Any person holding a position in the classified service and receiving, on the date of the passage of this Ordinance, a salary or wage in excess of the salary or wage provided in the compensation plan established in Section 1 for the class to which such employee's position is allocated, shall be neither reduced nor increased in compensation so long as he remains in

the service of the City, or, until his employment status is changed under the provisions of this Ordinance.

SEC. 3. All persons entering a classified position in the City service on or after October 1, 1946, shall be paid the rates herein provided.

SEC. 4. The minimum rate of pay for any class of position shall be payable to any person on his first appointment to the position allocated to the class, provided that, if a person already in the service is transferred, he may, with the recommendation of the Budget Director and approval of the Mayor, enter the position at the same rate of pay as he had previously received.

SEC. 5. Any employee employed in a position allocated to a class carrying a maximum and minimum pay range may be granted a pay increase from one step to the next higher step within the established range, subject to the following:

1. Forty-eight dollars a year shall constitute a step.

2. Recommendations for pay increases shall be made by department heads or the chairman of bureaus or commissions at the time of submission of annual budget estimates, and at no other time. Such recommendations shall be made on the basis of the quality of work and the seniority of individual employees.

3. The Budget Director shall review such proposed pay increase for availability of funds and conformity to the provisions of this Ordinance, and shall recommend approval or disapproval of the increase to the Mayor.

4. No employee may be eligible for a pay raise until he has served the City one year.

5. No employee may be raised more than one step in any fiscal year.

6. No pay increase shall be made unless departmental appropriations for personal services are sufficient to cover the increased cost.

7. Increased compensation received by an individual as the result of promotion from a lower to a higher class shall not be deemed a pay increase in the sense of the term as used in this section and in event of a promotion, the employee shall automatically receive the minimum salary for the class to which he has been promoted except that, if the minimum salary is the same or less than the salary he received prior to his promotion, he may receive a salary which shall be that of the next higher step in the new range.

SEC. 6. The classes—Police Patrolman, Police Patrol Woman, Fireman, Public Health Nurse (Child Hygiene), Public Health Nurse (Communicable Disease) and Institution Attendant shall be exempt from the first five clauses of Section 5. At the expiration of twenty-four (24) months of service, a maximum of $1,248 per year.

$1.25 per week for one (1) meal per day;

$2.50 per week for two (2) meals per day;

$3.75 per week for three (3) meals per day;

SEC. 7. A given rate of pay as expressed in the compensation plan may be commuted to a monthly, semi-monthly, weekly, daily or hourly rate and established by a department head or chairman of a bureau or commission with the approval of the Budget Director, as the rate of pay for employees of a particular class: provided that all employees of a given class in a given unit of a department are paid on the same basis. Every person, firm or corporation whose premises in the City of Providence are served by a connection with the system of sewerage of the City of Providence, whereby the sewage or industrial wastes, or either, are disposed of by the City of Providence, either through the facilities of the sewage treatment and sewage disposal works of the City of Providence or otherwise, shall pay a sewer rental charge based upon the quantity of metered water used in or upon such premises of 2.6 cents per hundred cubic feet of water so measured whether such water is derived from a source other than the city water supply or all or any part of such water is furnished to said premises without charge: Provided, however, that a minimum charge as provided in Section 2 hereof shall be charged and collected from all premises having a connection with the sewerage system of the City of Providence.

Definition of Sewage. The term "sewage" shall mean the water or water borne wastes, and the term "industrial wastes" shall mean the liquid wastes resulting from any commercial manufacturing or industrial operation or process, which water borne or liquid wastes enter the system of sewerage or any portion

SEC. 3. *Properties Using Other Than City Water.* For a property which uses water, all or part of which is from a source or sources other than the City's water supply system, there shall be a sewer rental, which shall be measured by the quantity of water from the source or sources other than the City's water supply system, which is discharged into the City's sewers from said property.

The owner of each such property shall install without cost to the City, a meter or meters to measure the quantity of water received from other than the City's water supply system and discharged into the City's sewers. No meter shall be installed or be used for such purpose without the approval of the Chief Engineer of the Water Supply Board.

In case a meter fails to register or has been removed for repairs, testing or other purposes during the billing period, the bill will be issued based on the average daily rate of water consumption as shown by the meter after it has been returned to service and is in proper working order.

