co., and many of the Insurance Companies are received in this office and require the services of one man to receive and record these.

Annual Report, BCC, 1969 Continued:

In closing, I would like to say that the members of the Bureau of Operations and Control have handled all emergencies in the most expeditious manner. I would also like to thank the Officers and members of the Bureau for their continued dedication to their work, particularly during major emergencies.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read "Alfred J. Mello". The signature is fluid and cursive, with a large initial "A" and a long, sweeping underline.

Alfred J. Mello

FROM: Alfred J. Hello, Superintendent of Fire Alarm

TO: Chief of Department

SUBJECT: Annual Report, Fire Alarm Division 1969

SIR: The year 1969 shall go on record as being without a doubt, the most hectic in the modern history of the Fire Alarm Division. The complete renovation of the building and its central office equipment replacement, has required almost constant surveillance by the personnel of this Division to insure an uninterrupted continuity of service. In about all instances the contractor and sub-contractors have been most cooperative. As of the close of 1969, the building was just about completed except for minor details.

One of the most complicated phases of the renovation project was the installation of the new Department Telephone System, going from the old type switch-board to the direct dial system. This not only consisted of installation of elaborate equipment here at the office but also required considerable time in going around to all of the stations to install dials on all of the phones or to replace those phones that could not be converted. Under this new system the personnel of the BOC have been able to breathe a little easier during the usual peak periods and also the room can be operated efficiently with 3 men instead of the 4 required prior to the installation.

In conjunction with the installation of the new equipment, a 100 watt Base Station has been installed as our main transmitter, this is a Motorola Unit. Our old main station (250 watt) is now used as a stand-by Transmitter and the unit that was previously used as a stand-by has been converted to 154.280 mh and is used as an Intercity radio. With this unit on the Intercity we are now capable of contacting all stations on the network .

Probably the most tedious job connected with the changeover was the replacement of all Municipal cables from the basement of the building to the second floor where a new terminal rack is located. Many hours of overtime were put in by the Cablemen of the Division and at the time of this writing has just been completed.

During the entire installation of equipment, this office did not suffer any interruption of service. A considerable amount of time was spent testing every box in the city on the new system. Another problem we encountered was trying to maintain a minimum amount of noise, I full realize that at times it was quite nerve racking to the Dispatchers on duty and to the members of the Department as a whole in trying to receive transmissions from this office, I thank all of them for having been patient.

During the course of the year there were 19 Fire Boxes or Pedestals damaged as a result of auto accidents, the city was able to recover on some of these, but a good part of them were of the hit-and-run variety

Annual Report - Fire Alarm 1969

and these reflect a considerable loss to the city. In addition there were several of a very minor nature that went unreported.

During the course of the year several private boxes were installed and some were removed due to demolition of buildings, at the end of the year there was an overall increase of Private boxes of five (5) bringing the total to 349. The Public boxes dropped by three (3) during the year leaving a total at the end of the year of 688.

Due to new legislation that has been passed recently it is anticipated that we will have quite an influx of new Master Boxes particularly in Nursing and Convalescent homes during the coming year.

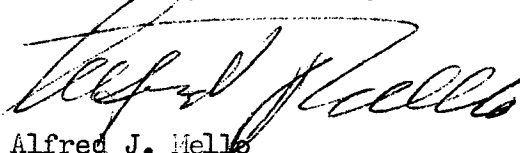

In addition there are 168 Police Call Boxes in the Police Telegraph system under the care of the Fire Alarm Division.

As in the past, this Division has been responsible for the upkeep and maintenance of all electrical appliances of the Department as well as minor electrical work in the Department of Public Safety Buildings. Since the loss of our licensed Electrician on the Trouble shooters job much of the electrical work done in the stations has been done on a contract basis.

In closing, I can say without exaggerating that we now have one of the most modern fire alarm centers in the country and the citizens of Providence can be very proud of it. I sincerely urge all members of the Department to come and see the building and get acquainted with the problems associated with this phase of fire fighting.

Many thanks to all members of the Division for their hard work in the past year and to the Mayor, the Commissioner and the Chief of Department for their full cooperation.

Respectfully submitted,

A handwritten signature in dark ink, appearing to read 'Alfred J. Mello', is written over a horizontal line.

Alfred J. Mello

To: The Chief of Department

From: Raymond A. Kilduff, Superintendent, Automotive Repairs

Subject: Annual Report, Automotive Repairs (1969)

Sir:

I hereby submit for your consideration and approval the report of operations of the Automotive Repair and Maintenance Division for the year ending December 31, 1969.

Our performance over this period, as in the past, has been the maintaining and repairing of all mobile units of this department, also all portable units such as pumps, generators, etc. The servicing and repairing of various articles of fire fighting equipment and tools has been accomplished in our machine shop. Minor body repairs, painting, welding and brazing are done by members of this division. Apparatus lubrications and inspections are done both in the Repair Shop and in Company quarters. We have been in attendance at all multiple alarm fires and other emergencies as well as the annual hose and pump service tests of all Engine Companies and also the acceptance tests of all new fire apparatus.

A twenty-four hour a day, seven day a week schedule is maintained by our Mechanics to insure prompt response for any mechanical failure, multiple alarm fires, or any other emergencies which may occur. Emergency repairs, minor repairs, adjustments and other operations are performed on the scene or at Company quarters.

During the past year, one new Rescue unit with a custom built body was received and placed in service at Rescue Co. # 1. Four new 1000 G.P.M. triple combination pumpers were received and placed in service at Engine Co's 1, 3, 10, 12. A 100 foot all steel hydraulically operated Ladder truck was received and placed in service at Ladder Co. # 1. Another Custom built Rescue unit was ordered and delivery is expected shortly.

Respectfully submitted,

Raymond A. Kilduff
Superintendent, Automotive Repairs

From: Robert M. Keegan, Lieutenant, Rescue Company No. 1

To: The Chief of Department

Subject: Annual Report of Rescue Company No. 1 for the Year 1969

Sir:

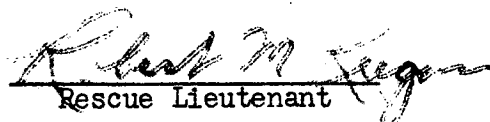

For the second consecutive year, the total runs of this Company has shown a decrease of 9.7% over the previous year. In the past 18 months, since the Hospital Zone Plan has been in operation, this Company has had a 16.6% decrease in the rate of runs, as compared to the 18 months preceeding the Zone Plan. This decrease denotes that the general public is cooperating and that the announcements in the newspapers and on the radio are beginning to show their effect.

To: The Chief of Department

Subject: Annual Report of Rescue Co. #2 for the Year 1969

Sir:

With the year 1969 completed, may I say that this is the first time in the history of this company that there has been a decrease in yearly calls. Our biggest decrease has been in boxes and still boxes. There has been a relatively small decline in still alarms, 388 under last year.

It is quite apparent that this decrease in yearly calls is due to public awareness that we now transport only emergency cases. Assuming this awareness to continue, a substantial decline in non-emergency calls can be anticipated for the year 1970.