If the meter has not been returned to service, the bill will be issued based on the average daily rate of water consumption for the previous three-year period.

SEC. 4. *Water Not Discharged Into City's Sewers.* Whenever a property upon which a sewer rental is hereby imposed uses water from the City's water supply system or other supply system for an industrial or commercial purpose, and part of the water so used is not discharged into the sewerage system of the City, the quantity of water so used and not discharged into the City's sewers shall be excluded in determining the sewer rental of said property, and the charge shall be based upon the actual quantity of water passing into the sewerage system of the City, provided, the quantity of water so used and not discharged into the City's sewers is measured by a device or devices approved by the Chief Engineer of the Water Supply Board and installed without cost to the City.

SEC. 5. *Measuring Devices.* All meters or other measuring devices installed or required to be used under the provisions of

SEC. 7. *Time and Method of Payment.* All sewer rentals shall be due and payable at the same time that water rentals are now due and payable. Bills shall be prepared and collected at the same time and in the same manner and be subject to the same penalties as the charges for water. Said payments shall apply to all properties subject to the payment of sewer rents without regard to the source of the water used by them.

Penalty for Non-payment. Failure to pay the sewer rental charge by the due date shall result in shutting off of the water service, without regard to change of ownership or occupancy of such premises: And water shall not again be turned on until all sewer rental charges due and payable shall have been paid.

SEC. 8. *Apportionment.* Whenever sewer service to any property begins after the first day or terminates before the last day of any billing period, the sewer rental for such property for said period shall be for that portion of the period during which the said property is served: *Provided, however,* that in making such apportionment, a fraction of a month amounting to one-half or more of a month shall be counted a full month and a fraction of a month amounting to less than one-half month shall be disregarded.

It is hereby declared as the intent of City Council that this Ordinance would have been adopted had such unconstitutional, illegal or invalid provision, sentence, clause, section, or part not been included herein.

SEC. 12. *Water Supply Board Regulations.* The Water Supply Board of the City of Providence shall make and enforce such by-laws and regulations as said Board may deem necessary for the collection of the sewer rental or charge for the use of sewers, sewage system and sewage treatment works of the City of Providence.

Whereas, These diversified mercy agencies, operating without ostentation and with little public acclaim, have endeared themselves to the hearts of people of this community because their assistance is available to the needy regardless of race or color or creed, and

Whereas, These community services have been so humanely rendered and at an administrative cost so small that it eliminates comparison, and

Whereas, The composite voice of this community would, were it audible, ring out loud and clear in its approval of this worthy cause,

Now, Therefore, Be It Resolved, That the City Council of the City of Providence, on behalf of the people of our city, expresses to the Most Reverend Francis P. Keough, Roman Catholic Bishop of Providence, heartfelt thanks for the innumerable kindnesses shown to the orphan, the needy, the unfortunate and the infirm of this city; and extends to the Most Reverend Bishop, to the Honorable Edward T. McCaffrey, veteran Councilman from the Fifth Ward, who passed away on Saturday, May 18, 1946, be and the same is adopted, ordered inscribed on the records of the City Council and an engrossed copy transmitted to the bereaved family.

MINUTE

James Francis McCaffrey, a native of Providence, was the son of the late John F. and Annie (Carey) McCaffrey. He was born October 29, 1889.

An engraver by trade, he worked for the E. L. Logee Co. for many years; the latter portion of which he was their Superintendent. For several years he has been associated with the sales department of the Narragansett Brewing Co.

From boyhood he was an ardent sportsman. Baseball was his favorite game and in it he excelled as a player and, later as a manager, his clubs won wide acclaim in local sports circles. His clean sportsmanship, co-operative team spirit and consistent fair play won him a host of friends among both players and spectators.

Early in life Councilman McCaffrey interested himself in municipal governmental affairs, and he was successively a member of the old Third War Democratic Committee, Ward Committee Chairman, and then Councilman from that Ward. He served continuously from 1929 to 1933; elected again in 1936 from the Fifth Ward he served in both the Common Council and the City Council until his death. He had a friendly nature that would not be outdone in generosity and good will as is attested by his life's activities. Among them were welfare work in the Benevolent Protective Order of Elks, membership in St. Vincent DePaul Society, St. Vincent Assembly and City Council Committee on Public Welfare, of which he was Chairman for the past six years.

Without ostentation, Jim McCaffrey served his God, his Country and his fellow man. He was a practical Roman Catholic gentleman, and was a communicant of St. Edward's Church during his entire life. He answered the call of his Country in the early part of World War I by enlisting and serving in the U. S. Navy. His kindness, mercy and generosity will live long in the memories of his legion of friends. His record in private and public life is replete with accomplishment and good deeds. His humility, simplicity and sincerity endeared him to all with whom he came in contact. His fellow councilmen, though grieved beyond words at his passing, will long cherish in kindly memories their happy association with him and to Mrs. McCaffrey and family this City Council extends its sincere condolences and profound regret in the hour of their bereavement.

No. 408. Resolution Extending to Veterans and Gold Star Mothers of World War II, Upon the First Anniversary of V-J Day, the Appreciation of the Citizens of Providence for Having Brought Honor and Renown to Our City.

(Approved August 19, 1946.)

Whereas, August 14, 1946, marks the First Anniversary of V-J Day and the unconditional surrender of Japan, bringing to an end the most devastating and costly war the world has ever known; and

Whereas, This great nation, although forced to fight on two fronts against powerful and vicious enemies whose lust and greed knew no bounds, calmly girded itself to wage complete war on the aggressors and to drive them from the lands they had despoiled; and

Whereas, Our plan of attack, although so involved in technique and mammoth in scope as to stagger the imagination, was carried through to victory by the brilliant and courageous action of our armed forces, aided by those of our Allies, crushing our foes into unconditional surrender and proving to the world that an aroused democracy is a vital and virile reality upon which humanity can depend; and

Whereas, A grateful Country, while thankful to all who helped in the attainment of this full victory that is ours, realizes its deep indebtedness and pays especial tribute to the returned heroes of World War II, who offered their all in the Service of their Country; to their fellow comrades who gave the last full

measure of devotion; and to the Gold Star Mothers whose sacrifices cannot be assuaged by the spoken or written word.

THEREFORE, BE IT RESOLVED, That this City Council, on behalf of the City of Providence, extend to our own sons and daughters whose loyal services and valiant deeds have brought honor and renown to our City, the heartfelt thanks of its citizens for a task well done; to those whose resting places are marked with a white cross on the far flung battlefields, a pledge that their memories will be forever green in the hearts of those they leave behind; and to those good mothers who wear the Gold Star, a fervent prayer that Almighty God will lavish upon them the solace and consolation which He, alone can offer.

No. 426. Communication from His Honor the Mayor re Budget for Fiscal Year 1946-1947.

CITY OF PROVIDENCE, RHODE ISLAND
EXECUTIVE DEPARTMENT
OFFICE OF THE MAYOR

August 14, 1946

To The Honorable The City Council of the City of Providence:

GENTLEMEN:

I present herewith my budget recommendations for the fiscal year 1946-1947. Recommended expenditures total $19,363,901.94 and estimated income $19,386,901.21. This estimated expenditure exceeds original appropriations for the current fiscal year by $260,000 but is $750,000 less than probable expenditures which include supplementary appropriations for public assistance, equipment purchase, building and plant repair, snow removal, highway, sewer and park activities, and the purchase of the Fields Point shipyard.

Expenditures

Gross expenditure proposals for all items other than debt service exceed original 1946 budget appropriations by some $790,000 while appropriations for debt service are down $533,000. The decrease in debt service appropriations arises from the fact that in the current fiscal year the City appropriated the full amount for principal and interest and sold $1,000,000 of refunding bonds in the year. At the same time refunding bonds were sold to retire $441,000 in bonds due in 1947. This procedure saved the City the difference between the interest rate on the bonds retired and the lower rate on the refunding bonds sold; and reduced normal 1947 charges by $441,000. In the 1947 fiscal year the city will probably sell the remaining $559,000 in refunding bonds permitted under State law. Actually Providence debt retirement will be $20,000 more in fiscal year 1946-1947, than in 1945-1946, that is, the city will retire $1,656,000 in 1947 compared to $1,636,000 retired this year. Interest charges will be $111,000 lower next year than this year.

Of the $790,000 increase in other costs $336,000 is for fixed charges, $111,000 for relief and the remainder for items under direct control of the City Council.

Fixed Charges

This year the School Department requested appropriations equivalent to the full 35% of the average property tax collections of the last three years. Under provisions of the Strayer Act it is mandatory that the council grant this appropriation. It means an increase of $228,000 over current year general fund appropriations for schools.

Pension fund requirements for 1947 total $901,889, an increase of $108,000 over current year appropriations. Of this increase $17,000 is for payment of police pensions under the old police pension system and $91,000 for the Employees' Retirement System. This latter increase is greater than would have pertained had not the City been able to reduce the 1946 appropriation because of a profit made to the fund through the sale of certain bonds at a substantial premium. The 1947 appropriation provides the stipulated $53,000 necessary to make up pension fund appropriation deficits of earlier years.

Public Welfare

On the basis of current year experience I am recommending a 1947 appropriation for direct relief of $667,000. This figure exceeds original budget appropriations for the current year by $111,000.

General Operations

The principal increases for General City operations are: Public Works $134,000, Water Department $100,000, Finance Department $44,000 and Chapin Hospital $41,000.

Recommended Public Works Department appropriations total $2,606,847 compared to 1946 budget appropriations of $2,472,977. It is expected that Public Works Department expenditures will total $2,740,000 this year including supplementary appropriations that have been made from time to time. Budget estimates for 1947 are $46,000 higher for equipment than those for 1946 and $91,000 higher for personal services. This budget

continues an equipment replacement program started a year ago and designed to prevent the City from again getting into the position where obsolescence or complete lack of equipment can interfere with the efficient execution of the City's responsibilities.

The greater part of the increases for personal services are in the Sewer Department for additional personnel for sewer construction and reconstruction that accompanies highway work and for overtime compensation that appears to be necessary but has never before been included in the budget; and in the highway department and the offices of city engineer and public service engineer for overtime pay and additional personnel.

In connection with the highway problem, particularly as it refers to the unsatisfactory condition of many of our residential streets, I would like to point out that the city highway system includes some 190 miles of such streets. Approximately half of this mileage has not been resurfaced for 15 years. I am convinced that the work of resurfacing that must be done can not be carried out in the traditional methods used by the city. Such work on residential streets has averaged less than 10 miles per year for the last 25 years. I have therefore requested the city engineer's office to survey resurfacing methods in other communities and determine a satisfactory method that can be expeditiously applied in a wholesale manner. Otherwise I see no way of getting out of our present situation wherein maintenance costs mount steadily and our residential highway system constantly deteriorates.

Water Department

A somewhat improved situation as to supplies and materials has permitted the Water Department to plan an expansion of its activities in 1947. All expenses of this department are paid out of its own receipts.

Finance Department

When I submitted my budget a year ago the appropriation requirements of the then newly constituted Finance Department were not sufficiently clear to permit the presentation of satisfactory estimates; and although my recommendations for 1947 in

the amount of $377,862 are $44,000 higher than original budget estimates they are only $15,000 higher than expected expenditures for the current year. Accounting and recording methods and procedures in the tax collection and assessing divisions of this department have been completely revamped this year. These developments complete an extensive project that places the accounting methods and procedures in our Finance Department at the forefront of American cities. We must now turn our attention to the improvement of departmental accounting. The Water Department has already adopted modern accounting methods and this year accounts receivable, cost and inventory systems were installed at the Chapin Hospital.

Chapin Hospital

I am recommending an appropriation of $541,000 for the Charles V. Chapin Hospital this year. This is $41,000 in excess of the budget appropriation for the current year. Of this amount $36,000 is for pay raises for such of the lower paid help as kitchen workers, maids, porters, attendants and laundry workers. With such adjustments as have been provided the city is paying hospital wages and salaries approximately equivalent to those of private institutions in the community. It might be argued that it would be desirable to pay even more than has been provided but this administration's policy of keeping pay at the Chapin on a level with private hospitals coupled with efforts to provide reasonable sums for building maintenance has served to increase the costs of maintaining this institution from $370,000 in 1940 to the present $541,000.

Revenues

Last year at this time I requested a City Council Committee to recommend ways and means of raising an additional $1,400,000 for general purposes of the city. This committee proposed:

1. An extension of then existant law making available to cities and towns on a valuation basis 75% of a 4% pari-mutuel tax.

2. A sewer rental tax.

3. A 5% tax on the price paid for hotel rooms.

4. An admissions tax.

5. Permission for the city to tax the tangible personal property of the Telephone Company.

6. A tax on buses, taxis, and liveries.

Because the first three proposals were granted, tangible personal property valuations could be maintained at the current year level; horse racing taxes are expected to yield more in 1947 than we believed likely a year ago; and the sinking fund commission has agreed to make $500,000 available to the city for the purposes of serial debt retirement from the proceeds of sale of the shipyard, we have been able to count on sufficient revenues to finance the 1947 expenditure program provided we continue to refund $1,000,000 in debt obligations.

The principal variations in 1947 revenue estimates as compared with 1946 figures are those of $500,000 from the sale of the shipyard, $75,000 from the hotel tax, and $150,000 from the sewer rental tax.

The city has appropriated $310,000 out of general funds for the purchase of the shipyard site from the federal government and already has spent some $20,000 for improvements in the area. Under existing ordinances all receipts accruing to the city from the sale of real estate are credited to the Fund for Retirement of City Debt which is controlled by the Sinking Fund Commission. This commission is required to apply such money to the retirement of city debt. Following the same procedure as was applied a year ago in transferring $225,000 from this fund to the general fund to retire serial bonded debt, the Sinking Fund Commission has agreed to transfer $500,000 of the proceeds of the resale of the shipyard for purposes of debt retirement. Otherwise the general fund would lose all money it has spent or may spend in connection with the original city purchase and improvement of the property.

Hotel Tax

The hotel tax is to be levied at the rate of 5% of the cost of room rental. The tax does not apply to any other services or

materials such as food or liquor which the hotel may provide. The levy of this tax is limited to one year without further legislative action.

The Sewer Rental Tax

The sewer rental tax applies only to commercial or industrial properties. It costs the city approximately $300,000 a year to maintain the sewage system and provide disposal facilities. A careful survey of water sales by the Providence Water Department shows that commercial and industrial users consume almost exactly half of the total output of the Water Department. I therefore believe that the sewer rental tax should not be expected to yield more than one half the cost of maintaining the sewage system or $150,000. Sewer rental rates have been fixed to that end.

The Future

I would be less than frank if I neglected to say that City finances are not on as firm a footing as I had hoped they would be at this time. At the same time the financial problem of Providence and other Rhode Island municipalities is generally recognized. A committee appointed by Governor Pastore is now surveying the financial condition of Rhode Island municipalities and will make its recommendations to the General Assembly in January. I am convinced that a permanent solution to our problems will be forthcoming and firmly believe that the city should place itself in a position to proceed with a municipal betterment program by placing on the ballot this November for popular referendum the following bond issue proposals:

$1,250,000 for re-location and rehabilitation of the Fire Department physical plant. At present the city has 29 fire stations in service. Of these, four are 80 years of age and 60% were built more than 50 years ago. Most of the existing stations were located for horse drawn apparatus and are obsolete in every respect. It is therefore proposed that the city completely overhaul the Fire Department physical plant. Existing plans which have been approved by all interested parties provide for the erection of eight new stations

on new locations and continuance in service of nine existing stations; a net reduction of 12 stations. Although there will be a reduction of two companies coverage will be improved. Annual savings in current operating costs will be approximately $120,000. I intend to use a portion of this sum to reduce the working hours of firemen below the present 84 hours per week.

$3,000,000 for the purpose of making a start at modernizing our major traffic arteries. These funds will be used to start construction on the highway master plan which was presented to you last month. Any part of the work contemplated in that plan is eligible for 50% Federal aid under the provisions of the Federal Highway Act. In the event such aid is forthcoming, and I see no reason why it should not be, authorization of this bond issue will make $6,000,000 available to Providence over a period of time for major improvements in our highway system.

$2,500,000 for the purpose of financing the erection of new housing projects or eliminating blighted areas and preparing sites for the erection of housing by private enterprise under the provisions of the "Urban Redevelopment Act."

$1,000,000 for the development of recreational facilities. Improvement of our recreational facilities and program is in many respects, one of the most vital needs of Providence. The special committee which I appointed earlier in the year to survey the actual extent of our requirements has established that the greatest need lies in the South Providence, Mount Pleasant, Federal Hill, West End areas of the city. This bond issue will permit us to establish, clear and equip a five acre playground in each of these areas. Three of these will include swimming pools and all attendant facilities.

$1,300,000 Addition to the Providence Public Library.

Although the Providence Public Library is a private corporation the City of Providence annually contributes more than $100,000 a year to its support. The present central library building was constructed in 1899 when the library collections totaled 90,000 books and there were 14,000 card holders. Today the collection includes 340,000 books and there are 26,000 card holders. The library vitally needs extension. The recommended $1,300,000 city bond issue will provide a four floor extension, area 62,000 feet, adjacent and attached to the existing building.

A public library is part of the standard equipment of all American cities. In nearly every municipality, the entire cost of public library service is charged to the tax payers. In Providence, the annual city appropriation to the Providence Public Library is comparatively moderate,—only 40 cents per capita. The standard city appropriation for American public libraries is considerably higher.

$1,500,000 School Athletic Fields.

Providence Public Schools have never had adequate facilities for interscholastic athletic activities. It is therefore proposed to provide stadium facilities on city owned land adjacent to Mount Pleasant and Hope High Schools and to acquire sufficient land to erect a stadium for the common use of Central and Classical High Schools.

$1,000,000 for a war memorial. When this proposal was originally announced I stated that I would ask the veterans to choose their own memorial. The veterans' war memorial committee has suggested a municipal auditorium with facilities for indoor recreation including a large swimming pool. I am heartily in accord with their choice and believe that construction should be started as soon as feasible.

$ 950,000 to provide a second unit at the incinerator and facilities for sludge disposal at the sewage disposal plant. These improvements have been planned for a number of years. Our present incinerator has only one burning unit which must be in service constantly. Consequently the combustion chamber frequently burns out and has to be relined. This causes heavy maintenance costs and forces city use of the inefficient Kinsley Avenue plant. With dual facilities permitting frequent shifts from one unit to another, burning out will be less frequent, maintenance costs lower, and the city will be able to demolish the Kinsley Avenue plant and sell the property. The sewage disposal project contemplates the erection of sludge disposal facilities. City engineers have not yet decided whether this would constitute a burning plant or fertilizer reduction plant. At present the city transports the sludge down the bay and dumps it. It has long been realized that this practice is completely undesirable.

Each of these projects supplies a long standing necessity to a better, more efficient Providence. None represents an extravagance. All will pay their own way in terms of more efficient city services, the health and well being of our children, better private, commercial and industrial transportation facilities and the provisions of more nearly adequate housing facilities.

They are presented with the knowledge that this country is growing bigger every day. Our constantly expanding business and our people are on the move. The fear has been expressed that this section of the country stands to lose in the period of change that is upon us. I am convinced that this could only be so if we sat by and permitted it. I am convinced that if Providence can be made and kept a financially sound and physically efficient city its people will insure the future.

It is not my intention to rush into all of these projects at once. Such a course would be poor business under present circumstances. Until the results of the efforts of the Governor's Tax

Commission are known we are not even in a position to present a capital budget showing a construction calendar. I would like to point out, however, that as a result of this administration's efforts in debt reduction the city could complete the entire program by 1950 without pushing the city's debt service costs above the current level.

Respectfully submitted,

DENNIS J. ROBERTS,
Mayor

No. 477. Communication from His Honor the Mayor Vetoing Resolution Authorizing Installation of Gasoline Storage Tanks and Pumps at 581 Atwells Avenue.

August 23, 1946.

To The Honorable The City Council of the City of Providence:

GENTLEMEN:

This is to inform your Honorable Body that I have, on the 23rd day of August 1946, vetoed the within resolution, namely: a resolution of the City Council authorizing the installation of gasoline storage tanks and pumps at 581 Atwells Avenue.

I am informed that the opening of curb cuts for a gasoline station at this point and the consequent vehicle movements to and from a service station would cause traffic frictions resulting in traffic delays and congestion on this point on Atwells Avenue. Furthermore, this section of Atwells Avenue, between Harris and Valley Streets, carries over 10,000 cars per day and is one of the most congested arteries in the City.

It is the responsibility of the City Government to prevent new traffic problems which may well require expensive solutions. I therefore feel that it is for the best interest of the community to veto the above resolution at this time.

Respectfully,

/s/ DENNIS J. ROBERTS,
Mayor of Providence.
